Intergovernmental affairs is getting media calls on the Makkovik search situation and are developing a few key messages in the event their Minister is in a position to speak to the issue at upcoming events. For our purposes, I suggest the following message should be asked out the involvement of the Provincial Government.

Your review and approval would be appreciated.

- Fire and Emergency Services – NL was contacted Monday morning by the RCMP with a request to provide air support to the search. FES-NL then contacted the Air Services Division of Transportation and Works. Initially, contract helicopters were unable to participate due to weather, though at noon Monday, air support was provided to assist with the search.
