Not necessarily new - just have continued work on case and want to go over some areas in the primary search zone

Got it Dave, no problem. Is there new details on this missing person?

Hi All, as per RCMP request I have approved 2 hours search to start on site at 0830 hours tomorrow (Friday). Cory, I have made initial contact with GAS (at 1552 hours) but Dispatch was very busy. They are going to call through answering service when things settle down to confirm details. Below are coordinates where GSAR will muster in the AM and the name/cell number of RCMP member - FEWER. If you have not heard from GAS by early evening would you please call them. I have included GAS dispatch on this message.

Thanks, Dave
