2

3 THE CLERK:

4 This Commission of Inquiry is now open.

5 Commissioner James Igloliorte presiding as

6 Commissioner. Please be seated.

7 COMMISSIONER IGLOLIORTE:

8 Thank you very much, and welcome everybody to

9 today's session. I'll be asking Mr. Budden to

10 lay out the morning for us. But our COVID

11 protocols require us to keep our mask on, please,

12 but if you're speaking, you can take it off. So

13 that's not an issue. Thanks.

14 MR. BUDDEN:

15 Good morning, Mr. Commissioner. It's Geoff

16 Budden, Commission counsel. As this is our first

17 session in Grand Falls-Windsor, I thought I'd

18 just speak a moment or two about the work of the

19 Commission and where we have been.

20

21 The Commission has held public sessions in

22 Makkovik, Labrador for four days earlier this

23 month, and we're just coming from three days in

24 Corner Brook.

## Page 2

1

2 In Makkovik, we heard from the Makkovik Search  
3 and Rescue team. In Corner Brook we heard from  
4 the Bay of Islands Search and Rescue team, and  
5 also from the Deer Lake Search and Rescue team,  
6 and the Bonne Bay Search and Rescue team, through  
7 a representative.

8

9 The role of this inquiry is to inquire into the  
10 state of ground search and rescue in the Province  
11 of Newfoundland and Labrador and to make  
12 recommendations, which it is presided over, as  
13 we've heard, by Commissioner Igloliorte who will  
14 make those recommendations after hearing this  
15 evidence and other evidence.

16

17 Today, Mr. Commissioner, after introduction of  
18 counsel and a brief statement from Mr. Sweetapple  
19 and -- or the Sweetapples, rather, and anybody  
20 else who wishes to, if counsel wished to make an  
21 introductory statement, we will be hearing from  
22 the Exploits Search and Rescue and the Red Indian  
23 Lake Search and Rescue teams.

24

## Page 3

1 The primary focus of today's and tomorrow's and  
2 Saturday's evidence will be a search that took  
3 place in late July and early August of 2013 for  
4 Mr. Ches Sweetapple, who is here today.

5

6 We also, as we have done in the past, will be --  
7 this team will give evidence as to their personal  
8 involvement as individuals, as we've heard, their  
9 level of commitment, how they became involved and  
10 so forth, as well as general issues that are  
11 important to the Commission such as their  
12 concerns about equipment. Their concerns about  
13 fundraising. The role they play in the  
14 community, and the skills and expertise they  
15 bring.

16

17 As always, we have Mr. Harry Blackmore of the  
18 Newfoundland and Labrador Search and Rescue  
19 Association, Mr. Richard Smith, our retained  
20 expert, and others to provide information and  
21 guidance from time to time, as well as the  
22 witnesses for the other parties.

23

24 We, as well, have Ms. Louise Bradley, a leader in

## Page 4

1 the field of mental health who is available with  
2 respect to the trauma-informed aspect of our  
3 mandate, and is available to the search team, to  
4 the Sweetapples, and otherwise as may be  
5 necessary.

6

7 Those are my introductory remarks. I anticipate  
8 other counsel will wish to make brief comments,  
9 and then I'll begin my evidence. And also the  
10 Sweetapples wish to.

11 COMMISSIONER IGLOLIORTE:

12 Yes. As we've done in previous hearings, I think  
13 we'll just go around the inside table for this  
14 session, and then when other people come to the  
15 table they'll introduce themselves. But we can  
16 begin in that manner.

17

18 Fine. We'll start with Ms. Mulrooney and her  
19 role, and we'll go around the table and have  
20 people explain who they are, who they're  
21 representing.

22 THE CLERK:

23 Hi. My name is Marcella Mulrooney, and I'm the  
24 hearing clerk, administrative staff for the

**Page 5**

1 Ground Search and Rescue Inquiry.  
 2 RALPH, Q.C.:  
 3 Good morning. My name is Peter Ralph, and I'm  
 4 counsel for the Province. And I would just like  
 5 to thank everyone for attending. This is now, I  
 6 guess, into our second full week of hearings, and  
 7 it's been a remarkable experience learning about  
 8 the sort of the sacrifices and the commitment  
 9 that people like yourselves who are, with respect  
 10 to Ground Search and Rescue teams throughout the  
 11 province, are making and the contribution they  
 12 are making to the province. So thank you for  
 13 coming.  
 14  
 15 I'd also like to thank the Sweetapples for  
 16 coming. And it's an important part of this  
 17 inquiry is to getting the perspective of the  
 18 person that was lost, but also the families, and  
 19 the difficulties that they experienced in terms  
 20 of being lost and fearing for their loved ones.  
 21  
 22 So thank you for coming. I think it's greatly  
 23 appreciated in this important part of this  
 24 inquiry. Thank you.

**Page 6**

1 MR. RUMBOLT:  
 2 Good morning. My name is Mitch Rumbolt. I'm the  
 3 Director of Emergency Services Division for the  
 4 Province. So we are the division that the lead  
 5 police agencies would call when they require air  
 6 support to assist ground search and rescue teams  
 7 and their taskings.  
 8 MS. BEDFORD:  
 9 Good morning. I'm Corrine Bedford. I'm lawyer  
 10 with Department of Justice Canada. I represent  
 11 the federal entities here today, being RCMP and  
 12 the Canadian Armed Forces.  
 13  
 14 We are here to be as helpful and cooperative as  
 15 possible with the Inquiry, and hope that it does  
 16 result in some improvements to search and rescue  
 17 in the province. And thank you all for coming  
 18 today. And I would echo the comments made by my  
 19 colleague, Mr. Ralph. Thank you.  
 20 SERGEANT WILLIAMS:  
 21 Good morning. I'm Sgt. Danny Williams with the  
 22 RCMP. I'm in charge of the Emergency Management  
 23 Section, "B" Division, Headquarters, which  
 24 oversees the policing aspects of search and

**Page 7**

1 rescue for the province in all RCMP  
 2 jurisdictions.  
 3 MR. BUDDEN:  
 4 Perhaps we'll skip over the searchers just for  
 5 now. You will introduce yourselves perhaps once  
 6 done with the other part of the inner table.  
 7 MS. SWEETAPPLE:  
 8 Good morning, I'm Florence Sweetapple.  
 9 MR. SWEETAPPLE:  
 10 Good morning.  
 11 WILLIAMS, Q.C.:  
 12 Good morning, Mr. Commissioner, Tom Williams. I  
 13 represent the Burton Winters family as well as  
 14 other families seeking advice and assistance  
 15 during the inquiry process, including the  
 16 Sweetapples who are currently with us today.  
 17 MR. SMITH:  
 18 Good morning, Commissioner, Richard Smith from  
 19 SARA Canada. Here as a consultant for ground  
 20 search and rescue support.  
 21 COMMISSIONER IGLOLIORTE:  
 22 One second. Can we get Louise a microphone as  
 23 well to introduce herself?  
 24

**Page 8**

1 MS. BRADLEY:  
 2 Good morning. Louise Bradley, mental health  
 3 consultant.  
 4 MR. BUDDEN:  
 5 I'm not sure if we've missed anybody, but the  
 6 next person I would ask to speak would be Harry  
 7 Blackmore. And then I was going to move on to  
 8 the search and rescue teams, if that pleases the  
 9 Commissioner?  
 10 COMMISSIONER IGLOLIORTE:  
 11 Thank you. Mr. Blackmore?  
 12 MR. BLACKMORE:  
 13 Harry Blackmore, President of the Newfoundland  
 14 and Labrador Search and Rescue Association,  
 15 representing all 25 teams across the Province and  
 16 Labrador.  
 17 MR. BUDDEN:  
 18 And when the search and rescue team introduce  
 19 themselves, perhaps they could say their names  
 20 and also how long they've been involved and which  
 21 team they're with. How long they've been  
 22 involved in search and rescue, and perhaps a  
 23 sentence or two of how they came to be involved.  
 24

**Page 9**

1 And also there are members of the team who are  
 2 not at the table. They're sort of spilled over  
 3 into the general audience. And perhaps when the  
 4 table is done, a microphone, remote microphone  
 5 could be brought to them and they could also  
 6 introduce themselves in the same fashion.  
 7 MR. CLARKE:  
 8 Good morning. My name is Winston Clarke. I've  
 9 been a volunteer member with Exploits Search and  
 10 Rescue for approximately 23 years. And I just  
 11 absolutely love it. It's a great team to be  
 12 involved with. And I started because I just  
 13 wanted to give back to our community somewhat,  
 14 and I found this an absolutely excellent way to  
 15 do it.  
 16 MR. GOOBIE:  
 17 Hi, my name is Roger Goobie. I'm the Coordinator  
 18 of Exploits Search and Rescue. I've been a  
 19 volunteer member for 34 years with the team. Got  
 20 me interested. My dad got lost some 50 years  
 21 ago, and I followed in the footsteps of my  
 22 brother. And so 34 years later, I'm still at it.  
 23 MR. SNOW:  
 24 Good morning, Cameron Snow, Exploits Search and

**Page 10**

1 Rescue. I've been a part of the team for a  
 2 little over ten years, and look after the  
 3 membership and recruitment for the team. I think  
 4 a sense of giving back to the community, like the  
 5 rest of the guys, is the primary reason why we've  
 6 stepped in and been involved.  
 7 MR. MORROW:  
 8 My name is David Morrow. I've been a member. I  
 9 joined originally in 1982 when the search and  
 10 rescue teams first started, and I was on the team  
 11 for eight years then. And I rejoined in 2003, I  
 12 think. And like Winston, I've been involved for  
 13 pretty close to 23 years. I serve as a trainer  
 14 with the team at the present time.  
 15 MR. CHIPPETT:  
 16 Good morning, my name is Jeremy Chippett. I'm  
 17 assistant coordinator with the Red Indian Lake  
 18 Ground Search and Rescue team. I've been a  
 19 member of the team for about 12 years.  
 20  
 21 We draw our membership from three communities:  
 22 Buchans, Buchans Junction and Millertown. And  
 23 having the population of about 1,000 people,  
 24 everybody tries to get involved in any small town

**Page 11**

1 community events and tries to get as much as you  
 2 can with a small group of people.  
 3  
 4 I really enjoy helping out as a group of people,  
 5 both search and rescue and fire department, all  
 6 together, and it's just one of those things you  
 7 just try to help everybody any way you can,  
 8 right?  
 9 MR. BUDDEN:  
 10 And perhaps a handheld mic could be brought to  
 11 the other members of the team?  
 12 MR. SIMMONS:  
 13 Good morning, my name is Art Simmons. I've been  
 14 with the Search and Rescue for 25 years. I  
 15 joined after I retired and have really enjoyed  
 16 it. Have been hopefully a helpful part of the  
 17 team.  
 18 MR. CARTER:  
 19 My name is Barry Carter. I've been with the team  
 20 12 years. I joined the team after I retired. My  
 21 older brother was a founding member of the  
 22 Exploits Search and Rescue team. And I seen an  
 23 interest in it myself, being a national lifeguard  
 24 for 38 years, swim instructor, I felt I had

**Page 12**

1 something to add to the team. Thank you.  
 2  
 3 The other gentleman here is Junior Downey.  
 4 Junior has been on the team, I think, 14 years.  
 5 He had to step out for a few minutes.  
 6 MR. BUDDEN:  
 7 I understand the Sweetapples -- perhaps before we  
 8 return to the Search and Rescue team, the  
 9 Sweetapples, I'm not sure if they plan to do it  
 10 directly or through counsel, wish to give a brief  
 11 opening statement.  
 12 WILLIAMS, Q.C.:  
 13 Thank you, Mr. Commissioner and Mr. Budden. Just  
 14 a couple of matters. Before we start today's  
 15 proceedings and to have matters pertaining to the  
 16 Sweetapple search, first of all, on behalf of  
 17 Mr. and Mrs. Sweetapple who are here today and  
 18 who welcome the opportunity to come out, we want  
 19 to thank the Commission for providing that  
 20 opportunity.  
 21  
 22 When they learned of the hearings going ahead,  
 23 they certainly wanted to be a part of it, and to  
 24 find out the details of what goes into it and the

## Page 13

1 particulars obviously pertaining to their  
 2 individual circumstances, which we are all  
 3 obviously delighted to see had a successful  
 4 outcome, despite some scary moments during the  
 5 course of things, and immediately following.  
 6  
 7 In addition, Mr. Commissioner, as you know, I've  
 8 been looking after the interests of the Winters  
 9 family and have been updating them with respect  
 10 to progress about us.  
 11  
 12 Obviously, they are not able to attend all the  
 13 proceedings. They did attend the proceedings in  
 14 Makkovik and may be able to attend some  
 15 proceedings later. But they had been following  
 16 the progress of the inquiry, and I have been in  
 17 contact with them with respect to updates. And  
 18 in speaking with them last night, they ask that I  
 19 specifically express, on their behalf, their  
 20 thoughts and prayers go out to the families of  
 21 Mark Russell of Mary's Harbour and Joey Jenkins  
 22 of St. Lewis, the two Labrador fishermen who are  
 23 still missing since last Friday.  
 24

## Page 14

1 Having gone through such torturous emotions and  
 2 enduring such loss, the Winters family knows only  
 3 too well what their families are going through  
 4 and what they are thinking of. And they are  
 5 thinking of them at this time.  
 6  
 7 Obviously reading such stories brings back a  
 8 flood of emotions for the family, and they're  
 9 pleased that every resource appears to be applied  
 10 to this SAR mission, including both federal and  
 11 joint provincial resources.  
 12  
 13 The family noted and were pleased to see that the  
 14 provincial government had noted that every effort  
 15 was going into the search.  
 16  
 17 In a press release, the government stated that  
 18 since Saturday morning the Emergency Services  
 19 Division of the Department of Justice and Public  
 20 Safety has been engaged with the Canadian Coast  
 21 Guard officials, Joint Rescue Coordination  
 22 Centres, the Marine Rescue Sub-Centre, and others  
 23 involved in the search. DSD offered the  
 24 provincial government assistance in the form of

## Page 15

1 both rotary wing and fixed wing aircraft if and  
 2 when needed.  
 3  
 4 Multiple air and marine assets were tasked to  
 5 this search throughout the weekend. It was their  
 6 understanding that at different times there was a  
 7 combined six air assets involved. These included  
 8 military assets, a Cormorant, an Aurora, a  
 9 Griffin, and two Hercules and a Provincial  
 10 Airlines aircraft.  
 11  
 12 Additionally, there were three Canadian Coast  
 13 Guard ships, a factory freezer fishing vessel,  
 14 and civilian boats involved.  
 15  
 16 On Sunday evening, DSD was advised by the RCMP  
 17 that it would be taking over the search. DSD  
 18 engaged with the RCMP, Government Air Services,  
 19 and the volunteer group of Civil Air Search and  
 20 Rescue Association, and proposed a Government of  
 21 Newfoundland and Labrador water bomber be  
 22 utilized to assist in the search. And the  
 23 aircraft and its crew were deployed from Deer  
 24 Lake that morning.

## Page 16

1 In addition, we understand a private company on  
 2 contract to Newfoundland and Labrador Hydro was  
 3 also authorized to participate in the search.  
 4  
 5 Mr. Commissioner, it's important to note that the  
 6 Winters family thinks it is fantastic that such  
 7 efforts are being made. But ironically, it  
 8 highlights the sentiments that Natalie Jack  
 9 referenced in her remarks in Makkovik regarding  
 10 the inequity in terms of deployment of resources  
 11 as in the case of her son.  
 12  
 13 As she stated and said to me last night on the  
 14 phone, I guess it was a little too late -- "A  
 15 little too little and a little too late for  
 16 Burton." Thank you.  
 17 MR. BUDDEN:  
 18 Thank you, Mr. Williams. I would note that we  
 19 had a moment of silence in recognition of those  
 20 missing fishermen at the beginning of our session  
 21 in Corner Brook, and they have very much been in  
 22 our thoughts, I think, of all of us as this week  
 23 has unfolded.  
 24

## Page 17

1 Madam Clerk, if you can call up Exhibit 72,  
2 because I imagine Mr. Goobie and others will be  
3 referring to this quite a bit over the next few  
4 minutes.  
5  
6 How we plan to proceed this morning,  
7 Mr. Commissioner, is much like we have done with  
8 other searches. Mr. Goobie will take the lead as  
9 I understand he will reveal himself as the search  
10 manager in a moment. Will talk about the  
11 deployment of the Exploits and Red Indian Lake  
12 SAR teams to assist in the Sweetapple search.  
13  
14 He will walk us through that in some detail and  
15 we will then move on to talk about issues of  
16 information that the members of this team have to  
17 offer about the level of their commitment, the  
18 equipment they have, their training, their  
19 engagement with SAR and so forth.  
20  
21 Mr. Blackmore may supplement any of this at any  
22 time because he obviously has knowledge and  
23 expertise. And we will also hear from them, as  
24 we have from others, about other issues such as

## Page 18

1 fundraising, recruitment and anything else that  
2 anybody wishes to put to any member of the team.  
3  
4 So perhaps, Mr. Goobie, you could take the floor  
5 and begin walking us through this search. And as  
6 I've said in our meeting earlier the week and  
7 earlier this morning, don't be afraid to include  
8 a bit of detail. We want to know about the  
9 techniques employed, about the expertise shown.  
10 Why certain things were done as opposed to other  
11 things, and so on.  
12  
13 We're not looking for a five-minute version.  
14 Don't be afraid to walk us through in some  
15 detail.  
16 MR. GOOBIE:  
17 A. Thank you. Hi, Roger Goobie, Search Manager for  
18 Exploits Search and Rescue in conjunction with  
19 the Red Indian Search and Rescue team.  
20  
21 On July 27th, we got a call from the RCMP at 2240  
22 in the evening stating that we had a missing  
23 person, a berry picker in the Red Indian Lake  
24 area.

## Page 19

1 So at 2245, like I say, we had the call come in.  
2 We assembled at our building in Grand  
3 Falls-Windsor. Got our team and equipment  
4 assembled, and left that night to drive to the  
5 scene of the Round Harbour area near Red Indian  
6 Lake. We met up with the Red Indian Lake group  
7 at the junction of Millertown Junction there, and  
8 we proceeded into the scene.  
9  
10 So once we got into the scene area, the road  
11 going into the area, just to give you a picture  
12 of what we were going in with equipment-wise. We  
13 had people with their personal pickups. Our team  
14 at the time had a converted school bus, which we  
15 used for our command of operations. And we were  
16 heading up through some back roads that was quite  
17 grown in and alders overhead, and our school bus  
18 trying to plow through to get up to the scene.  
19 MR. BUDDEN:  
20 Q. Mr. Goobie, sorry to interrupt, but just a  
21 reminder that there are a number of pictures.  
22 Your report is excellent. It's quite  
23 comprehensive, and you've included pictures and  
24 maps. Don't be afraid to refer to those if you

## Page 20

1 think that would help us. Just give the page  
2 number to Madam Clerk and I'll call those up in a  
3 second.  
4 MR. GOOBIE:  
5 A. Thank you, Geoff. So once we got to the scene  
6 that night, it was roughly about 20 after 12:00  
7 past midnight when we got there. It was about 14  
8 degrees at night. A real humid night. So we  
9 assembled and the location that we were told that  
10 Mr. Sweetapple went missing from was on another  
11 side road from the road that we just went in.  
12  
13 So we looked at the situation and it was  
14 impossible for us to take our Command Centre any  
15 further than we were at the junction of this  
16 road. So then we had to take quads and pickups  
17 and get into the scene where Mr. Sweetapple's  
18 pickup was located.  
19  
20 So we assembled our group there that night, and  
21 we made a plan of a hasty search. And basically,  
22 what a hasty search is grab the most probable  
23 areas. Let's get out. Do a quick fan out. See  
24 what we can pick up. Any tracks. Evidence.

## Page 21

1 Just try the scene.  
2  
3 So just a short distance from where  
4 Mr. Sweetapple's truck was located on the road,  
5 there was a trail that was leading into the bog.  
6 So we looked at it and said it was probably the  
7 most probable area that he walked in through.  
8  
9 So we got into the bog that night and, first of  
10 all, you're in the darkness. You got a job to  
11 get a lay of the land of what it was. So we put  
12 up two parachute flares at night to try to  
13 illuminate the area, just to get a little bit of  
14 a picture of what type of terrain that we are  
15 dealing with.  
16  
17 So once we got those flares up, we were probably  
18 about 40 seconds worth of light we got to just  
19 give a quick overview of what we're dealing with  
20 terrain-wise.  
21 MR. BUDDEN:  
22 Q. Okay. Tell me what a parachute search is or a  
23 parachute flare is, for those of us that don't  
24 know?

## Page 22

1 MR. GOOBIE:  
2 A. Okay. So what happens with a parachute flare,  
3 the flare will go up in the air roughly about 300  
4 feet. It will burst out into a light source and  
5 a parachute comes on it. So it slowly will go  
6 back to ground level before it extinguishes.  
7  
8 So it just gives you that illumination, a quick  
9 illumination of the area that you're dealing  
10 with. Plus, it's also a sign that if someone is  
11 in the area, they can see that help is here.  
12 That gives a location of where we're at.  
13  
14 So once we got that, we seen that we were dealing  
15 with a fair size of the bog area. So we started  
16 out with groups, then, of hasty teams. And that  
17 night we had, I think it was, 18 members from  
18 Exploits Search and Rescue there and nine members  
19 from Red Indian Lake team there. So we split up  
20 in groups of three and four.  
21  
22 We did the perimeters of the bog. We had a  
23 couple of quads with some driving lamps on their  
24 quads that went around the bog area trying to

## Page 23

1 pick up to see if there is any sign of anyone.  
2  
3 Sometimes there's an indication that if someone  
4 was further down the bog, that they know there's  
5 someone there and it's a light source that if  
6 someone was really close by, that they could come  
7 to us as well.  
8  
9 So we proceeded at that for several hours that  
10 night with the initial search. There was some  
11 woods roads. There was some cabins in the area.  
12 Team members were all deployed to those areas,  
13 that high probabilities that someone could have  
14 got into a cabin. So they were all checked that  
15 night, and the local roads.  
16  
17 Roughly, at 2:20 in the evening, that morning,  
18 that we deployed the search team down to get a  
19 couple hours' rest before daylight come, which  
20 give us a lot more probability of locating  
21 someone with daylight hours.  
22  
23 So while the team was trying to get a few hours'  
24 rest, because you have to imagine that this

## Page 24

1 happened, this call came in at a little after  
2 10:00 in the night. So it was a Saturday that  
3 all the team members have been on the go all day  
4 that day. So here you are, well into close to  
5 the next morning that team members need some rest  
6 to be effective in searching.  
7  
8 So during the time that the team was down, made  
9 some phone calls. Sergeant Keith Frampton at  
10 that time was our search and rescue contact to  
11 the RCMP. And Keith Frampton served the same  
12 role as Sergeant Danny Williams does at the  
13 moment.  
14  
15 So I made some phone calls to Keith and I told  
16 him about the situation that we had there. And I  
17 said it was a good opportunity to -- it would be  
18 an asset to us in the morning if we could get  
19 some air support in.  
20  
21 So like I say, Keith went back and around three  
22 o'clock in the morning did get word back from  
23 JRCC out of Halifax that the Cormorant helicopter  
24 out of Gander would be joining our search around

## Page 25

1 6:30 in the morning.  
 2  
 3 So around 5:45 that morning our teams got up with  
 4 a little bit of broken rest and started in on the  
 5 search again. It was just getting daylight at  
 6 that time, so we wanted to get the first light  
 7 and get in on the bogs, the roads that we did  
 8 again that night.  
 9 MR. BUDDEN:  
 10 Q. Just perhaps a question or two. I'm going to do  
 11 this from time to time, I'm sorry. But this one  
 12 is, you said something about that first hasty  
 13 search looked at high probability areas.  
 14  
 15 And I guess the question is, how do you determine  
 16 what is a high probability area? And tell me a  
 17 little bit perhaps about how you get to that?  
 18 MR. GOOBIE:  
 19 A. The high probability areas, I guess, what first  
 20 we would do is look at the maps of the areas.  
 21 Look at what natural barriers are there. Whether  
 22 it be streams, bogs, woods, woods roads, cabins  
 23 that's in the area.  
 24

## Page 26

1 So you look at all those areas and some of it  
 2 comes from, I guess, experience over time that  
 3 where you found people in the past, how far away  
 4 you found people in the past, and you bring it  
 5 altogether. And you try to, okay, we got a few  
 6 hours now before we needs to get a little bit of  
 7 rest for our guys to be effective then in the  
 8 morning with daylight.  
 9  
 10 So we sent teams out that, okay, the bog area.  
 11 Number one, Mr. Sweetapple was going berry  
 12 picking for bake apples is what we were told. So  
 13 the high probability area that he would be in the  
 14 bog area that we were looking at that had bake  
 15 apples growing. So those areas.  
 16  
 17 We did a sweep of the roadway that was there  
 18 because if someone came off the bog and came out  
 19 through the woods, when they came to a woods  
 20 road, well, they might stay put on the woods  
 21 road. And it would be a high probability area  
 22 that you would pick someone up on the road.  
 23  
 24 So this is things that we take into account. And

## Page 27

1 we talk between us when we get there. What are  
 2 we looking for? Would it be a moose hunter?  
 3 Would it would be a berry picker? Would be a  
 4 child? So things like that comes into factors of  
 5 how you plan your search and how you plan your  
 6 hasty search.  
 7 MR. BUDDEN:  
 8 Q. Thank you. And on that same topic, are you  
 9 familiar with the concept or the term "lost  
 10 person behaviour"?  
 11 MR. GOOBIE:  
 12 A. Yeah. We take into fact, like I say, lost person  
 13 behaviour. Again, we look at the profiles of was  
 14 the person berry picking or a hunter or a hiker,  
 15 and you try to imagine what a person in that  
 16 scenario would do depending on what their plans  
 17 are for what they're doing.  
 18 MR. BUDDEN:  
 19 Q. I just want to quickly run through, as well, the  
 20 timelines just, I guess, to provide clarity. So  
 21 I see from your report that the contact to  
 22 Exploits Search and Rescue came in at 10:40 p.m.  
 23 on July 27th, which you said is a Saturday. And  
 24 the team assembled only 15 minutes later?

## Page 28

1 MR. GOOBIE:  
 2 A. That's correct, yes.  
 3 MR. BUDDEN:  
 4 Q. Okay. And how did that happen? Like when you  
 5 got -- you, I assume, got the call?  
 6 MR. GOOBIE:  
 7 A. I would get the initial call. We have a callout  
 8 system within our team. At that time, we were  
 9 just using a phone call. So what we had, we had  
 10 our team broke up into five different sub-teams.  
 11 So what you'd do, I would make five phone calls  
 12 to the captain of each of those teams and they  
 13 would, in turn, then, contact the rest of their  
 14 members on their teams by telephone.  
 15 MR. BUDDEN:  
 16 Q. Got you. So that sounds like 25 people and 18  
 17 were able to show up within 15 minutes?  
 18 MR. GOOBIE:  
 19 A. That's correct, yeah.  
 20 MR. BUDDEN:  
 21 Q. Okay. And perhaps Mr. Chippett could very  
 22 quickly jump in and talk about how the Red Indian  
 23 Lake went about it and what kind of time frame it  
 24 took to assemble your nine members of the team?

## Page 29

1 MR. CHIPPETT:

2 Q. Well, at the time, we received the call from RCMP  
3 after they contacted Roger. Being in Red Indian  
4 Lake area, our team, with the experience of the  
5 guys that's from Millertown and Buchans Junction  
6 and Buchans, we had a great idea of the area.  
7

8 So after the RCMP called Roger, Roger contacted  
9 us and said this is what we have. So we have the  
10 same thing. We have a list and we call out.  
11

12 As for being prepped for team, most of our gear  
13 is parked in a building ready to go on very short  
14 notice. The trailer is ready. You just hook up  
15 to it.  
16

17 When you return from a search, you make sure  
18 everything is ready to go for the next search.  
19 So when someone called, there's a list of this is  
20 what we need to have. A checklist to make sure  
21 this is in the truck. This is in the trailer.  
22

23 So after we receive a call it would be myself or  
24 the coordinator, my brother. As one is calling

## Page 30

1 the team members to determine who is home and who  
2 is not and who can return, someone will  
3 automatically be getting the truck and the  
4 trailer.  
5

6 So the timeline of getting mobile is very  
7 quickly, when everything is ready and put back by  
8 volunteers after every time we return from any  
9 search.  
10

11 So when Roger called us, when you get your  
12 members together, it's only a short time to get  
13 ready to go.  
14

14 MR. BUDDEN:

15 Q. Thank you, Mr. Chippett. I should say if other  
16 members have something to add at any particular  
17 time, don't hesitate to indicate. And you'll  
18 have a chance to speak as well.  
19

20 And at the end I'll be going around and asking  
21 anybody if they have anything else to add to what  
22 we've heard about the search. So you'll get your  
23 chance. No worries there.  
24

## Page 31

1 So, Dan, you were on the scene, I understand, if  
2 I'm following this, very early on the 28th at  
3 just 20 after midnight, and you continued  
4 searching that night until about what time?  
5

5 MR. GOOBIE:

6 A. It was around 2:20 we broke for a break with the  
7 team members.  
8

8 MR. BUDDEN:

9 Q. And how long a drive is it back to Grand  
10 Falls-Windsor?  
11

11 MR. GOOBIE:

12 A. Grand Falls-Windsor was roughly an hour and half  
13 drive. Now, that night we stayed on scene in our  
14 vehicles. Just laid back for a rest and for  
15 ready to go in the morning.  
16

16 MR. BUDDEN:

17 So you had a full day Saturday. You got the  
18 call. Assembled in 15 minutes. Drove.  
19 Searched. Slept in your cars. And by 5:45 you  
20 were out searching again?  
21

21 MR. GOOBIE:

22 A. That's correct, yes.  
23

23 MR. BUDDEN:

24 Q. Okay. Okay, carry on. That was very helpful.

## Page 32

1 And perhaps start with the next day.  
2

2 MR. GOOBIE:

3 A. Okay. So at 5:45, like I say, we put the teams  
4 back out again and did a quick hasty teams again,  
5 very similar to the scenarios that we done in the  
6 darkness the previous -- earlier in the morning  
7 when we got there that same day. So we got those  
8 cleared off.  
9

10 It was 6:18 in the morning. Rescue 912 was the  
11 call signals for the Cormorant that showed up  
12 on-site that morning. The morning was, when we  
13 started off first you had the, I guess you call  
14 it, the mist and the fog that morning first when  
15 we started off. Weather conditions weren't great  
16 because it cooled down a little bit after. It  
17 was humid first and then it cooled down a bit.  
18 So we got a bit of fog in the area.  
19

20 Like I say, Rescue 912 came on at 6:28 after they  
21 made their few passes back over. I was able to  
22 contact them on marine radio channel 16.  
23 Usually, we made agreement. We talked to the 103  
24 squadron in Gander from previous searches that we

## Page 33

1 had and it was made clear to us that the easiest  
 2 way to contact the Cormorant, when she's in the  
 3 area on a search, was to contact them on marine  
 4 radio 16, and they would give us a working  
 5 channel to go to, to be able to talk to them. So  
 6 we were given the channel 19 that day, that  
 7 morning, to be able to make contact with the  
 8 Cormorant in the air.  
 9  
 10 So basically, talked to the communications  
 11 officer onboard the aircraft, and let him know  
 12 what the scenario we had. Where Mr. Sweetapple's  
 13 truck was located. What he was doing. That he  
 14 was berry picking. And then they started their  
 15 grid pattern of searching with the aircraft.  
 16  
 17 We just gave them the scenario that we got there  
 18 and they determine their search patterns of how  
 19 they're going to search and the radius, I guess,  
 20 they search in.  
 21  
 22 So the Cormorant, like I say, while our ground  
 23 crew was out doing their hasty searches again  
 24 that morning, the Cormorant would be doing

## Page 34

1 flyovers and you hear her gone. You just hear  
 2 her barely in the background, and then you hear  
 3 her coming back again, as she was doing her grid  
 4 patterns back and forth.  
 5 MR. BUDDEN:  
 6 Q. Were any of your team or the Red Indian Lake team  
 7 spotters on that particular Cormorant?  
 8 MR. GOOBIE:  
 9 A. No, negative on that one. Just their own air  
 10 flight crew was aboard.  
 11  
 12 So that continued up until about 8:15 in the  
 13 morning. Rescue 912 contacted me via channel 19  
 14 and said they had to head back to Deer Lake to  
 15 refuel. They had no sign of the missing person  
 16 at that time, and they would head into Deer Lake  
 17 and let us know and update whether they had more  
 18 airtime or whether they were going back to  
 19 Gander.  
 20  
 21 So our teams, like I say, continued on that  
 22 morning, trying to cover off all good probability  
 23 areas. So at that point our search teams were  
 24 starting to get hungry. So we had to wait until

## Page 35

1 food arrived. We had some meals brought up from  
 2 Grand Falls-Windsor to feed the group. So  
 3 basically, around 11:50 that morning, we got the  
 4 searchers all assembled back to the Command  
 5 Centre and give everyone a little hour break, and  
 6 got everyone back on the ground again.  
 7 MR. BUDDEN:  
 8 Q. Just to fill in that detail. You indicated the  
 9 food arrived. Was the food delivered  
 10 commercially? Was it delivered by volunteers?  
 11 MR. GOOBIE:  
 12 A. That was delivered by volunteers, Geoff.  
 13 MR. BUDDEN:  
 14 Q. Oh, okay. Who were those volunteers?  
 15 MR. GOOBIE:  
 16 A. That was Barry Carter and Brandon Sheppard at  
 17 that time came with meals for us.  
 18 MR. BUDDEN:  
 19 Q. Okay. Were they part of the Exploits team as  
 20 well?  
 21 MR. GOOBIE:  
 22 A. Yes, part of the team as well.  
 23 MR. BUDDEN:  
 24 Q. Okay. Thank you.

## Page 36

1 MR. GOOBIE:  
 2 A. So just to back up just a little bit there. I  
 3 had said at 8:15 that the Cormorant went back to  
 4 Deer Lake. I just overlooked that we did get  
 5 word back. At 10:05 they came back on scene with  
 6 us and continued on with their search pattern  
 7 that morning.  
 8  
 9 Like I say, we broke for lunch. The Cormorant  
 10 was still in the air searching. And about  
 11 quarter after 12:00 that morning, Rescue 912  
 12 advised that they completed their initial search  
 13 of the area and they were returning to Gander.  
 14  
 15 While this was going on with the Cormorant, with  
 16 the weather conditions and that there, the  
 17 weather was clearing, and Keith Frampton from the  
 18 RCMP had made arrangements for Universal  
 19 Helicopters to end up on scene with us to provide  
 20 air support. And with 103 -- or with Universal  
 21 Helicopters our search teams members would go up  
 22 with Universal Helicopters as spotters.  
 23  
 24 So the search: Basically, about 12:37 that

**Page 37**

1 midday on, that was a Sunday morning, our teams  
2 went back in the woods again. What we did then,  
3 we took different areas. We split up the teams.  
4 We looked at what was done in the hasty searches  
5 in the morning and talked to each team that came  
6 back of what they seen. If they seen any clues,  
7 and things as simple as gum wrappers or a bar  
8 wrapper or drink can sometimes can give you a  
9 clue that someone was there.

10  
11 So when the teams came back we had no indication  
12 that anything was found. So we started in. We  
13 split the teams up in groups again. And we used  
14 to take some from Red Indian Lake team and some  
15 from our own team, because the Red Indian Lake  
16 team are more familiar with the area, obviously  
17 in the Red Indian Lake area, so we wanted to have  
18 some of their local knowledge with our team  
19 members. And we broke up in groups and we  
20 searched the bog areas. We searched further down  
21 the bogs. There was a pond further down. We  
22 went down to the pond.

23  
24 And at the same time, the RCMP dog handler came

**Page 38**

1 on scene. It was Glen Brown and his dog came to  
2 help out with the search.

3  
4 So he took some sweeps around the bog area trying  
5 to pick up any scent of where the dog was. And  
6 the way the RCMP dogs works, they're not a  
7 tracking dog like you see on TV. Okay, here's a  
8 piece of clothing that belongs to the person.  
9 The dogs sniffs it and follows that scent.

10  
11 The way the RCMP dogs work, they go by air scent.  
12 So when the dog goes in and, for instance, he  
13 smells bog area or forest area, okay, there's a  
14 smell there that doesn't match the rest of his  
15 surroundings. And that's how the RCMP dogs work.  
16 They follow by air scent.

17  
18 So Glen Brown, with the help of his dog and one  
19 of our team members did, he did basically a hasty  
20 search up through the country trying to pick up a  
21 track, a scent that was different from the  
22 surrounding areas.

23 MR. BUDDEN:

24 Q. I should have asked this earlier, but what was

**Page 39**

1 your team's understanding at this time as to when  
2 Mr. Sweetapple had gone missing? Did that  
3 understanding later change, and how might that  
4 have affected your search strategy?

5 MR. GOOBIE:

6 A. Initial information that we were given was that  
7 Mr. Sweetapple went missing on the Saturday. And  
8 we looked at the probability, okay, the timeline.  
9 Okay, it got dark at that time. Was probably  
10 around 9 p.m., I would think, in July. 9:30  
11 area.

12  
13 So when we got there at midnight we were thinking  
14 he only had a couple of hours onto us. But  
15 throughout the search, when further investigation  
16 was done, it came back to us that Mr. Sweetapple  
17 went missing on the Friday evening.

18  
19 So basically, when we got to the scene we were  
20 over 24 hours behind him. So it changes your  
21 thinking then, and that didn't get brought to our  
22 attention, to my best recollection, until it was  
23 probably the Thursday meeting that we had with  
24 the RCMP.

**Page 40**

1 MR. BUDDEN:

2 Q. Thursday. Five or six days later?

3 MR. GOOBIE:

4 A. Correct. Yes.

5 MR. BUDDEN:

6 Q. We'll get to that in time, but thank you for that  
7 clarification. And I assume if the moment you  
8 arrived you were aware of that, in fact,  
9 Mr. Sweetapple was missing 24-plus hours, rather  
10 than just a few hours, how might that have  
11 impacted your strategy, if at all?

12 MR. GOOBIE:

13 A. It certainly would put your range out for what a  
14 person can travel. Would certainly put your  
15 probability areas further out. And that's the  
16 challenges that we as searchers sometimes when we  
17 get to scenes is trying to get the right  
18 information. And sometimes we have to do some  
19 investigation on our own as volunteers.

20  
21 And when you got a group of people that comes  
22 together, we find that -- we use a lot of  
23 different resources now that wasn't available  
24 back in 2013.

## Page 41

1 You know, you got the Facebook and stuff like  
 2 that now. Well, you got 50 members, you got a  
 3 lot of different contacts and friend trails. If  
 4 you're trying to find someone missing, that  
 5 someone might have that little piece of the  
 6 puzzle that gives you little indication of the  
 7 timelines.  
 8  
 9 So technology have certainly changed, but that's  
 10 the biggest issue. Lots of times we find is, do  
 11 we have the correct information passed to us to  
 12 plan our search? So it becomes a challenge.  
 13  
 14 So at about 12:40 that afternoon we sent four of  
 15 our team members back to Mr. Sweetapple's cabin,  
 16 which to my understanding I wasn't at the cabin  
 17 myself, but I think it was probably about ten  
 18 kilometres, roughly, from the area maybe. And  
 19 that's just an estimate.  
 20  
 21 Sent four team members back to the cabin, to  
 22 check around Mr. Sweetapple's cabin, just to see  
 23 what clues we could find, if anything different.  
 24 Information we could find that would help in

## Page 42

1 trying to plan our forward-looking search.  
 2  
 3 The boys spent about two hours out around that  
 4 area. They came back to the Command Post and  
 5 reported that at the cabin they could see that  
 6 meds were left on the table. Food was dropped on  
 7 the floor, but not put away. But the shed was  
 8 left unlocked, but the cabin itself was locked.  
 9  
 10 And a challenge that we had at this particular --  
 11 as I alluded to earlier, our Command Post was set  
 12 up on the roadway up there, and we were off on a  
 13 side road which was roughly probably two to three  
 14 kilometres in. And because of the terrain there,  
 15 we had no cell service to talk back and forth to  
 16 our Command Centre. Our radio communications at  
 17 the time didn't allow us to talk back to the  
 18 Command Centre. So basically, what I had set up  
 19 in the Command Centre was our recorder basically  
 20 keeping the information.  
 21  
 22 I was in on the site itself so that I could get  
 23 communication with the search team out there with  
 24 the helicopter. And then I would have to drive

## Page 43

1 back to the Command Centre on the quad and update  
 2 the timelines as to our recorder, so that we keep  
 3 a log of what was happening and what people were  
 4 doing.  
 5  
 6 So it was a little difficult because you're  
 7 outside. You're trying to coordinate a search,  
 8 and you're trying to jot your notes down of  
 9 timelines. Because of no communication, it adds  
 10 another challenge to your search.  
 11  
 12 So at 1445, like I say, the Universal Helicopters  
 13 came on scene. We put up three spotters in  
 14 Universal Helicopters. We tried again to have at  
 15 least one of the Buchans team members -- and I  
 16 say Buchans, Red Indian Lake team members, in the  
 17 helicopter because of their local knowledge.  
 18  
 19 And so, anyway, at 1445, Universal Helicopters  
 20 had to head back to Deer Lake to refuel and will  
 21 return to the scene again.  
 22  
 23 1530, word came back from the RCMP dog handler.  
 24 He had completed the search of the bog area and

## Page 44

1 50 feet into the woods surrounding the bog area.  
 2 The dog handler proceeded to check the area from  
 3 the pickup location to the main road. All with  
 4 negative results.  
 5  
 6 1546, that afternoon, Universal Helicopters were  
 7 back on site again with three SAR spotters on  
 8 board, and resuming the aerial search.  
 9  
 10 Again, all the while this is going on, the  
 11 members are still on the ground, still searching  
 12 with the assistance of air support above them.  
 13  
 14 1700 hours, helicopter landed. No sign or any  
 15 clue spotted and they're returning back to  
 16 Gander.  
 17 WILLIAMS, Q.C.:  
 18 Q. Mr. Goobie, if I could just ask, not to interrupt  
 19 you, what point was it you indicated that you  
 20 learned that Mr. Sweetapple had been missing  
 21 since Friday night? At what point during the  
 22 course of that Sunday did you find that out?  
 23 MR. GOOBIE:  
 24 A. I didn't find that information out until the

## Page 45

1 following Thursday when I had the meeting with  
 2 the RCMP.  
 3 WILLIAMS, Q.C.:  
 4 Q. Okay. Thank you. Okay. Thank you.  
 5 MR. GOOBIE:  
 6 A. So at 1715, by this time our members were getting  
 7 pretty --  
 8 MR. BUDDEN:  
 9 Q. Sorry, just to make sure that, because you didn't  
 10 have your mic on. Sorry to interrupt. But your  
 11 answer was to Mr. Williams's question was, you  
 12 didn't find that information out until Thursday  
 13 or words to that effect. Am I correct?  
 14 MR. GOOBIE:  
 15 A. That is correct, yes.  
 16 MR. BUDDEN:  
 17 Q. Thank you.  
 18 MR. GOOBIE:  
 19 A. So at 1715 that evening, like I say, our members  
 20 were getting pretty exhausted at that time. Lack  
 21 of sleep and been on the go now for well over 24  
 22 hours. So it was deemed that the members would  
 23 get back to Command Post and we start packing up  
 24 and heading back to our SAR building in Grand

## Page 46

1 Falls-Windsor.  
 2  
 3 At 1930 that evening, we were back to Grand  
 4 Falls-Windsor at our SAR building. It was Sunday  
 5 evening. So once we get back to our building, as  
 6 Jeremy alluded to earlier, you just don't back  
 7 your equipment into the building and say I'm done  
 8 for the night and we go home.  
 9  
 10 Whenever we back our equipment into our building,  
 11 we don't know if it's going to be ten minutes'  
 12 time or ten days' time before that equipment goes  
 13 out again.  
 14  
 15 So when we get back to our building, the  
 16 equipment is always put back in a ready state,  
 17 that we're ready to roll whenever the call arises  
 18 again.  
 19  
 20 So that night when we got back, everything had to  
 21 be cleaned up. Fueled up. Supplies put back in.  
 22 Everything ready to go again for the search. So  
 23 it was 2200 hours before we left the building to  
 24 head home for some rest again that night.

## Page 47

1 And as I alluded to earlier, like I say, the  
 2 initial search was 18 members of Exploits SAR and  
 3 9 members of Red Indian SAR responded.  
 4  
 5 On July 29th, I wasn't on scene myself due to  
 6 work commitments, that I wasn't able to attend.  
 7 I can pass it over. I can allude to the notes  
 8 that was given to me, or I can pass it over to  
 9 one of the members that was on scene that Monday  
 10 morning.  
 11 MR. BUDDEN:  
 12 Q. Whatever you think most effective, Mr. Goobie.  
 13 I'm in your hands on that.  
 14 MR. GOOBIE:  
 15 A. I can go ahead. Like I say, I got a pretty good  
 16 understanding of what went on and the  
 17 communication was still back to me at work. But  
 18 like I say, if there's any questions I can pass  
 19 on to some of the members that was on scene that  
 20 day too as well.  
 21 MR. BUDDEN:  
 22 Q. Sure. Just, this might be a good a place, I  
 23 should have done it earlier. Of the members here  
 24 today, who were involved in the searches and

## Page 48

1 perhaps on which days? Could you tell us?  
 2 MR. GOOBIE:  
 3 A. The initial search, everybody present here today  
 4 belonged to Exploits Search and Rescue and Red  
 5 Indian Lake was present on the initial search for  
 6 Mr. Sweetapple.  
 7 MR. CLARKE:  
 8 A. Not me, Rog.  
 9 MR. GOOBIE:  
 10 A. Okay, you weren't. Okay. Okay, I'm sorry,  
 11 Winston wasn't there the first initial search.  
 12 MR. BUDDEN:  
 13 Q. Okay. And the subsequent day, you said six  
 14 members of your team showed up, can you tell us  
 15 who those persons were?  
 16 MR. GOOBIE:  
 17 A. I can, yeah. The members from our Exploits  
 18 Search and Rescue team that was on July 29th, was  
 19 Barry Carter, Junior Downey, David Miller, and  
 20 Gerald Collins from our team. And Jeremy may be  
 21 able to allude to his members that was on scene  
 22 from Red Indian. I don't have that list.  
 23 MR. CHIPPETT:  
 24 A. Yeah, I don't have the list in front of me. I

## Page 49

1 was there that Monday. I returned to the scene  
 2 that Monday. Roger was working. Our team, I  
 3 think we had five members. I believe it was five  
 4 members.  
 5 MR. GOOBIE:  
 6 A. I think it was five to six members.  
 7 MR. CHIPPETT:  
 8 A. Five or six members. I myself was there that  
 9 Monday when we continued the search the day. It  
 10 was the same thing. At that point then we done a  
 11 foot to foot trying to determine, to cover every  
 12 square inch. Instead of doing a grid at that  
 13 point, we done a foot to foot to see any detail  
 14 we missed initially.  
 15  
 16 But we were there all day then. The dog handler  
 17 was there. We had our Argo up with us, and we're  
 18 just trying to cover as much ground as you  
 19 possibly can. I mean, with a helicopter covering  
 20 ground. We were just trying to see if we found  
 21 if we missed any details. But we were there all  
 22 day, then, again Monday.  
 23 RALPH, Q.C.:  
 24 Q. Mr. Budden, if I could just intervene for a

## Page 50

1 second. Mr. Goobie, so the document you're  
 2 referring to now, is that what you call it is a  
 3 log book? Is that what you call it?  
 4 MR. GOOBIE:  
 5 A. That's correct, yeah. It's our log book.  
 6 RALPH, Q.C.:  
 7 Q. And how lengthy is that log book for this  
 8 particular search? How many pages?  
 9 MR. GOOBIE:  
 10 A. That particular search, it's roughly about eight  
 11 pages.  
 12 RALPH, Q.C.:  
 13 Q. Okay. Thank you.  
 14 MR. BUDDEN:  
 15 Q. Okay. Good, Mr. Goobie. Perhaps you can  
 16 continue. Even though you weren't search manager  
 17 that day, you do have the notes. And if there's  
 18 any points of clarification are required, you can  
 19 either turn to the other member or it could come  
 20 up later. Thank you.  
 21 MR. GOOBIE:  
 22 A. Thank you. So at 6:40 in the morning, on July  
 23 29th, again, Exploits Search and Rescue headed  
 24 out to the scene to resume the search for

## Page 51

1 Mr. Ches Sweetapple. The group again was to meet  
 2 up with members from the Red Indian Lake SAR team  
 3 at the Round Harbour area again to resume the  
 4 search.  
 5  
 6 At 8:47 in the morning the team arrived on-site  
 7 and along with the dog handler from the RCMP  
 8 searched further up the bog.  
 9  
 10 At 10:15 that morning the team noticed a track.  
 11 From my understanding being told, it was up  
 12 towards a pond. The dog handler searched that  
 13 area intensely, but came up with negative results  
 14 of any track that he could follow with the dog.  
 15  
 16 At 12 o'clock -- Jeremy can clarify a little bit  
 17 of what went on. But again, was 12 o'clock, the  
 18 team broke. Came back to the Command Centre to  
 19 have lunch.  
 20  
 21 At 12:45, the members resumed the search of the  
 22 bog area.  
 23  
 24 At 13:45, they completed a nine-person grid

## Page 52

1 search of the bog area.  
 2 MR. BUDDEN:  
 3 Q. Perhaps that's something new, this grid search.  
 4 Perhaps you or Mr. Chippett, Jeremy, if he was  
 5 there, can tell us a bit about how that was done.  
 6 Because that's interesting. That's a new  
 7 technique that we haven't heard yet in this  
 8 search. So perhaps you could inform us on that?  
 9 MR. GOOBIE:  
 10 A. I can pass it over to Jeremy on that.  
 11 MR. CHIPPETT:  
 12 A. Well, at the time, then, you take the members and  
 13 you put them almost arm to arm, so I could see  
 14 everything between whoever is the member next to  
 15 me. So you make sure you cover every square inch  
 16 of the ground you're looking at.  
 17  
 18 So if you take the members and stretch them out  
 19 side by side and you walk in a set distance, then  
 20 you cross over and you come back. So you'd cover  
 21 every square foot.  
 22  
 23 So at some point there's a set of eyes looking at  
 24 the ground to determine if you missed any type of

## Page 53

1 evidence whatsoever. So that way you would have  
 2 a greater understanding of every square inch of  
 3 the area you're looking, right.  
 4  
 5 So it would be a foot to foot. You wouldn't be  
 6 touching each other, but you would be within  
 7 speaking distance. So I could see there and  
 8 Cameron could see alongside of me, so you'd cover  
 9 every inch, right.  
 10 MR. BUDDEN:  
 11 Q. You might be 20 feet apart? More than that?  
 12 Less than that?  
 13 MR. CHIPPETT:  
 14 A. Well, depending on the terrain you're in. If  
 15 you're in an open area, you would be farther. If  
 16 you're in the heavy woods, which is a lot of it  
 17 up there, you would be closer, so you could see  
 18 if there's a hole, if there's a hump. There  
 19 could be something between you and the gentleman  
 20 next to you that you can't see. So depending on  
 21 the terrain, you'd have to adjust the distance  
 22 between the members, right?  
 23 MR. BUDDEN:  
 24 Q. Got you. And how many -- what kind of area was

## Page 54

1 covered in this fashion? If you're able to speak  
 2 in terms of square kilometres or a square  
 3 kilometre or something, just to give us a sense  
 4 of it?  
 5 MR. CHIPPETT:  
 6 A. There was a distance of heavy wood between the  
 7 road where Mr. Sweetapple's truck was parked and  
 8 then the bog. And so then we continued past the  
 9 bog for, I don't know the exact distance, maybe a  
 10 kilometre or so, and then you come back and you  
 11 sweep side to side from that, right?  
 12 MR. BUDDEN:  
 13 Q. So perhaps a couple of square kilometres? A  
 14 little more? A little less?  
 15 MR. CHIPPETT:  
 16 A. Yes, perhaps. And perhaps a bit more. Yeah.  
 17 MR. BUDDEN:  
 18 Q. Okay. And I should have asked again. The  
 19 weather. We heard about the weather at the  
 20 morning of the 28th when the searchers first  
 21 arrived.  
 22  
 23 What kind of weather conditions were you guys  
 24 dealing with on the 28th and the 29th?

## Page 55

1 MR. CHIPPETT:  
 2 A. Well, Monday was a nice day, actually. There was  
 3 a high ceiling. Monday was a clear day. It was  
 4 probably the better of the two days before prior  
 5 to that.  
 6 MR. BUDDEN:  
 7 Q. I interrupted you when you were doing this  
 8 search, which was at 1345. If you wish to pick  
 9 it up from there, that would be great.  
 10 MR. GOOBIE:  
 11 A. So at 1600 hours, there was a hasty team went  
 12 back, along with the RCMP, to search  
 13 Mr. Sweetapple's cabin. It was reported that  
 14 Mr. Sweetapple had a sum of money with him that I  
 15 understand he was doing some groundwork or  
 16 something maybe by his cabin area. So that  
 17 report came in. So the RCMP, along with a couple  
 18 of our team members, did go back to the cabin.  
 19  
 20 I wasn't given any information what was found, so  
 21 I can't comment on that. But just was a note  
 22 made in the search report.  
 23  
 24 At 1755 that evening, the team was heading back

## Page 56

1 to Grand Falls-Windsor. So roughly 6 o'clock in  
 2 the evening.  
 3  
 4 1925, the team arrived back in Grand  
 5 Falls-Windsor. And 2030 that evening, everything  
 6 was all cleaned up, stocked replenished, and the  
 7 team ready to respond again and heading home.  
 8 MR. BUDDEN:  
 9 Q. So that was, if my math is correct, a 13-hour and  
 10 50-minute day, from 6:40 a.m. when the team  
 11 headed out to the scene, until 2030, 8:30 p.m.  
 12 when the team would have finished cleaning up.  
 13 So is my math correct on that?  
 14 MR. GOOBIE:  
 15 A. That would be correct, yes.  
 16 MR. BUDDEN:  
 17 Q. Okay. Thank you.  
 18 MR. GOOBIE:  
 19 A. So at that point that evening when everybody was  
 20 back I did get word from the RCMP that it was  
 21 decided to stand down. They were doing some more  
 22 investigation the next day, and to wait further  
 23 investigation from their part.  
 24

Page 57

1 July the 30th, again, which would be a Tuesday,  
 2 still no word back of any resuming of the search.  
 3 And the same again for July the 31st. It's the  
 4 same scenario. The team was still stood down,  
 5 awaiting instructions from the RCMP.  
 6  
 7 August the 1st, at 1330, which is 1:30 in the  
 8 afternoon, I was asked to meet at the RCMP  
 9 detachment to discuss further progress with  
 10 Mr. Sweetapple's search. So all notes of the  
 11 search were discussed.  
 12  
 13 We looked at the maps. Looked at the areas that  
 14 was searched, and a plan was put back in place to  
 15 resume the search for Mr. Sweetapple again the  
 16 next morning, which would have been a Friday  
 17 morning.  
 18  
 19 Again, the information came up about the  
 20 difference in the time scenario of when,  
 21 actually, Mr. Sweetapple went missing. So it was  
 22 a 24-hour time span there different than the  
 23 information that we were initially given.  
 24

Page 58

1 So on August the 2nd --  
 2 MR. BUDDEN:  
 3 Q. Just before we move on to the next part of the  
 4 search. Sorry to interrupt you mid-sentence, but  
 5 a couple of points of clarification or  
 6 explanation.  
 7  
 8 Again, it was at that meeting, in the afternoon  
 9 of August 1st, that you as team coordinator found  
 10 out for the first time that Mr. Sweetapple had,  
 11 as you said, a 24-hour head start on you guys?  
 12 MR. GOOBIE:  
 13 A. That's correct, yes.  
 14 MR. BUDDEN:  
 15 Q. Okay. And also this might be a good time as any  
 16 to explain, as we've heard in previous searches,  
 17 the relationship between the team and the RCMP.  
 18 Like you speak of being stood down.  
 19  
 20 I guess put it this way, does the team just go on  
 21 its own searches? Are you dispatched? Who makes  
 22 the determination as to whether to engage the  
 23 team? Just tell me briefly a little bit about  
 24 that?

Page 59

1 MR. GOOBIE:  
 2 A. So all search teams in Newfoundland and Labrador  
 3 come under Department of Justice, which, in turn,  
 4 is governed by which police force is in your  
 5 area. So for us it's the RCMP. So our team  
 6 cannot go out on our own to do a search. In  
 7 order for us to be dispatched, it has to come  
 8 through the RCMP. Once we are dispatched from  
 9 the RCMP, then our insurance policies kick in.  
 10  
 11 So if we went out on our own and one of our team  
 12 members happened to get hurt or injured or  
 13 whatever, we're not covered insurance-wise. So  
 14 our team do not go unless we're dispatched  
 15 through the police force.  
 16 MR. BUDDEN:  
 17 Q. Thank you. And having got past my interruption,  
 18 perhaps you could resume where you were when I  
 19 broke you off. And you were talking about August  
 20 2nd.  
 21 MR. GOOBIE:  
 22 A. So after our meeting on August the 1st, it was  
 23 decided -- August 2nd was a Friday morning, that  
 24 we were going to resume the search for

Page 60

1 Mr. Sweetapple. And at 7 o'clock that morning,  
 2 we had four members from our Exploits Search and  
 3 Rescue team head to the site. And Jeremy may be  
 4 able to allude to how many members he had there  
 5 from the Red Indian Lake team.  
 6 MR. CHIPPETT:  
 7 A. Yeah. There was five members from our team that  
 8 day. Unfortunately, I wasn't there. I had work  
 9 commitments. But then, unfortunately, all five  
 10 members that were on that day both are either  
 11 working or, unfortunately, some of them are no  
 12 longer with us, so. But we had five members  
 13 there that day. That Friday.  
 14 MR. GOOBIE:  
 15 A. So I'll go through the transcript of the notes  
 16 that was taken by the recorder that day there. I  
 17 do have one of the members that was in the  
 18 helicopter, a spotter in the helicopter that day.  
 19 So we'll get some input from him that day as well  
 20 there.  
 21  
 22 So at 8:58 that morning, the team arrives on site  
 23 to resume the ground and the aerial search. So  
 24 Universal Helicopters, again, was availed of that

## Page 61

1 morning to help and assist the ground teams with  
 2 an aerial overview.  
 3  
 4 So like I say, the teams assembled. The ground  
 5 crews started out on their search down through  
 6 the area again, going further down the bog  
 7 systems that was there.  
 8  
 9 We put two spotters up in the helicopter that  
 10 day. Winston Clarke was one. And Jeremy, I  
 11 don't know if you can... I got a mic. Or,  
 12 sorry, Kevin.  
 13 MR. CHIPPETT:  
 14 A. Kevin Green.  
 15 MR. GOOBIE:  
 16 A. Kevin Breen?  
 17 MR. CHIPPETT:  
 18 A. Green.  
 19 MR. GOOBIE:  
 20 A. Green.  
 21 MR. CHIPPETT:  
 22 A. Kevin Green.  
 23 MR. GOOBIE:  
 24 A. Kevin Green was the other member from Red Indian

## Page 62

1 Search and Rescue that was aboard the helicopter.  
 2 So at approximately 10:45 in the morning,  
 3 Mr. Sweetapple was spotted from the air in the  
 4 bog area.  
 5  
 6 A chopper landed. Medical assistance was  
 7 rendered. It was determined at that time that  
 8 Mr. Sweetapple was critical.  
 9  
 10 My understanding was, the helicopter left our two  
 11 search members there. Went back while the boys  
 12 were rendering first aid to Mr. Sweetapple. The  
 13 helicopter went back to the Command Post and  
 14 picked up an RCMP member that was on scene. I  
 15 think it was Corporal Mike Fewer at that time was  
 16 the member that was on scene.  
 17  
 18 He was transported back to the scene where  
 19 Mr. Sweetapple was. By this time, the guys had  
 20 Mr. Sweetapple packaged, ready to put aboard the  
 21 helicopter. The RCMP member, along with  
 22 Mr. Sweetapple, were transported to Corner Brook  
 23 hospital, which was the nearest and closest  
 24 hospital facility.

## Page 63

1 As alluded to, Corporal Mike Fewer travelled with  
 2 Mr. Sweetapple. The two SAR spotters that was  
 3 aboard the helicopter, due to weight  
 4 restrictions, they were left on scene at the  
 5 location site.  
 6  
 7 And after Mr. Sweetapple was in Corner Brook and  
 8 the helicopter refueled, Universal Helicopters  
 9 did come back to the site and pick up our two SAR  
 10 spotters and bring them back to the Command Post.  
 11  
 12 So I was notified at 11:20 that morning, that all  
 13 this have happened. That Mr. Sweetapple was en  
 14 route to Corner Brook hospital, and all the team  
 15 members were heading back to the command, waiting  
 16 for the return of the two SAR spotters.  
 17  
 18 At 1300 hours, the two SAR spotters were picked  
 19 up by Universal Helicopters and transported back  
 20 to the Command Post.  
 21  
 22 At 1330 hours, the team left the search area.  
 23 SAR members were able to drive Mr. Sweetapple's  
 24 truck back to the RCMP detachment in Grand

## Page 64

1 Falls-Windsor.  
 2  
 3 And at 1530 hours, the team was back at the SAR  
 4 building. And 1800 hours, all equipment was  
 5 cleaned up and the vehicles were all refueled.  
 6  
 7 And just as a reference point, the lat/long of  
 8 where Mr. Sweetapple was located was North  
 9 48°35'24.3. And West 56°59'30.6.  
 10  
 11 And I'd like to pass it over to Winston Clarke.  
 12 He was one of the SAR spotters. And we'll  
 13 certainly get his overview of that morning of the  
 14 event.  
 15 MR. BUDDEN:  
 16 Q. Sounds good. Mr. Clarke?  
 17 MR. CLARKE:  
 18 A. Thank you. Yeah, I was one of the spotters on  
 19 Universal Helicopters that morning. As we did a  
 20 grid search of the lakeside, we did that and we  
 21 didn't see anyone had come out on the shores of  
 22 the lake. Anyway, just to cover that area, we  
 23 flew into some bog areas. And as we are flying  
 24 over I spotted what turned out to be Mr.

## Page 65

1 Sweetapple lying on a bog with a blue jacket on  
2 and an orange hood.  
3  
4 As we were coming in, I seen Mr. Sweetapple's  
5 jacket move, but I was just thinking it was just  
6 the wind from the blades. But as I got down and  
7 ran over to Mr. Sweetapple, I could see that he  
8 was alive, but barely.  
9  
10 So we looked at Mr. Sweetapple. We got him  
11 adjusted. We talked to him and so on, and told  
12 him to help us come in. And at that time the  
13 chopper flew back to the Command Post, picked up  
14 the RCMP officer and returned to the location.  
15  
16 Mr. Sweetapple was put on a stretcher and loaded  
17 into the chopper, and they went to Corner Brook.  
18 We just stayed on the ground and waited for the  
19 chopper to come back and pick us up about two or  
20 three hours later.  
21  
22 On the way back to the Command Centre in the  
23 chopper, we happened to see a backpack on the  
24 ground as well, on the bog. So we went down and

## Page 66

1 picked up the backpack. That turned out to be  
2 Mr. Sweetapple's backpack. So then we flew back  
3 to the Command Post and went from there.  
4 MR. BUDDEN:  
5 Q. We see the coordinates here. For those of us who  
6 aren't able to, which I suspect is pretty much  
7 all of us, to look at those and see where things  
8 lie in relation to where Mr. Sweetapple was  
9 believed to have been lost from, what kind of  
10 distance are we talking about?  
11 MR. SNOW:  
12 A. Geoff, you can bring it on page 17 in the report.  
13 MR. BUDDEN:  
14 Q. Perfect.  
15 MR. SNOW:  
16 A. There is an illustration of point last seen and  
17 where Mr. Sweetapple was found.  
18 MR. BUDDEN:  
19 Q. Thank you, Cameron. That would be down the lower  
20 left-hand portion, I believe. And what kind of  
21 distance are we talking about, say, in  
22 kilometres?  
23 MR. GOOBIE:  
24 A. That was roughly about three and a half

## Page 67

1 kilometres from his truck to where Mr. Sweetapple  
2 was found.  
3 MR. BUDDEN:  
4 Q. Okay. Thank you. Mr. Goobie, you've got several  
5 pages of notes. Sort of, I guess, an analysis of  
6 the search. And you have a number of pictures  
7 and maps and so forth, as Mr. Snow, Cameron Snow,  
8 just pointed out.  
9  
10 Could you perhaps just work us through the rest  
11 of your search materials and then your notes, and  
12 then perhaps we will take a break and then we'll  
13 have questions. But the analysis is informative.  
14 So if you could walk us through that and the  
15 pictures and actually then I'll ask if anybody  
16 else wishes to comment.  
17 MR. GOOBIE:  
18 A. So if we could go to Appendix B, that's on page  
19 18. Just give you a little bit of overview. In  
20 this picture, this was early morning on the  
21 Sunday morning. As the Cormorant was coming in  
22 their grid search --  
23 MR. BUDDEN:  
24 Q. July 28th.

## Page 68

1 MR. GOOBIE:  
2 A. So just to give you an overview, this is one of  
3 our team members just looking on the bog area.  
4 And as you could see in the top part is the  
5 Cormorant as the team was searching. It just  
6 gives you an idea.  
7  
8 You can see, there's a bit of, I would call it a  
9 bit of a mausey morning. The sky is not bright  
10 by no means. As you get up, we'll say, the  
11 ceiling we call it, of what your visibility. You  
12 can see the sky is still white there or gray of  
13 fog there. So the visibility early morning is  
14 not great.  
15  
16 As you scroll down to page 19, so at the time  
17 this was our Command Post, an old converted  
18 school bus. So this was the main road. The  
19 intersection of the road that where the RCMP  
20 vehicle is to your right there in the picture.  
21 That's the intersection of the road where  
22 Mr. Sweetapple's truck was located, roughly about  
23 a couple of kilometres in that roadway.  
24

<b>Page 69</b>	<b>Page 71</b>
<p>1 So this was where our main Command Post was set 2 up as for recording the documents that I've read 3 out today. But the actual search scene and the 4 coordination was done further in the road a 5 couple of kilometres. 6 7 So this is where we would come back to the 8 Command Post to get some food. In our Command 9 Post and that there, like I say, we had a 10 barbeque and that there. So we were able to cook 11 up some meals for our team members to get them 12 fed. Get them the energy level back to be able 13 to resume their searching. 14 15 The next picture down on page 20, that was the 16 afternoon. As you can see, the skies are 17 clearing. Still a little bit of cloud cover, but 18 overall pretty good visibility. This is a 19 picture of Universal Helicopters that were on 20 scene with our volunteer SAR spotters aboard. 21 22 Again, on page 21, this was just an overview. 23 This was the initial bog that was just inside the 24 tree line from where Mr. Sweetapple's vehicle was</p>	<p>1 you can see the vastness of the bog system that 2 was in the area. And I think that was it for the 3 pictures. 4 5 So just to try to paint a little bit of overview 6 of the obstacles that we encounter out in the 7 field. And no two searches are alike. No two 8 terrains are alike. So you'd have to try to 9 adjust your mindset to what you're looking for. 10 Whether your looking for a vehicle, or you're 11 looking for a person, or if you're looking for an 12 article of clothing, the intensity of trying to 13 see something in a vast area sometimes becomes 14 difficult. 15 MR. BUDDEN: 16 Q. You've noted under the section beginning at page 17 11, under "Challenges," a number of things. The 18 information that you've already talked about, 19 where Mr. Sweetapple is actually missing for 24 20 hours earlier than -- or gone berry picking over 21 24 hours earlier than you guys thought when you 22 went out in the field. And you've already 23 explained why that was important. 24</p>
<p><b>Page 70</b></p> <p>1 located. And it might be a little bit hard to 2 see in this picture, but it's an indication -- on 3 the tree line, towards the right-hand side, you 4 can see. Yeah, right where your cross is at 5 there. You can see that's one of our searchers 6 in the area with fluorescent orange on and a 7 reflective vest. 8 9 So it just gives you a little bit of indication 10 of if a person is not wearing bright clothing, 11 florescent clothing. If someone was wearing, for 12 instance, was camouflage, the difficulty in 13 distance and terrain of trying to see people. 14 And when you're in a helicopter searching, just 15 speed-wise, you're doing roughly around close to 16 100 kilometres an hour or more. So our SAR 17 spotters got to be very intense in looking to try 18 to pick up the clues, because you're moving so 19 fast that the blink of an eye you covered some 20 distance in territory that just natural blinking. 21 22 So this picture just gives you a little 23 indication of how small someone looks with bright 24 clothing, compared to the surrounding area. And</p>	<p><b>Page 72</b></p> <p>1 You also talk here about communications, which 2 you alluded to. Perhaps you could tell us a 3 little bit about the communications challenges 4 faced in this particular search? 5 MR. GOOBIE: 6 A. Roger Goobie, again, from Exploits Search and 7 Rescue. One of the biggest challenges that I 8 think most teams is pretty, probably, a common 9 denominator with most of us is communications. 10 11 As we know, Newfoundland terrain and Labrador 12 terrain, not all flat surfaces. So radio 13 communications becomes a challenge, as well as 14 cell phone service. And both of these were 15 challenged in the area for the Mr. Sweetapple 16 search. Cell phone coverage was pretty well 17 nonexistent in the area. 18 19 We did manage to find a couple of little 20 locations that we could get a few cell phone bars 21 and be able to get out in coverage to make some 22 phone calls. But some of these areas were ten 23 plus kilometres from the scene to be able to make 24 a simple phone call.</p>

## Page 73

1  
2 So the timelines of trying to, you know, relay  
3 messages, get the information out, get supplies  
4 in certainly posed a challenge to us in be  
5 self-supported at the scene and get the  
6 information we need.  
7  
8 Over the last number of years, certainly the SAR  
9 teams across the Province and Labrador have  
10 certainly benefited from the Association, the  
11 Newfoundland Search and Rescue Association, that  
12 we are able to acquire some different radio  
13 systems and repeaters.  
14  
15 And our new radio system come with GPS tracking.  
16 So now with the system that we got now aboard of  
17 our Command Centre, we're able to track the  
18 members and inlay those search members as they go  
19 out in the field, out in the woods. We can track  
20 them on a map. And plus, gives us knowledge  
21 where they've been and where they're going.  
22 Plus, after the fact, it gives us -- we could  
23 look at that map and say, okay, our crews went up  
24 there but there's a little pocket there that

## Page 74

1 someone missed. That we can certainly zero back  
2 on those areas that was of a void that we missed  
3 in the initial search.  
4  
5 So also, new technologies have come out with the  
6 inReach systems. And our team currently has a  
7 couple of those right now on the team. And what  
8 the inReach system is a GPS through a satellite  
9 system that enables us to relay a message back in  
10 a text form or an email form, back through a  
11 satellite communication, and back to someone else  
12 that's in self-service or someone with another  
13 inReach device to get a message back and forth,  
14 two-way communication.  
15  
16 But again, the challenge comes with the teams.  
17 Initially these units are roughly about \$800  
18 each. And then it's a service fee, a monthly fee  
19 of around \$25 each. And then it's a pay-per-use  
20 after so many transmissions go through them.  
21  
22 So for the volunteer teams, all this stuff  
23 becomes taxing on our dollars. We're all  
24 volunteers. We fundraise to raise money to be

## Page 75

1 able to do equipment. In our buildings, the heat  
2 and lights. Our cell phones. Our training.  
3 It's all on our own fundraising dollar, and  
4 that's certainly an issue.  
5  
6 Our team personally, coming from a larger urban  
7 centre, we've been fortunate with the support  
8 that we got in our community and from the  
9 citizens in our community. But to the smaller  
10 groups that's in the outlying, the smaller areas,  
11 this becomes certainly a big issue for those guys  
12 to be able to survive and be able to provide the  
13 proper service to the citizens around.  
14 MR. BUDDEN:  
15 Q. And we'll be talking in more detail about  
16 fundraising before you guys leave here today. No  
17 worries there. And funding and so forth.  
18  
19 Air support, I gather that was of great benefit  
20 to this particular search, beyond the obvious  
21 fact that Mr. Sweetapple was discovered through  
22 an air search?  
23 MR. GOOBIE:  
24 A. Air support certainly plays a big tool in our

## Page 76

1 tool box. Our team, personally I can speak to  
2 our experience. We've had great support from 103  
3 Rescue in Gander for quite a number of years. I  
4 understand they still got to go through the  
5 channels, but if they're able to and there's an  
6 aircraft available, we've had great success and a  
7 great relationship with 103 out of Gander. And  
8 it's certainly a big benefit. Their professional  
9 crew and their dedication certainly have helped  
10 us out in many missions in the past.  
11  
12 Universal Helicopters, which used to have our  
13 standing offer within the province for air  
14 support through the provincial government,  
15 certainly have played a big factor. And you got  
16 to know the pilots as friends and they got to  
17 know the SAR teams capability.  
18  
19 And on many occasions when the channels went  
20 through the process and we requested Air Services  
21 through the RCMP, and the RCMP, again, went  
22 through their channels to request for Air  
23 Services through the provincial allotment, that  
24 majority of time I'll always get a call from the

## Page 77

1 pilot and say I'm flying today. What have we  
2 got? What's the terrain like? And he'll rely on  
3 my expertise and experience on the ground to make  
4 the decision whether he figures he can get into  
5 the area and land in an area where we got to  
6 medevac or something like that.

7  
8 So it become a relationship and a friendship with  
9 those guys, and works really good together. And  
10 certainly, to a volunteer group that would never  
11 be able to afford air support, we certainly  
12 appreciate the provincial government's and the  
13 federal government's assistance to us as  
14 volunteers on the ground with the air support,  
15 because we're able to cover quite a bit of area  
16 in a lot smaller and shorter length of time.

17 MR. BUDDEN:

18 Q. Volunteer fatigue is another point you mentioned  
19 here.

20 MR. GOOBIE:

21 A. Yeah. As you look around the table, the  
22 volunteers that's here, the number of years'  
23 service that they had, but everyone got to  
24 realize we got some that's retirees, but majority

## Page 79

1 seen from going around the room here this morning  
2 from our volunteer members, you got anywhere from  
3 12 years to 34 years of dedication with the team.  
4

5 And as the SAR coordinator with our team, without  
6 the group around me, we certainly wouldn't be  
7 able to do what we do, and the dedication that's  
8 there and the membership. And at a drop of a  
9 hat, family functions, Christmas dinners,  
10 whatever, that the phone call goes out to our  
11 members and they drop what they're doing and come  
12 to the aid.

13  
14 So a lot of people don't realize what it takes to  
15 be a volunteer member, and the dedication that we  
16 put into it over the time and over the years in  
17 order to try to make our team better each day and  
18 learn from the experiences of a search.

19  
20 And we always sit down and say listen, what did  
21 we do good and what did we do bad. There's  
22 things that you got to look at. You got to look  
23 after your members, because you need your members  
24 when the call come out.

## Page 78

1 of fellows are still in the workforce.  
2  
3 We got regular jobs that we got to go to each day  
4 to pay our bills. And after a search goes on and  
5 after a couple of days, people are using up their  
6 vacation time and taking time off without pay in  
7 order to provide the service. And it comes  
8 pretty taxing on our members to be able to say,  
9 listen, I'm going to take tomorrow off. I'm not  
10 going to get paid, but I want to go to search.  
11 And our team got a group of 50 volunteer members.

12  
13 Normally at most searches right now, we get  
14 anywhere from 20 to 25 members usually on the  
15 first initial call. And sometimes if we get a  
16 call during the day, we'll say the day that  
17 people are working, we might only have 10 or 12  
18 members. But at five o'clock, when people starts  
19 to get off work, they'll leave their day jobs and  
20 come to the search and search half the night. Go  
21 home. Get a couple of hours rest. And then go  
22 back to their day job again.

23  
24 So it becomes very taxing on our members. As you

## Page 80

1 MR. BUDDEN:  
2 Mr. Commissioner, do you wish to take a break at  
3 this point? It's 10:30. Or carry on for a  
4 while?

5 COMMISSIONER IGLOLIORTE:

6 Thank you, Mr. Budden. I think what we'll do is  
7 have a break. Then allow Mr. Williams, since  
8 he's here with his clients and they're the  
9 subject of the search, to start off the  
10 questioning afterwards.

11 MR. BUDDEN:

12 I should have clarified. I'm not quite done with  
13 the team. So perhaps I can finish after the  
14 break and then Mr. Williams?

15 THE CLERK:

16 All rise.

17  
18 **(Recess)**

19

20 THE CLERK:

21 All rise. This Commission of Inquiry is now in  
22 session. Please be seated.

23 COMMISSIONER IGLOLIORTE:

24 Mr. Budden, you had more questions?

Page 81

1 MR. BUDDEN:

2 Yes. Just before we do, two housekeeping  
3 matters. Ms. Steele has asked me to remind  
4 people that it's imperative that they sign in the  
5 contact form for COVID tracing. That's as we  
6 enter this area. So if you haven't signed it,  
7 make a point of signing it on the way out.

8 That's absolute key element of our protocol that  
9 allows us to hold these public hearings.

10  
11 The second piece of housekeeping is, we are going  
12 to enter a further exhibit that is eight pages of  
13 handwritten notes that I understand are the notes  
14 that were made in the field by the SAR team  
15 during the course of the search, and which are  
16 very similar, I understand. I haven't reviewed  
17 them line by line, but the degree I have and what  
18 I've been told, these are very, very similar to  
19 the report that is already entered at Exhibit 72.

20 Just the contemporaneous version of that.

21  
22 So, Madam Clerk, what exhibit number are we up to  
23 now?  
24

Page 82

1 THE CLERK:

2 P-182.

3 MR. BUDDEN:

4 So I would ask if we could call these SAR Field  
5 Notes, July/August of 2013.

6  
7 **EXHIBIT P-182, ENTERED AND MARKED ON INQUIRY**

8  
9 UNIDENTIFIED MALE SPEAKER:

10 What number are they, I'm sorry?

11 THE CLERK:

12 P-182. And I'll put it on the website at lunch  
13 time.

14 MR. BUDDEN:

15 Q. Thank you, Madam Clerk. If I may return. I only  
16 had a couple of more questions for you,  
17 Mr. Goobie. Really, they're to do with the --  
18 you were, at least one day, the search manager.  
19 That would be July 28th.

20  
21 Do you know who the search manager was for July  
22 29th?

23 MR. GOOBIE:

24 A. July 29th. That would be Monday, Geoff?

Page 83

1 MR. BUDDEN:

2 Q. Yeah, it would be Monday.

3 MR. GOOBIE:

4 A. It would be Monday. On July 29th, representing  
5 our Exploits Search and Rescue team would have  
6 been Barry Carter. And Junior Downey was the  
7 recorder on that day.

8 MR. BUDDEN:

9 Q. Okay. Was there a particular designated -- to  
10 your present recollection, a designated search  
11 manager?

12 MR. GOOBIE:

13 A. Barry Carter would have been acting on behalf of  
14 Exploits Search and Rescue.

15 MR. BUDDEN:

16 Q. Okay. And we're not being too semantic here, but  
17 there was two teams there. The Exploits team and  
18 the Red Indian Lake team.

19  
20 Did they have separate search managers or was  
21 there an overall search manager?

22 MR. GOOBIE:

23 A. I can't speak to that. I don't know if Jeremy  
24 can speak?

Page 84

1 MR. CHIPPETT:

2 A. Jody Chippett, our coordinator, he was on sight  
3 and myself were both there. It's ano all team  
4 effort. It was conjunctions together. Both  
5 myself, Jody, and Mr. Carter was together. And  
6 all decisions were made together as a team.

7 MR. BUDDEN:

8 Q. So would it be fair to say the three of you  
9 collaborated and were sort of the collaborative  
10 search managers?

11 MR. CHIPPETT:

12 A. Correct, yes.

13 MR. BUDDEN:

14 Q. Thank you. And when you resumed the search on  
15 August 2nd, I believe it was, do you recall who  
16 the search manager was that day?

17 MR. CHIPPETT:

18 A. That day our coordinator, Jody Chippett, Jody was  
19 there on site that day and so was Mr. Carter.  
20 That was the day he was found, you're asking,  
21 correct?

22 MR. BUDDEN:

23 Q. Yeah, I am.

24

## Page 85

1 MR. CHIPPETT:  
 2 A. Yeah. Well, it would have been Jody and Barry  
 3 Carter.  
 4 MR. GOOBIE:  
 5 A. And Barry Carter.  
 6 MR. CHIPPETT:  
 7 A. And Barry Carter.  
 8 MR. BUDDEN:  
 9 Q. Sure. And there would have, as well, I  
 10 understand, or at least the protocol seems to  
 11 suggest, there should have been an incident  
 12 commander who would have been an RCMP officer or  
 13 perhaps a series of incident commanders.  
 14  
 15 Mr. Goobie, can you answer that? If not,  
 16 Mr. Chippett, or anybody else, tell us who the  
 17 incident commander or commanders were?  
 18 MR. GOOBIE:  
 19 A. So for the duration of the search, the first  
 20 night that we went up initially we had Constable  
 21 Ian Dollimount from the RCMP. He was on scene  
 22 with us until around 2:30 in the morning. One of  
 23 our members left with him to head back to Grand  
 24 Falls-Windsor for directions to get him back to

## Page 86

1 Grand Falls-Windsor.  
 2  
 3 The next morning Corporal Paul, Dwayne Paul,  
 4 picked up our search member that came there that  
 5 night and directed the RCMP member back to the  
 6 scene the next morning.  
 7  
 8 On the last morning that Mr. Sweetapple was  
 9 found, it was Corporal Mike Fewer.  
 10 MR. BUDDEN:  
 11 Q. Okay. And what was the relationship between the  
 12 incident commander and the search managers,  
 13 commanders and managers in this search? And I  
 14 don't mean in terms of good, bad, excellent,  
 15 terrible. I mean, in terms of who sort of was  
 16 directing who, that kind of thing?  
 17 MR. GOOBIE:  
 18 A. As with most all of our searches, initially if  
 19 you look at the rank structure, the incident  
 20 commander at the end of the day got the utmost  
 21 say. But the way we usually work with our team,  
 22 the RCMP representative, which is the incident  
 23 commander and the search manager, would always  
 24 work hand in hand with decisions. And one don't

## Page 87

1 make a call usually without the other ones. And  
 2 we work jointly as a team.  
 3  
 4 And when we walk into a command centre, the  
 5 stripes and the ranks are thrown aside and we  
 6 work together and try to hash out the best  
 7 scenario and the best method that we could for a  
 8 search to find whatever we're trying to find.  
 9 But our relationship working with the RCMP has  
 10 been great and, like I say, we work as a team.  
 11 MR. BUDDEN:  
 12 Q. Thank you. And for now this is probably my final  
 13 question, this subject area.  
 14  
 15 I understand from your evidence so far you had a  
 16 strategy. You were going to do a hasty search.  
 17 You've explained what that was and your rationale  
 18 for doing it.  
 19  
 20 Was there a written strategy, and I realize  
 21 obviously you get the call. Fifteen minutes  
 22 later you're en route. And somebody had to  
 23 drive. It was dark and all that. But was there  
 24 a written strategy that was written out in

## Page 88

1 advance and followed or written at the same time,  
 2 or was it sort of more kept in your head? A  
 3 search plan, I guess, is what I'm saying by  
 4 written strategy?  
 5 MR. GOOBIE:  
 6 A. There was no written strategy before we went to  
 7 the scene. Once we were on scene, we had paper  
 8 copies of maps that we marked up in there. But  
 9 at this point, no, we don't have those copies  
 10 available right now. We just had our notes that  
 11 was left from eight years ago.  
 12  
 13 But the map that they were using in marking up  
 14 areas that was done and where the teams went, no,  
 15 we don't have that anymore.  
 16 MR. BUDDEN:  
 17 Q. Thank you. And, Mr. Clarke, you were on the  
 18 helicopter team that found Mr. Sweetapple. Can  
 19 you tell us a little bit about the condition?  
 20 And I've advised Mr. Sweetapple that we're going  
 21 into this area now.  
 22  
 23 So if you could just tell us the condition in  
 24 which you found him, and how he was -- and the

## Page 89

1 term is used "packaged" in the report. How he  
 2 was handled or so forth. And what was done and  
 3 who did it?  
 4 MR. CLARKE:  
 5 A. Yes. I said as we were flying over we spotted  
 6 Mr. Sweetapple on the bog. And when we were  
 7 coming in --  
 8 MR. BUDDEN:  
 9 Q. And when you say, "on the bog," do you mean,  
 10 like, walking on the bog? Lying down on the bog?  
 11 MR. CLARKE:  
 12 A. No. Mr. Sweetapple's face down in the bog with  
 13 an orange hood up over his head. His boots and  
 14 some more personal effects were laid to one side  
 15 of Mr. Sweetapple. His feet was in a marshy wet  
 16 area. Okay. He was lying on his face with his  
 17 hood up.  
 18  
 19 When I got over to Mr. Sweetapple, I was half  
 20 expecting to find a deceased person, but as I  
 21 turned him over and he was still alive, so we  
 22 immediately started --  
 23 MR. BUDDEN:  
 24 Q. You say, "we." Who was there with you?

## Page 90

1 MR. CLARKE:  
 2 A. Mr. Green. Kevin Green. The two of us were  
 3 there.  
 4 MR. BUDDEN:  
 5 Q. Okay.  
 6 MR. CLARKE:  
 7 A. Turned him over. Started talking to him and  
 8 tried to assure him that help was on the way. At  
 9 that time, the chopper left. Went back to the  
 10 Command Centre to pick up the RCMP officer and a  
 11 stretcher. When they came back we loaded  
 12 Mr. Sweetapple onto a stretcher. Got him into  
 13 the chopper and they left.  
 14 MR. BUDDEN:  
 15 Q. Was he responsive at all?  
 16 MR. CLARKE:  
 17 A. No. None whatsoever.  
 18 MR. BUDDEN:  
 19 Q. Okay. Did he appear to be conscious or  
 20 unconscious?  
 21 MR. CLARKE:  
 22 A. He appeared to be unconscious.  
 23 MR. BUDDEN:  
 24 Q. Okay. Did he have any injuries or anything like

## Page 91

1 that?  
 2 MR. CLARKE:  
 3 A. None that we could see. But he was badly, what  
 4 should I say, eaten with flies. His face was  
 5 swollen and he was in rough shape.  
 6 MR. BUDDEN:  
 7 Q. And did he appear, to be as best you could tell,  
 8 overheated, hypothermic, suffering from sun  
 9 stroke, any of those conditions? And what would  
 10 the air temperature have been?  
 11 MR. CLARKE:  
 12 A. It was really hot that day. It was terrible.  
 13 Mr. Sweetapple, like I said, he was unconscious.  
 14 He didn't know we were there. And I don't know  
 15 if he was hypothermic or not, but there was also  
 16 a butter tub to one side. I don't know now if he  
 17 had used that for drinking purposes or what. All  
 18 right.  
 19 MR. BUDDEN:  
 20 Q. Yes.  
 21 MR. CLARKE:  
 22 A. Or if it was for berry picking. But that was  
 23 also there.  
 24

## Page 92

1 MR. BUDDEN:  
 2 Q. Okay. And did you administer any first aid or  
 3 just try to comfort him?  
 4 MR. CLARKE:  
 5 A. No, I didn't administer any first aid.  
 6 MR. BUDDEN:  
 7 Q. And did Mr. Green?  
 8 MR. CLARKE:  
 9 A. No.  
 10 MR. BUDDEN:  
 11 Q. And Mr. Green, I understand, was a member of the  
 12 Red Indian Lake Search and Rescue team?  
 13 MR. CLARKE:  
 14 A. That's right.  
 15 MR. BUDDEN:  
 16 Q. Thank you. And have you anything to -- and you  
 17 say he was put on a stretcher. I assume you just  
 18 lifted him gently onto a stretcher and put him in  
 19 the plane?  
 20 MR. CLARKE:  
 21 A. That's correct.  
 22 MR. BUDDEN:  
 23 Q. In the chopper.  
 24

Page 93

1 MR. CLARKE:  
 2 A. Yeah.  
 3 MR. BUDDEN:  
 4 Q. Thank you. And then you were there waiting for  
 5 about three hours to be picked up yourself?  
 6 MR. CLARKE:  
 7 A. Approximately, yes.  
 8 MR. BUDDEN:  
 9 Q. Okay. Thank you. Those were all my direct  
 10 questions. What I thought I'd do is ask each  
 11 member of the team who was there that day, which  
 12 I understand is everybody here from the Search  
 13 and Rescue teams, if they have anything to add to  
 14 what has been said? Any detail that they think  
 15 was overlooked or something I forgot to add and  
 16 so forth.  
 17  
 18 So perhaps we can start with Mr. Chippett and go  
 19 down the table. Then go to the members in the  
 20 audience with a remote mic. And then  
 21 Mr. Blackmore can finish with any observations he  
 22 has.  
 23  
 24 So, Mr. Chippett?

Page 94

1 MR. CHIPPETT:  
 2 A. Well, all of our searches were involved in a  
 3 baseline. You start off initially doing a hasty  
 4 search and a grid search. So there's a baseline  
 5 to every search we do deemed on who we're looking  
 6 for. Whether it's a berry picker or a moose  
 7 hunter or a child.  
 8  
 9 So you try to put yourself in their frame of mind  
 10 of what would they have done at the time. So the  
 11 first few hours of every search is most important  
 12 to try to cover so much ground quickly and  
 13 efficiently and safely as you can, to determine  
 14 where this person is gone.  
 15  
 16 So every search we do, we start off with this.  
 17 And we do this and this and this. Ourselves and,  
 18 for sure, Roger's team does the same thing. You  
 19 try to do everything together all in a row, so  
 20 you follow every step. So you don't have to  
 21 think about it. You know what the next step for  
 22 your team has to be.  
 23  
 24 Our team and Roger's team done that day what we

Page 95

1 done the next day and what we done every time  
 2 before, after and since. And what we'll do  
 3 tonight if we're called out again. We just  
 4 continue to do the same thing as we do every  
 5 other time.  
 6 MR. BUDDEN:  
 7 Q. One more question, Mr. Chippett. We've seen over  
 8 and over again, through these -- well, several  
 9 points, through these hearings, that teams from  
 10 adjoining areas, or even farther afield, work  
 11 together.  
 12  
 13 Have you any comment on how well or poorly the  
 14 Red Indian Lake and Exploits team coordinated  
 15 their efforts and were able to work together?  
 16 MR. CHIPPETT:  
 17 A. Well, we've worked with Roger several times over  
 18 the years and his team. We have a smaller team.  
 19 A smaller base. We have 24 members. So lots of  
 20 times there's guys working. There's guys got  
 21 family commitments. So whenever we're called and  
 22 asked to do a search right away, if we feel that  
 23 we don't have adequate enough support, I'll call  
 24 Roger and right away Roger will help.

Page 96

1 And being from the area, a lot of our local guys  
 2 know this place and this road and this. So if  
 3 Roger is coming up, he'll call us. And if we can  
 4 help, we always help. Everybody helps. It's all  
 5 one team. Everybody helps each other.  
 6 MR. BUDDEN:  
 7 Q. And teams of equals. Not junior, senior,  
 8 partners, that kind of thing?  
 9 MR. CHIPPETT:  
 10 A. No, everybody is alike. Everybody have certain  
 11 resources they can bring to a team. Everybody  
 12 have special people, especially that people can  
 13 do. Everybody just does it together.  
 14 MR. BUDDEN:  
 15 Q. Thank you. Anything else?  
 16 MR. CHIPPETT:  
 17 No. That's it for now.  
 18 MR. BUDDEN:  
 19 Q. Mr. Morrow?  
 20 MR. MORROW:  
 21 Yeah, a couple points of clarification for  
 22 questions that you asked earlier with regards to  
 23 the speed with which we respond to the searches.  
 24 We're already prepared before we get a call.

**Page 97**

1 We've got a ready-pack. We've got our clothes.  
 2 We've got everything all organized and ready.  
 3  
 4 When we get called out on a search, we respond  
 5 immediately because we're already ready before we  
 6 get a call. Right now, in my truck outside, I've  
 7 got my search pack and my rubber boots. If I get  
 8 called on a search now, I could leave here. I'd  
 9 be over to our building in about a minute and a  
 10 half and I'd be fully ready to go on a search  
 11 then. And pretty well everybody here in the room  
 12 is the same way. So that would answer your  
 13 question about the speed with which we responded.  
 14  
 15 About grid searching. Grid searching is  
 16 something that we all train for. It's not  
 17 something that we use a lot because generally  
 18 people are found or the problem is solved before  
 19 we get to the stage of grid searching.  
 20  
 21 But grid searching is something that we all train  
 22 for and we're all taught how to do and whatever.  
 23 And when the time comes, usually most of the team  
 24 captains, like myself and some of the others,

**Page 98**

1 they know enough to monitor a gridline and make  
 2 sure everybody stays the right spacings and stuff  
 3 like that. And spacings vary, depending on the  
 4 type of grid search that we're doing. So I'm  
 5 certain Mr. Smith can explain all of that because  
 6 he is an expert in that.  
 7  
 8 With regards to the RCMP, just to add to what  
 9 Roger said. Every search is a police  
 10 investigation. We work for the Justice  
 11 Department. We work for the policing agency in  
 12 our area, which in this case is the RCMP. But  
 13 every one is a police investigation.  
 14  
 15 We're all trained to recognize evidence, to treat  
 16 evidence properly, and stuff like that, because  
 17 we don't know where the things that we find are  
 18 going to come from. So, ultimately, if you are  
 19 looking for a chain of command, it comes from the  
 20 RCMP because it's their investigation and we're  
 21 there to assist them. And they are the ones who  
 22 make the ultimate decisions on how things happen.  
 23  
 24 With regards to search protocols, search

**Page 99**

1 protocols are flexible. I know because I teach  
 2 search and rescue to new members and stuff like  
 3 that, that there is a specific format that is  
 4 expected in writing in the plan. That generally  
 5 doesn't happen in an actual circumstance.  
 6  
 7 As Jeremy just said, I mean, searches evolve.  
 8 Plus a lot -- we've been at this long enough now.  
 9 We know the process that you follow when you go  
 10 down. It may not be written down in a document  
 11 saying, okay, this is step number one. This is  
 12 step number two. This is step number three and  
 13 stuff like that. But we generally tend to follow  
 14 that process all the way through.  
 15  
 16 It will start with a hasty search. It will  
 17 evolve as time goes, becomes more comprehensive.  
 18 Sometimes we have to call in other teams to  
 19 assist, either because the search area has been  
 20 enlarged, or because our members are starting to  
 21 get tired and we need someone to come in to give  
 22 us a break or whatever. But by that time it's  
 23 usually two, three, four days into a search. And  
 24 generally, by the time you get to a grid search,

**Page 100**

1 you're generally -- you need a lot of bodies to  
 2 do a proper grid search anyway.  
 3  
 4 Usually you're either looking for evidence.  
 5 You're trying to find something close in and  
 6 whatever. So we don't tend to use those as  
 7 frequently. But that would generally be the  
 8 latter stages of the search, and it would be  
 9 proceed as we come through for the initial  
 10 call-out. We would evolve the search in as it  
 11 proceeds, depending on the evidence that we find,  
 12 the information that we receive, and those sorts  
 13 of things.  
 14 MR. BUDDEN:  
 15 Q. That was really helpful. Thank you. Mr. Snow?  
 16 MR. SNOW:  
 17 A. Good afternoon, Cameron Snow, Search and Rescue  
 18 Exploits. I think it's just worth noting that  
 19 from the time of the initial call until the time  
 20 Mr. Sweetapple was picked up in the helicopter,  
 21 as a team we found nothing to indicate that or a  
 22 clue that as to where Mr. Sweetapple may have  
 23 been.  
 24

## Page 101

1 In searches like this we do have a lot of  
 2 experience and will find maybe a gum wrapper, a  
 3 Tupperware container, cigarette butts, these type  
 4 of things. And right up until he was found in  
 5 the helicopter, we never found anything.  
 6  
 7 It was frustrating for the people on the ground  
 8 on that Saturday, Sunday, and Monday, that there  
 9 was no sign of him. And the police dog had  
 10 covered the ground. The helicopter had -- like,  
 11 the Search and Rescue 103 had done a meticulous  
 12 grid-search pattern. We had the Universal  
 13 helicopter in the air. And as a collective  
 14 group, we really struggled to ask where could he  
 15 be?  
 16 MR. BUDDEN:  
 17 Q. And all the while thinking that he was just a few  
 18 hours ahead of the search, not 24-plus a few  
 19 hours.  
 20 MR. SNOW:  
 21 That's correct. And for the people in the room,  
 22 where Mr. Sweetapple's truck was parked, the  
 23 trail had -- you would obviously see where his  
 24 truck was. You could see directly where he would

## Page 102

1 have went onto the bog area. The bog was alive  
 2 with bake apples. And we thought to ourselves,  
 3 you wouldn't go too far in this instance looking  
 4 for the bake apples. They would have been right  
 5 there. So in our frame of mind we thought that  
 6 he would be relatively close to where his truck  
 7 would have been.  
 8 MR. BUDDEN:  
 9 Q. Again, that's quite helpful. Mr. Goobie, you've  
 10 obviously told us a lot. Is there anything else  
 11 that's popped into your mind?  
 12 MR. GOOBIE:  
 13 A. No. Good at the moment there, Geoff.  
 14 MR. BUDDEN:  
 15 Q. Thank you. Mr. Clarke?  
 16 MR. CLARKE:  
 17 A. I just want to say that in spite of everything  
 18 that was done, it's awesome to see Mr. Sweetapple  
 19 here today.  
 20 MR. BUDDEN:  
 21 Q. That's a very kind comment. And it's great for  
 22 us, too, to have a search where we are able to  
 23 hear from the survivor of the search.  
 24

## Page 103

1 I believe Ms. Steele may have the remote mic.  
 2 Thank you. Perhaps you could go to the  
 3 other individuals. If you could just identify  
 4 yourself to Ms. Steele and indicate whether you  
 5 have something to add, and, if so, you have the  
 6 floor.  
 7 MR. SIMMONS:  
 8 A. Art Simmons. Nothing to add.  
 9 MR. CARTER:  
 10 A. Barry Carter. I was there all four days on the  
 11 search. And on the fifth day, or the final day,  
 12 we spoke to the locals that were there. The  
 13 cottage people that knew Mr. Sweetapple. And  
 14 they pretty well guaranteed us or told us that  
 15 Mr. Sweetapple did not go to the left on that  
 16 bog, because there was a small pond or a stream.  
 17 And we said, well, each time we checked we didn't  
 18 go in that area because we felt he stayed over to  
 19 the right and picked bake apples on the bog.  
 20  
 21 But the last day we were in, and I think  
 22 Mr. Chippett can refer to this, that we decided  
 23 to cross that little brook and head to the left.  
 24 And when we were in searching the area, of that

## Page 104

1 area, the helicopter did come over the top of us  
 2 and we got a radio call asking for a stretcher,  
 3 that they found him and possibly alive.  
 4  
 5 And anyway, with that we headed back out to the  
 6 Command Centre. And when we got back there, the  
 7 locals were there. And they were up from Harbour  
 8 Round. That's the name of the area where the  
 9 cottages are, and they said they had a call from  
 10 St. John's that Mr. Sweetapple was found and  
 11 alive. Right? But we said we didn't know for  
 12 sure, right?  
 13  
 14 But the locals did tell us that it was a good  
 15 chance he did not go to the left. He stayed to  
 16 the right and picked bake apples on the bog. But  
 17 it ended up he was to the left, as far as I was  
 18 concerned, right when we start looking back at it  
 19 now. That's all I have to say. Thank you.  
 20 MR. BUDDEN:  
 21 Q. Thank you.  
 22 RALPH, Q.C.:  
 23 Mr. Budden, is there a possibility that  
 24 Mr. Carter could show us on the map what he's

## Page 105

1 talking about?  
 2 MR. BUDDEN:  
 3 Q. Sure. If Mr. Carter is able to. And Madam Clerk  
 4 can call up -  
 5 RALPH, Q.C.:  
 6 I think it's page 17.  
 7 MR. BUDDEN:  
 8 Q. - page 17.  
 9 COMMISSIONER IGLOLIORTE:  
 10 Yeah. I was going to ask that Mr. Goobie also  
 11 show us the areas searched, if Mr. Carter doesn't  
 12 have all the information as the grid search.  
 13  
 14 Any of that kind of stuff, we just like to know  
 15 how close you came over that time period.  
 16 MR. BUDDEN:  
 17 Q. Page 17 will be up in just a second now,  
 18 Mr. Clarke.  
 19 MR. CLARKE:  
 20 A. Just looking at it there now. Can you point out  
 21 where the truck was at there, Rog -- or the  
 22 Command Centre?  
 23 MR. GOOBIE:  
 24 A. The truck was right up, sort of the middle of the

## Page 106

1 page there. The upper one right there now.  
 2 MR. CLARKE:  
 3 A. Yes. And we're to the -- we went down to the  
 4 right -- or to the left of that pond that day,  
 5 right?  
 6 MR. GOOBIE:  
 7 A. Yeah.  
 8 RALPH, Q.C.:  
 9 Q. Do you want to go right up and show, point it  
 10 out?  
 11 MR. CLARKE:  
 12 A. We sort of came down this way, right, Jody? I  
 13 think you were in... Were you in the boat in the  
 14 pond?  
 15 MR. CHIPPETT:  
 16 A. Yeah, correct. I wasn't there. The boys were in  
 17 that pond in the boat. Yeah.  
 18 MR. CLARKE:  
 19 A. In the boat and we were walking down this  
 20 direction.  
 21 MR. CHIPPETT:  
 22 A. Correct.  
 23 MR. CLARKE:  
 24 A. And the little brook is sort of right here,

## Page 107

1 correct?  
 2 MR. CHIPPETT:  
 3 A. Yes. That's correct.  
 4 MR. CLARKE:  
 5 A. And I met those locals, Mr. Sweetapple. I have a  
 6 cottage up in that area at the top of Red Indian  
 7 Lake, and I did meet the locals several times  
 8 skidoing. And we have great chats about it,  
 9 right? And it was nice to see you today, I must  
 10 admit, right?  
 11  
 12 But anyway, like I said, we were heading in this  
 13 direction, right? Just guessing. And basically,  
 14 we were using our sense of smell, because that's  
 15 what we expected that day. That we were going to  
 16 smell that body, right? We didn't expect him to  
 17 be alive, right? We figured that we would smell  
 18 him somewhere along the way, right? But it was  
 19 just, we took the chance and went to the left.  
 20 Is that okay?  
 21 MR. CARTER:  
 22 A. Barry Carter.  
 23 MR. BUDDEN:  
 24 Q. Do either Mr. Commissioner or Mr. Ralph wish any

## Page 108

1 elaboration on that from this witness?  
 2 Mr. Carter?  
 3 RALPH, Q.C.:  
 4 Q. No. In terms of earlier, in terms of the first  
 5 day, which I think was the 28th?  
 6 MR. CARTER:  
 7 A. Yes. That Saturday.  
 8 RALPH, Q.C.:  
 9 Q. Can you point out, I guess, where you would have  
 10 been searching on that day?  
 11 MR. CARTER:  
 12 A. Oh, we would have just searched the bog itself.  
 13 And we would have both went further, I'll say  
 14 across the bog, basically, and went in over,  
 15 probably, 2- or 300 yards of the bog just doing  
 16 our checks to see if he was possibly in there  
 17 laid down somewhere.  
 18 RALPH, Q.C.:  
 19 Q. Right.  
 20 MR. CARTER:  
 21 A. Because we didn't know he wasn't on the bog. So  
 22 once we checked that, we went about, like I said,  
 23 a couple of hundred yards off the bog and did our  
 24 checks, right?

## Page 109

1 RALPH, Q.C.:

2 Q. Right. Can Mr. Goobie go up there as well and

3 point out where the hasty searches would have

4 been and also the grid searches?

5 MR. BUDDEN:

6 Q. And the road searches, I guess, is part of those

7 hasty searches?

8 MR. GOOBIE:

9 A. So the initial search, like you say, the area

10 where his truck was here, the first couple of

11 days, that night, then the next day was really

12 concentrated on the bog area that was here with

13 all the bake apples. And the search increased

14 down through this area alongside the pond. And

15 also the woods road came down along the edge here

16 as well and it was started to grow in, but the

17 teams went down through there.

18

19 Unfortunately, back at the time when

20 Mr. Sweetapple's search was, we didn't have the

21 GPS. We didn't have the mapping system that we

22 do have now. So as an overlay of exactly what

23 was searched, we do not have any record of that.

24

## Page 110

1 MR. SNOW:

2 A. Cameron Snow. I think, Roger, it would be worth

3 noting the grid search, because you did ask about

4 that between the road and Mr. Sweetapple's truck.

5 MR. GOOBIE:

6 A. Yeah. The grid search. Like I say, the roadway

7 that went down alongside the bog here, there was

8 an area of, we'll say, timber that separated the

9 bog between the road. And team members used to

10 go in through, as we alluded to earlier,

11 depending on the spacing and how thick the

12 terrain was that we went through, all this area

13 between the wood line between the bog and the

14 road. Because initial thought, that usually what

15 we think of, okay, someone went in on an area and

16 the time of evening that we thought, okay, well,

17 he may have took or tried to take a shortcut out

18 through the road to pick up the walk back to his

19 truck, instead of walking back the bog area. And

20 that was our initial.

21

22 So the next morning when we done the grid search

23 and down through the area, everybody crisscrossed

24 back and forth, back and forth from the bog, out

## Page 111

1 through the tree line, out to the roadway, then

2 back in through the bog, back out through it

3 again. And all that area down through there. If

4 anyone took a shortcut, that's the area that was

5 searched.

6

7 And as the time went on, like I say, the search

8 then evolved down through the area. And then my

9 understanding, when Jody and them, and Jeremy,

10 went in on the Monday with their Argo and the

11 boat, this was the pond area that they had done,

12 if I'm correct there, Jeremy?

13 MR. CHIPPETT:

14 A. Yeah. That's correct. Yeah.

15 MR. CARTER:

16 A. But that was on Friday. That was on the day he

17 was located we were in the pond.

18 MR. GOOBIE:

19 A. Okay. I'm sorry.

20 MR. CARTER:

21 A. That was the morning he was located. That's the

22 day we were down there in the pond, right?

23 WILLIAMS, Q.C.:

24 Q. So the total distance between where the truck was

## Page 112

1 located and where he was found, is that the 3.5

2 kilometres we're referencing?

3 MR. GOOBIE:

4 A. That's correct. Yeah.

5 WILLIAMS, Q.C.:

6 Q. So that's nearly as the crow flies.

7 MR. GOOBIE:

8 A. That's as the crow flies, yes.

9 WILLIAMS, Q.C.:

10 Yeah. Okay.

11 MR. BUDDEN:

12 Q. If there's nothing further?

13 COMMISSIONER IGLOLIORTE:

14 Q. Yeah, I'd like to ask...

15 MR. BUDDEN:

16 Q. Yeah.

17 COMMISSIONER IGLOLIORTE:

18 Q. So the bottom of the picture shows where he was

19 eventually located. And the spot you showed is

20 where the truck was?

21 MR. GOOBIE:

22 A. Correct.

23 COMMISSIONER IGLOLIORTE:

24 Q. So I'm just wondering, during the time period

## Page 113

1 from Monday to -- well, Saturday to the Friday,  
 2 did any aircraft, any grid search, any foot  
 3 search end up close to where he was found?  
 4 MR. GOOBIE:  
 5 A. I can't speak to what the aircraft done, but I  
 6 can speak to being listening to the noise levels  
 7 of the helicopters when both the 103 Rescue and  
 8 both Universal Helicopters were flying. That  
 9 being located, I was located basically set up  
 10 where his truck was and you hear the chopper come  
 11 over your head, and then you see it for a while.  
 12 Then you see it slowly fade away. Sound-wise and  
 13 visual-wise, that they crisscross quite a bit of  
 14 this area here, even back around the surrounding  
 15 area as well, that visual.  
 16  
 17 At the search itself, I was never in the  
 18 aircraft, so I can't say. I was on the ground.  
 19 I wasn't in the aircraft. But by visual and by  
 20 sound, it was quiet in the area. And one of the  
 21 representatives from the 103 Squadron here may be  
 22 able to allude to an actual grade of what they  
 23 flew.  
 24

## Page 114

1 RALPH, Q.C.:  
 2 Q. Commissioner, I'm just curious there. At Exhibit  
 3 173, page 12, there is, I think, the actual  
 4 search of the 103. Maybe we can just... Page  
 5 12. Page 12.  
 6 MR. BUDDEN:  
 7 Q. I would just note that there will be other  
 8 witnesses that may be in a better position to  
 9 speak to some of this stuff.  
 10 RALPH, Q.C.:  
 11 Q. And so I think he'll be able to point out exactly  
 12 where he was in relation to the grid search here.  
 13 Where he was found.  
 14 MR. BUDDEN:  
 15 Q. Got you. Madam Clerk is bringing up page 12, I  
 16 believe.  
 17 RALPH, Q.C.:  
 18 Q. Okay. There it is. There it is. So I think  
 19 that's the actual search; is that right,  
 20 Lieutenant Colonel Marshall?  
 21 LIEUTENANT COLONEL MARSHALL:  
 22 A. Yes.  
 23 RALPH, Q.C.:  
 24 Q. Maybe you can explain this there?

## Page 115

1 LIEUTENANT COLONEL MARSHALL:  
 2 A. What you see in there is the actual track of the  
 3 Cormorant, the search area, but that would have  
 4 been on the morning of the 28th.  
 5 RALPH, Q.C.:  
 6 Q. I wonder if Mr. Goobie can point out where he  
 7 would have been found, I guess, several days  
 8 later?  
 9 MR. GOOBIE:  
 10 A. Just looking at this map here without going in to  
 11 comparing it to our own map, I would think  
 12 Mr. Sweetapple was located approximately right in  
 13 this area here, I think, without overlaying our  
 14 map over it. But possibly looking at the pond  
 15 here. I think it could be just off the edge.  
 16 MR. BUDDEN:  
 17 Q. If you'd like, you can look at it so you've got  
 18 it right in front of you to compare, if that's  
 19 helpful, Mr. Goobie. You could have my copy.  
 20 MR. GOOBIE:  
 21 A. Yeah. Comparing from our profile to the area  
 22 flown, Mr. Sweetapple would be located right in  
 23 this area right here. So just outside of the  
 24 flight plan here.

## Page 116

1 MR. BUDDEN:  
 2 Q. Thank you. And if I could have my exhibit back,  
 3 that would be great.  
 4 RALPH, Q.C.:  
 5 Q. So perhaps before Mr. Goobie sits down. So  
 6 Universal flew on, I guess, two different days.  
 7 Any sense of where they would have flown? What  
 8 pattern or where they would have gone?  
 9 MR. GOOBIE:  
 10 They would have flown, you know, similar area up  
 11 here. But how far their flight plan was, I'm  
 12 unsure. I never, ever seen -- this is the first  
 13 time seeing this flight plan.  
 14  
 15 So normally we don't get a flight plan back from  
 16 Universal Helicopters. Right now, if we fly with  
 17 Universal Helicopters, usually one of our team  
 18 members would take a personal GPS with them, and  
 19 what they've flown we'll be able to transcribe it  
 20 into a map after. But at that point we didn't  
 21 have that technology with us to be able do it.  
 22 MR. BUDDEN:  
 23 Q. If Mr. Carter has nothing further, then  
 24 perhaps -- and again, everybody will be available

**Page 117**

1 to lawyers to question further once I'm done.  
 2 But I believe there are another -- thank you,  
 3 Mr. Goobie, you can sit down now. There's  
 4 another team member, too, who may wish to speak.  
 5 MR. DOWNEY:  
 6 A. Hi. Junior Downey, Ground Search and Rescue,  
 7 Grand Falls. The only thing I would add, I  
 8 think, because I was there during the whole  
 9 search from beginning to end. It was the last  
 10 day when Mr. Sweetapple was found, we were told  
 11 he was alive, and the chopper was coming back,  
 12 was the urgency on the pilot's face when he  
 13 landed the chopper.  
 14  
 15 And he had to get things out of the chopper  
 16 because there had to be room to get  
 17 Mr. Sweetapple in. Make the chopper a bit  
 18 lighter, and it was the urgency. It was just  
 19 take it out. Put it on the ground. Chopper was  
 20 up and gone. So you could tell there was an  
 21 urgency there. And we heard that he wasn't very  
 22 good. So that's about what I would have to add.  
 23 MR. BUDDEN:  
 24 Q. Thank you. That also was helpful. Are there

**Page 118**

1 other team members here who wish to speak? I  
 2 think there may be at least one more? Or is that  
 3 it?  
 4  
 5 Okay. Thank you. If there are no further team  
 6 members, then what happens now, folks, as I  
 7 explained earlier, the other lawyers - who would  
 8 be Mr. Ralph, the lawyer for the Provincial  
 9 Government; Ms. Bedford, the lawyer for the  
 10 Department of National Defence and RCMP; and  
 11 Mr. Williams, who is the lawyer for the Winters  
 12 and Sweetapple families - will now have questions  
 13 or may well now have questions for you.  
 14  
 15 When this round is over, I'm going to ask you  
 16 some more questions about those other issues.  
 17 Sort of broader than just the search. Thank you.  
 18 Mr. Ralph?  
 19 COMMISSIONER IGLOLIORTE:  
 20 I invite Mr. Williams.  
 21 MR. BUDDEN:  
 22 Okay.  
 23 WILLIAMS, Q.C.:  
 24 Q. Thank you, Mr. Budden. So I guess, because,

**Page 119**

1 Mr. Goobie, I think you took us through the  
 2 (inaudible), maybe I'll start with you first.  
 3 Because I'm going to try to do this in short  
 4 fashion. I don't want to take time up going  
 5 through everything you do.  
 6  
 7 So taking my notes, it appears that we now know  
 8 that Mr. Sweetapple went into the berry picking  
 9 on Friday afternoon. Now, of course, that was  
 10 not known to you folks at that time. And he  
 11 indicates, again, it would have been late in the  
 12 afternoon. Probably around 5:30 or 6:00, just  
 13 for information purposes.  
 14  
 15 So then Saturday you get a call, and it was late  
 16 Saturday evening. You assembled your team late  
 17 that night, and you get in, I trust, around  
 18 midnight Saturday night/Sunday morning. And you  
 19 do a couple of hours of immediate search at that  
 20 point. Okay. So we've got a couple of hours,  
 21 what I will call, Saturday night.  
 22  
 23 Then the notes indicate there was a full day  
 24 search all day Sunday, right? I think you got up

**Page 120**

1 and then you were on the ground by 6:30. And  
 2 then the same thing on Monday. And so we had  
 3 another 13 hours, I think, was outlined.  
 4  
 5 So add on the extra two. So there was probably  
 6 two days, plus a couple of hours up to that point  
 7 in time, that there were complete searches; would  
 8 that be correct?  
 9 MR. GOOBIE:  
 10 A. Yes, that would be correct, sir.  
 11 WILLIAMS, Q.C.:  
 12 Q. Okay. Now, what I want to get at is, what  
 13 difference would it had made to your team, as  
 14 well as the Cormorant team and the Universal team  
 15 - because there was full searches and all  
 16 resources were being deployed, Cormorant,  
 17 Universal - had we known that he had entered --  
 18 because you were of the view that he had entered  
 19 at -- again, rough times I'm using here. I'm not  
 20 trying to tie you down on anything. Rough time  
 21 thinking, he went in Saturday afternoon.  
 22  
 23 What difference would that have made to how you  
 24 would have set out your plan about your search,

## Page 121

1 had you thought he was in there 24 hours earlier?  
 2 MR. GOOBIE:  
 3 A. What that would change is, okay, a timeline.  
 4 When you say someone only had a couple of hours  
 5 being able to walk with terrain, the age, medical  
 6 conditions, all those factors would play a factor  
 7 in how far a person could walk.  
 8  
 9 So had we known initially that we were dealing  
 10 with over 24 hours, well, that distance changes  
 11 quite a bit. So when you pass that along to the  
 12 aircraft crew, their expansion of their search  
 13 area would change the radius of the person where  
 14 he left from. Would change the course of how far  
 15 a person could be possibly from point last seen  
 16 or point left.  
 17 WILLIAMS, Q.C.:  
 18 Q. Okay. So when we look at the exhibit that's  
 19 currently up on the board, which is the Cormorant  
 20 search pattern, and I think Corporal Marshall  
 21 indicated that was for the 28th, the Sunday, and  
 22 Mr. Sweetapple was found just on the perimeter of  
 23 that as we've indicated.  
 24

## Page 122

1 Had we known that he was in there 24 hours  
 2 earlier, in likelihood that search pattern would  
 3 have expanded by 24 hours, I would think. So if  
 4 we say, and again, correct me if I'm wrong in  
 5 this. I'm making assumptions here. So if we say  
 6 we know the team had searched all day on the  
 7 28th, had they been aware that that Cormorant  
 8 would have expanded or Universal would have  
 9 expanded its search perimeters had they known?  
 10 MR. GOOBIE:  
 11 A. I would think so, yes.  
 12 WILLIAMS, Q.C.:  
 13 Q. Okay. And how big a factor does it play that I  
 14 think the team had knowledge that Mr. Sweetapple  
 15 was a diabetic? Did you guys know that at the  
 16 outset?  
 17 MR. GOOBIE:  
 18 A. Not at the outset, but as the information started  
 19 to flow in. When we got to the scene first, you  
 20 had very little knowledge of the background of  
 21 the person, the subject that you're looking for.  
 22 So as the police talked to family members or  
 23 stuff like this, you start to learn of, okay, the  
 24 person is a diabetic, or a person got a bad heart

## Page 123

1 and is on medication. This thing. And then you  
 2 try to find out did the person have the  
 3 medication with them, or is it left behind. And  
 4 these are factors that as the search evolved that  
 5 got brought into play, that the information got  
 6 passed to us.  
 7 WILLIAMS, Q.C.:  
 8 Q. Do you have any recollection as to when you would  
 9 have learned that he would have been a diabetic?  
 10 MR. GOOBIE:  
 11 A. I think it was sometime during the morning, the  
 12 next morning, when, I think, the second member  
 13 came on. When Corporal Dwayne Paul came on. I  
 14 think this is -- what the RCMP says, it's a  
 15 Missing Persons report, that's usually filled out  
 16 from talking to a family member or friend or  
 17 whatever. And that's usually then shared with  
 18 us.  
 19  
 20 So the type of clothing a person has on. Medical  
 21 conditions. Shoe size, if you can get it. If  
 22 they're a smoker or a non-smoker. All those  
 23 factors, because all those little tidbits of  
 24 information is something that we can pass along

## Page 124

1 to our members. Okay, someone is a smoker.  
 2 Well, you could see a cigarette pack or a  
 3 cigarette butt or stuff like that.  
 4  
 5 So I think it was, if memory serves me right,  
 6 sometime when Dwayne Paul came the next morning  
 7 that that information was shared with us.  
 8 WILLIAMS, Q.C.:  
 9 Q. And that would have been the morning, the Sunday  
 10 morning, what I'm going to call the first full  
 11 day of the search?  
 12 MR. GOOBIE:  
 13 A. Correct.  
 14 WILLIAMS, Q.C.:  
 15 Q. Okay. And were you folks aware that it was  
 16 Mr. Sweetapple's intention that he was going  
 17 berry picking, but he would have stayed at his  
 18 cabin that was in the area?  
 19 MR. GOOBIE:  
 20 A. That was what we were told, yes.  
 21 WILLIAMS, Q.C.:  
 22 Q. Okay. So the urgency of this search, I trust,  
 23 would have increased knowing that he's a  
 24 diabetic. If he's lost, he didn't -- we know he

## Page 125

1 wasn't back to his cabin or he wasn't at his  
 2 cabin, so he may not be without medication.  
 3  
 4 So I trust that plays a factor in a search. If  
 5 you know somebody, for example, is a diabetic,  
 6 out on the barrens, out in the country without  
 7 medication, then the concerns of diabetic coma,  
 8 etcetera, obviously kick in at some point.  
 9 Sooner rather than later.  
 10 MR. GOOBIE:  
 11 A. Yes.  
 12 WILLIAMS, Q.C.:  
 13 Q. Okay.  
 14 MR. GOOBIE:  
 15 A. And when the guys went back that afternoon there  
 16 and searched around Mr. Sweetapple's cabin, as  
 17 they could see through the window, they couldn't  
 18 tell it was the right medication or what. But  
 19 they could tell there was some medication on his  
 20 table that was inside the cabin.  
 21 WILLIAMS, Q.C.:  
 22 Q. So there was some thought that there was  
 23 medications left at the cabin?  
 24

## Page 126

1 MR. GOOBIE:  
 2 A. Yes.  
 3 WILLIAMS, Q.C.:  
 4 Q. Yeah, okay. Meaning they probably weren't with  
 5 him if they were in the cabin?  
 6 MR. GOOBIE:  
 7 A. Like I say, we didn't know exactly what they were  
 8 or if Mr. Sweetapple had an insulin kit with him  
 9 or what. But we looked in the truck and we could  
 10 see, initially that night there what you could  
 11 see was a cell phone on the truck, and I think it  
 12 was a banana, if it serves me right, on the seat  
 13 as well. And a pair of glasses was on there.  
 14  
 15 So all those things come to mind, but exactly if  
 16 he did have medication, we never knew till --  
 17 WILLIAMS, Q.C.:  
 18 Q. No. You would never know for certain in any  
 19 event, yeah.  
 20 MR. GOOBIE:  
 21 A. Never know.  
 22 WILLIAMS, Q.C.:  
 23 Q. Okay. So would you have been the individual who  
 24 would have received the first call from the RCMP?

## Page 127

1 MR. GOOBIE:  
 2 A. Yes, I was. Yeah.  
 3 WILLIAMS, Q.C.:  
 4 Q. Okay. And do you remember who that was who  
 5 called you?  
 6 MR. GOOBIE:  
 7 A. That was Constable Ian Dollimount.  
 8 WILLIAMS, Q.C.:  
 9 Q. Ian Dollimount?  
 10 MR. GOOBIE:  
 11 A. Dollimount, yeah.  
 12 WILLIAMS, Q.C.:  
 13 Q. Okay. And where was he located?  
 14 MR. GOOBIE:  
 15 A. He would have been in Grand Falls-Windsor.  
 16 WILLIAMS, Q.C.:  
 17 Q. Okay. And what information would he have  
 18 conveyed to you at that time?  
 19 MR. GOOBIE:  
 20 A. He said he had, I think it was, a 74-year-old  
 21 berry picker that was missing in the Harbour  
 22 Round area of Red Indian Lake. And so then I, in  
 23 turn, told him, "Well, Red Indian Lake is not our  
 24 area. Have you contacted Red Indian Lake team?"

## Page 128

1 And he said, "No, I didn't realize there was a  
 2 team there."  
 3  
 4 So this is when, then, I put Jody on alert that,  
 5 listen, we got a search and we need your help,  
 6 basically, of the expertise for that local area.  
 7 WILLIAMS, Q.C.:  
 8 Q. Okay. And at that point in time when you  
 9 received the initial call, would it have been  
 10 indicated to you at what point in time he had  
 11 been missing since? Would they have conveyed --  
 12 what I'm getting at is, you had indicated you  
 13 thought he had gone in Saturday night. So where  
 14 did you garner that information?  
 15 MR. GOOBIE:  
 16 A. From the initial call and being eight years ago.  
 17 But that information, as far as I interpreted,  
 18 was that evening is when he went missing.  
 19 WILLIAMS, Q.C.:  
 20 Q. And would that have been an assumption or would  
 21 that have been said, look, he went in the country  
 22 on Saturday and he's reported missing?  
 23 MR. GOOBIE:  
 24 A. I can't confirm for sure, but I can only assume

## Page 129

1 that it was relayed to us.  
 2 WILLIAMS, Q.C.:  
 3 Q. Okay. And so then your notes indicate there was  
 4 full searches done all Sunday. Full searches  
 5 done all Monday. Again, over 13 hours. And then  
 6 Tuesday, you are indicated to stand down?  
 7 MR. GOOBIE:  
 8 A. Correct.  
 9 WILLIAMS, Q.C.:  
 10 Q. Okay. And where would that instruction have come  
 11 from?  
 12 MR. GOOBIE:  
 13 A. That would have come from the RCMP.  
 14 WILLIAMS, Q.C.:  
 15 Q. And who particularly at the RCMP?  
 16 MR. GOOBIE:  
 17 A. I would think at that time it, well, it came from  
 18 Dwayne Paul, but I guess that would have been  
 19 relayed to him by his staff sergeant that we were  
 20 standing down.  
 21 WILLIAMS, Q.C.:  
 22 Q. Okay. And from a procedural standpoint, to your  
 23 understanding, who has authority to stand down on  
 24 a search?

## Page 130

1  
 2 When you're called in by the RCMP, do you make  
 3 your own determinations when you stand down or  
 4 are you directed to stand down?  
 5 MR. GOOBIE:  
 6 A. We are directed to stand down.  
 7 WILLIAMS, Q.C.:  
 8 Q. Okay. And do you know why you were directed to  
 9 stand down on that particular day?  
 10 MR. GOOBIE:  
 11 A. Just, I guess, that the information that we  
 12 passed from the initial searching that we had  
 13 done, and to my recollection they are doing  
 14 further investigation. And we would be recalled  
 15 when we are needed again.  
 16 WILLIAMS, Q.C.:  
 17 Q. And your understanding, again just to clarify,  
 18 was because they would have relied on the  
 19 information that had been conveyed from the  
 20 search team from over the previous two days?  
 21 MR. GOOBIE:  
 22 A. Correct.  
 23 WILLIAMS, Q.C.:  
 24 Q. Generally speaking, looking at this case, but I'm

## Page 131

1 talking about generic perspective, if you have an  
 2 individual, any individual, who is reported lost  
 3 as in this circumstance, and again, we know has  
 4 health conditions, diabetic, and to the best of  
 5 your knowledge, doesn't have medications, how  
 6 long would a search typically take?  
 7  
 8 I mean, what's the routine that, okay, we know  
 9 his vehicle is here. We know he's not at his  
 10 cabin. We know he's presumably in the country  
 11 somewhere. We know there's a health issue.  
 12  
 13 How long would a search typically go for such an  
 14 individual?  
 15 MR. GOOBIE:  
 16 A. You mean our typical experience of finding  
 17 someone?  
 18 WILLIAMS, Q.C.:  
 19 Q. Yeah. How long does a search normally take? How  
 20 long would you guys -- and I know you can't put a  
 21 time on it, because I know every case is  
 22 different from the evidence you find and things  
 23 of that nature.  
 24

## Page 132

1 But when you have a missing individual, what  
 2 would be the average period of time that you  
 3 would search for them? Either one of three  
 4 outcomes, I guess? Either you find them, and you  
 5 find them alive, which is the best outcome?  
 6  
 7 The worst outcome, unfortunately you may find  
 8 them and they're deceased, which would bring it  
 9 to an end.  
 10  
 11 Or you searched and you continued to search and  
 12 they've never been located.  
 13  
 14 So in the middle scenario?  
 15 MR. GOOBIE:  
 16 A. Typically from experience of finding a positive  
 17 outcome, and I consider positive, whether you  
 18 find someone alive or deceased is still a  
 19 positive search, -  
 20 WILLIAMS, Q.C.:  
 21 Q. Yes.  
 22 MR. GOOBIE:  
 23 A. - less than 12 hours.  
 24

## Page 133

1 WILLIAMS, Q.C.:

2 Q. Okay. And how long does a search continue when

3 you have not been able to obtain a positive

4 outcome, so that you haven't found them alive or

5 deceased? On average?

6 MR. GOOBIE:

7 A. Speaking from experience -- again, we still have

8 one in the area right now that's still an ongoing

9 investigation. Initially, we are in on that one

10 for two days and then we were stood down. And

11 then we have reconvened on that search several

12 times since for different things that came up.

13 WILLIAMS, Q.C.:

14 Q. So would the average search terminate after two

15 days?

16 MR. GOOBIE:

17 A. Two to three days I would think would be the

18 average.

19 WILLIAMS, Q.C.:

20 Q. Okay. So and that's what we had in this case.

21 So after two full days the team stood down?

22 MR. GOOBIE:

23 A. Correct.

24

## Page 134

1 WILLIAMS, Q.C.:

2 Q. And there was no searching on Tuesday. There was

3 no searching Wednesday. And then on Thursday you

4 had the meeting?

5 MR. GOOBIE:

6 A. We had the meeting with the RCMP here at the

7 local detachment.

8 WILLIAMS, Q.C.:

9 Q. Okay. And what was the purpose of that meeting?

10 MR. GOOBIE:

11 A. Well, the purpose, I think, what was some more

12 information that they have gathered over the

13 couple of days, I guess, on the little bit of

14 background. I can't speak to that, but I can

15 only assume.

16

17 That we were asked to meet at the detachment,

18 like I say, 1:30 in the afternoon. And there was

19 the staff sergeant was there. I know Dwayne Paul

20 was there. I think there may be someone else

21 from the General Investigation Unit was there.

22 And myself from the Exploits Search and Rescue.

23 And I can't remember if Jody was there as well

24 from Red Indian.

## Page 135

1 And so, basically, I brought my search notes that

2 we had had and we went through what we had done

3 and looked at some maps of the areas of what we

4 had searched. And it was agreed that let's go

5 back again and see if we can find up anything

6 else.

7

8 Again, was the timeline had changed from my point

9 of view that it could be a little bit farther.

10 And that was the game plan for that Friday when

11 we went back in to search further back into the

12 country. The boys came with their Argo and their

13 boat for to go up the lake there as well. And

14 the search area was increased.

15 WILLIAMS, Q.C.:

16 Q. And what was the team's reaction or response when

17 they found out that he had, in fact, been in 24

18 hours earlier than you had originally thought?

19 MR. GOOBIE:

20 A. It certainly changes your perspective that, okay,

21 if he's -- when we went there initially was a bog

22 there. Like I say, the bog was right full of

23 bake apples, and you say a guy only got three or

24 four hours on you and, well, he's not gone far

## Page 136

1 from this area. But when you realize that he was

2 27 hours ahead of you, that would change the

3 distance that possibly someone could walk and

4 travel.

5

6 So it certainly played a factor, that

7 information, in my point of view, of our initial

8 strategy plan for when we started the search.

9 WILLIAMS, Q.C.:

10 Q. And then the search started at, I think, 7 a.m.

11 on the Friday, and he was located at 10:45?

12 MR. GOOBIE:

13 A. Approximately 10:45. I got the call at 11:20.

14 Now, by that time Mr. Sweetapple was packaged and

15 aboard the helicopter and on the way to Corner

16 Brook when I got the call.

17 WILLIAMS, Q.C.:

18 Q. Okay. And just for the record, perhaps if we

19 could bring up Exhibit 72, please. Page 5. And

20 if we just scroll down over the search. That

21 paragraph. Yes, thank you.

22

23 So in that exhibit -- excuse me, my poor sight.

24 But it states, "The parties that were

## Page 137

1 involved..." And in the fourth last line, it  
 2 states that the search, basically, effort to  
 3 locate him was for seven days. But when we go  
 4 back over the timeline, the search would have  
 5 been really two days, plus the two hours first to  
 6 the three now. So it's about two days, five  
 7 hours would be the search period?  
 8 MR. GOOBIE:  
 9 A. Yeah. What I alluded to there was seven days  
 10 from his time --  
 11 WILLIAMS, Q.C.:  
 12 Q. From the time, yeah.  
 13 MR. GOOBIE:  
 14 A. Yeah.  
 15 WILLIAMS, Q.C.:  
 16 Q. But it wasn't an active search for seven days?  
 17 MR. GOOBIE:  
 18 A. No. Exactly, no. And that's alluded to in the  
 19 timeline of the search as well.  
 20 WILLIAMS, Q.C.:  
 21 Q. Okay. All right. That's fine. Thank you.  
 22 That's all the questions I have.  
 23 RALPH, Q.C.:  
 24 Q. Mr. Goobie, I want to make sure I understand

## Page 138

1 correctly in terms of the Command Post, which was  
 2 the old school bus.  
 3  
 4 You couldn't get that bus into where the truck  
 5 was; is that right?  
 6 MR. GOOBIE:  
 7 A. That's correct. The road and the terrain was  
 8 just impossible to bring the school bus in over  
 9 to get it closer to the site.  
 10 RALPH, Q.C.:  
 11 Q. And so what would have been the distance between  
 12 the school bus and where the truck was located?  
 13 MR. GOOBIE:  
 14 A. I'm saying approximately two kilometres.  
 15 RALPH, Q.C.:  
 16 Q. And who would have been in the school bus the  
 17 first couple of days?  
 18 MR. GOOBIE:  
 19 A. The first couple of days would have been Arthur  
 20 Simmons and Roy Andrews. Art was the recorder  
 21 that took these notes that you see before you  
 22 today.  
 23 RALPH, Q.C.:  
 24 Q. And would there have been an RCMP officer in

## Page 139

1 this, in the Command Post as well?  
 2 MR. GOOBIE:  
 3 A. There was an RCMP member. Like I say, Ian  
 4 Dollimount was there the first night. And then  
 5 Corporal Paul came there on the Sunday morning  
 6 approximately around 10:30, 11 o'clock in the  
 7 morning.  
 8 RALPH, Q.C.:  
 9 Q. So I'm not quite sure the time that you found the  
 10 truck. Can you recall off the top of your head  
 11 at what point you found the truck? It was fairly  
 12 quickly after you arrived there, I think?  
 13 MR. GOOBIE:  
 14 A. The truck was located before we got to scene.  
 15 The local cabin owners had located his truck and  
 16 we knew of the location of the truck before we  
 17 got to scene.  
 18 RALPH, Q.C.:  
 19 Q. Right. So I guess this was sort of a search  
 20 managing by committee because you had two  
 21 different GSAR teams working together; is that  
 22 right?  
 23 MR. GOOBIE:  
 24 A. Correct. Yes.

## Page 140

1 RALPH, Q.C.:  
 2 Q. So I'm just trying to get a sense. So when you  
 3 first arrived there you know you got a berry  
 4 picker. And again, are you looking at the sort  
 5 of science of lost behaviour at that point?  
 6 Trying to say, okay, he's only got a few hours on  
 7 us. How far is he likely away from his last  
 8 known point? Which I understand the last known  
 9 position would have been the truck; is that  
 10 correct?  
 11 MR. GOOBIE:  
 12 A. Well, we can only assume that his truck was  
 13 there, and we obviously figured that he was the  
 14 one that drove it there. So we would have  
 15 assumed that that was the point where he left  
 16 from. Yes, correct.  
 17 RALPH, Q.C.:  
 18 Q. Right. So at that point are you referring to the  
 19 sort of science of lost behaviour?  
 20 MR. GOOBIE:  
 21 A. We take in our knowledge and training that we've  
 22 had over the years of Lost Person Behaviour and  
 23 the age of Mr. Sweetapple, and the distance that  
 24 being only a couple of hours that he may have

## Page 141

1 travelled, and he was apparently -- what  
 2 information we were told was he was gone to pick  
 3 bake apples and it was a great big bog next to  
 4 him and a trail leading into that bog. And there  
 5 was plenty of bake apples on that bog. That we  
 6 could only assume that was the area that -- on  
 7 the opposite side of the road was a wooded area.  
 8 So we assumed that he wouldn't be gone there  
 9 picking bake apples. He would be gone to the bog  
 10 system.  
 11 RALPH, Q.C.:  
 12 Q. Right. And I mean, did you have a number in mind  
 13 in terms of the distance that you thought that he  
 14 would likely be within?  
 15 MR. GOOBIE:  
 16 A. No. Initially, based on a couple-hour timeline  
 17 and the timeline that he was supposed to have,  
 18 we're told that he was gone picking berries and  
 19 what time it gets dark that time of the year, we  
 20 only assumed a kilometre or so that we would find  
 21 very quickly around the bog system somewhere,  
 22 especially our initial high probability area was  
 23 between the bog and the old woods road that was  
 24 going there, in that little neck of woods that

## Page 142

1 was in between, because figured, okay, you got  
 2 down at the end of the bog and darkness started  
 3 to come on. Well, you cut out through and pick  
 4 up the road, and easier to walk back the road in  
 5 darkness than trying to get down over the bog.  
 6 RALPH, Q.C.:  
 7 Q. Any sense of what that distance would have been?  
 8 MR. GOOBIE:  
 9 A. Length of the bog, I would say, approximately  
 10 half a kilometre.  
 11 RALPH, Q.C.:  
 12 Q. Half kilometre?  
 13 MR. GOOBIE:  
 14 A. Yeah.  
 15 RALPH, Q.C.:  
 16 Q. So that was your sort of assumption that --  
 17 MR. GOOBIE:  
 18 A. That was our high probability area that night.  
 19 And when we got out there and it was a large bog  
 20 and we could see the bake apples on the bog, that  
 21 was our high probability area.  
 22 RALPH, Q.C.:  
 23 Q. Right. And I guess, so if you're doing a half a  
 24 kilometre and you think he's got three, four

## Page 143

1 hours on you, if you'd added 24 hours to that,  
 2 any sense of what kind of distance you would have  
 3 been dealing with at that point in terms of high  
 4 probability areas?  
 5 MR. GOOBIE:  
 6 A. A high probability area would probably put you  
 7 out two kilometres. Two and a half kilometres.  
 8 Right.  
 9 RALPH, Q.C.:  
 10 Q. Which is much further than what you --  
 11 MR. GOOBIE:  
 12 A. Much further than we initially anticipated, yes.  
 13 RALPH, Q.C.:  
 14 Q. Now, I understand it was challenging, I guess,  
 15 for you on the scene because you were the search  
 16 manager, but you weren't actually in the Command  
 17 Post?  
 18 MR. GOOBIE:  
 19 A. Correct.  
 20 RALPH, Q.C.:  
 21 Q. So generally speaking, you're in the Command Post  
 22 when you're the search manager; is that right?  
 23 MR. GOOBIE:  
 24 A. Correct. I would be.

## Page 144

1 RALPH, Q.C.:  
 2 Q. And did you have any radio communication between  
 3 yourself -- I understand you didn't have radio  
 4 communication or cell phone coverage between  
 5 yourself and the people in the Command Post?  
 6 MR. GOOBIE:  
 7 A. Couldn't have no radio contact and no cell phone  
 8 contact between the Command Post and myself. I  
 9 could get radio contact between myself and the  
 10 members in the field and the aircraft above. I  
 11 could have radio contact from where I was  
 12 situated. If I went back to the Command Post I  
 13 had none of it.  
 14 RALPH, Q.C.:  
 15 Q. Oh, I'm sorry, could you repeat that again? So  
 16 you could communicate with the aircraft. And  
 17 could you communicate with members that were  
 18 searching for --  
 19 MR. GOOBIE:  
 20 A. I could communicate with members. Now that was  
 21 intermittent, depending on where they were.  
 22 Sometimes if they went down in a valley or  
 23 between rocks, because basically we operate on a  
 24 VHF system, and a lot of that is line of sight of

## Page 145

1 what you're getting communication.  
 2  
 3 As technology evolved, right now we do have a  
 4 repeater system which gives you further distance  
 5 being able to communicate. But at the moment we  
 6 were only on a Simplex radio system, VHF. So  
 7 you're basically into a line of sight. So if  
 8 someone is gone down in a hole or behind a rock  
 9 or a heavy wooded area that sometimes, no, I did  
 10 not have communication with all in the field.  
 11  
 12 But as your question alluded to, with the Command  
 13 Post, zero communication.  
 14 RALPH, Q.C.:  
 15 Q. Right. And so I guess given your current  
 16 situation, I assume you got a new Command Post;  
 17 is that correct?  
 18 MR. GOOBIE:  
 19 A. We do indeed, yes.  
 20 RALPH, Q.C.:  
 21 Q. And do you ever find yourself in that situation  
 22 again where you have to be outside the Command  
 23 Post?  
 24

## Page 146

1 MR. GOOBIE:  
 2 A. It's still a situation. We just had one a little  
 3 over a year ago. We had a drowning just before  
 4 New Year's and it was in wintertime. So we could  
 5 only get the Command Post so far as the end of  
 6 the plowed road, and then we were 25 kilometres  
 7 in country from that.  
 8  
 9 So again, to make decisions and boots on the  
 10 ground to see what's actually happened, I  
 11 basically did command in there, but the only way  
 12 I was basically able to communicate back with our  
 13 Command Post was through the inReach system.  
 14 RALPH, Q.C.:  
 15 Q. Right. So at the time of the search for  
 16 Mr. Sweetapple, you would've, I guess, yourself  
 17 and, I guess, the co-search manager, I can call  
 18 that, with Red Indian Lake Search and Rescue, you  
 19 guys would have designated which people would go  
 20 where?  
 21 MR. GOOBIE:  
 22 A. Correct.  
 23 RALPH, Q.C.:  
 24 Q. Is that right?

## Page 147

1 MR. GOOBIE:  
 2 A. Yes.  
 3 RALPH, Q.C.:  
 4 Q. And would that have been done from the Command  
 5 Post, or would that have been done from sort of  
 6 the scene?  
 7 MR. GOOBIE:  
 8 A. Mostly the initial search, when we got there  
 9 first, while we were trying to get things  
 10 organized, the initial hasty teams, they were  
 11 done from out by the Command Post. But as we  
 12 moved in and more members got there, then the  
 13 command changed from inside, then, of designated  
 14 who was going where.  
 15 RALPH, Q.C.:  
 16 Q. Right. So the first day you would have been  
 17 directing the JRCC where you thought they should  
 18 go; is that right?  
 19 MR. GOOBIE:  
 20 A. Not direct them where they go, no. Just give  
 21 them a location of a coordinate where the truck  
 22 was last seen, the timeline that played into  
 23 Mr. Sweetapple's disappearance, and what he was  
 24 doing. That he was a berry picker.

## Page 148

1 RALPH, Q.C.:  
 2 Q. Right. So again, I guess, you would have advised  
 3 them what you understood to be the case, which  
 4 was he was lost the day before?  
 5 MR. GOOBIE:  
 6 A. Yes. So like I say, they would then, I guess,  
 7 they'll develop their search plan of their  
 8 strategy from our information that was passed to  
 9 them.  
 10 RALPH, Q.C.:  
 11 Q. Right. With Universal, was it a bit different?  
 12 Are you sort of more hands-on?  
 13 MR. GOOBIE:  
 14 A. When we fly with Universal, I'll explain to the  
 15 pilot, okay, this is what we got. This is where  
 16 the person left from. This is the age. This is  
 17 what they are doing. And we will set up some  
 18 perimeters, but mostly the pilot, through his  
 19 knowledge of flying with the search teams across  
 20 the province and that there, they got a general  
 21 idea of their grid pattern. They will determine  
 22 their grid pattern based on timing.  
 23  
 24 Now, if we're doing, we'll say, a search area and

## Page 149

1 all of a sudden someone calls or more information  
 2 comes that this person was possibly spotted here,  
 3 well, then you would fly to that area. But  
 4 initially, Universal would develop their own  
 5 search plan too as well.  
 6 RALPH, Q.C.:  
 7 Q. Right. So is it most likely though in your  
 8 conversation with Universal you would have sort  
 9 of kept them much closer to the last known  
 10 position, and perhaps wouldn't have been directed  
 11 to go as far down as he was actually found?  
 12 MR. GOOBIE:  
 13 A. That was where you would have started. The  
 14 starting point is where you would have started  
 15 off at the truck and expand your search out  
 16 around. And keep going out, expanding out and  
 17 coming back and covering that area again, because  
 18 it was the highest probability area, especially  
 19 at the first few hours that we flew.  
 20 RALPH, Q.C.:  
 21 Q. Right. And so it's possible that the Universal  
 22 Helicopter never actually flew over -  
 23 MR. GOOBIE:  
 24 A. It's possible.

## Page 150

1 RALPH, Q.C.:  
 2 Q. - Mr. Sweetapple until the day they found him?  
 3 MR. GOOBIE:  
 4 A. Yes, quite possible. Like I say, I don't have a  
 5 flight plan of what they flew and we don't have a  
 6 GPS from our own point of what was flown.  
 7 RALPH, Q.C.:  
 8 Q. Right. We'll hear from Mr. Sweetapple, I guess,  
 9 later. But the other thing I wondered about, and  
 10 I don't know in terms of your training and the  
 11 impact that sort of diabetes can have on someone,  
 12 I'm just curious whether he could have been a  
 13 moving target?  
 14  
 15 Could he have been -- perhaps he didn't sort of  
 16 walk and then stay in the bog where he was found.  
 17 Perhaps he was moving around and still not doing  
 18 very well. Still under the impact of diabetes  
 19 and confused perhaps, but still able to move  
 20 around. Did you consider that a possibility?  
 21 MR. GOOBIE:  
 22 A. I guess it's always a possibility. We can't say  
 23 for sure, because we never seen any indication of  
 24 anywhere else he was. But I guess anything is a

## Page 151

1 possibility.  
 2 RALPH, Q.C.:  
 3 Thank you. Those are my questions.  
 4 MS. BEDFORD:  
 5 Q. Hello, Mr. Goobie, Corrine Bedford. Earlier when  
 6 you were talking about being contacted by the  
 7 RCMP, it was, you said, Constable Dollimount that  
 8 initially contacted you; is that correct?  
 9 MR. GOOBIE:  
 10 A. That's correct, yes.  
 11 MS. BEDFORD:  
 12 Q. Did he indicate when the RCMP had been informed  
 13 of a missing person?  
 14 MR. GOOBIE:  
 15 A. He probably did, but I can't say for sure.  
 16 MS. BEDFORD:  
 17 Q. Okay.  
 18 MR. GOOBIE:  
 19 A. I would only assume -- normally when the RCMP  
 20 gets the call that's a missing person, I know  
 21 that they usually does a little bit of their  
 22 investigation. But I can only assume it was  
 23 close to the timeline that we got the call.  
 24

## Page 152

1 MS. BEDFORD:  
 2 Q. Okay, thank you. When you arrive on scene, who  
 3 decides how the search is going to be conducted?  
 4 MR. GOOBIE:  
 5 A. It usually goes back in the hands of the search  
 6 manager, but it's always in consultation with  
 7 usually the member that's on scene. And usually  
 8 we run by a scenario of what our initial plan is  
 9 going to be. Usually the expertise of the search  
 10 teams that's out there searching. Usually the  
 11 RCMP members, depending on how much they've been  
 12 involved in search and rescue over the years,  
 13 they'll usually rely on our expertise and ask our  
 14 opinions on it. What we're going to do or what  
 15 our game plan is. But usually that's the way it  
 16 works. But usually always in consultation  
 17 between the two agencies.  
 18 MS. BEDFORD:  
 19 Q. So in this particular case, do you know if  
 20 Constable Dollimount had any search and rescue  
 21 experience?  
 22 MR. GOOBIE:  
 23 A. I can't say for sure. He never had any  
 24 experience. That was the first time meeting the

## Page 153

1 gentleman was that night for me. And I think, if  
 2 memory serves me right, he may only have been in  
 3 the area maybe a month or two prior.  
 4 MS. BEDFORD:  
 5 Q. So to your recollection he didn't have a lot of  
 6 knowledge of the area itself?  
 7 MR. GOOBIE:  
 8 A. I can attest to that because that night when it  
 9 was time for him to go off shift to go back, we  
 10 had to take one of our team members to drive down  
 11 with him to direct him back to Grand  
 12 Falls-Windsor, so.  
 13  
 14 Because you got to realize, you're going up in  
 15 the darkness and it's all right for us, we're  
 16 half familiar with the area, but you turns off  
 17 one woods road, then you takes another branch off  
 18 another next woods road and so on and so on. So  
 19 to someone that's not familiar with the area and  
 20 in darkness to leave and go back, the safest  
 21 thing that night -- he had said to us, "I'm not  
 22 real comfortable with going back on my own." So  
 23 we took one of our members and drove back that  
 24 night and we got him back safely to Grand

## Page 154

1 Falls-Windsor.  
 2 MS. BEDFORD:  
 3 Q. So he would have deferred to your team with  
 4 respect to how the search was being conducted; is  
 5 that true?  
 6 MR. GOOBIE:  
 7 A. Yeah. We would have been in consultation.  
 8 Again, with ourselves, Red Indian team, and with  
 9 the RCMP member of basically develop a plan  
 10 between us all of what we were going to do that  
 11 night.  
 12 MS. BEDFORD:  
 13 Q. Okay. And at some point I think you indicated  
 14 that you spoke with the Canadian Armed Forces  
 15 with respect to air support?  
 16 MR. GOOBIE:  
 17 A. I spoke to Sergeant Keith Frampton. Well, it's  
 18 the same role as Danny is in there now. Sergeant  
 19 Williams. Keith was in that role at the time, so  
 20 that was my contact to him.  
 21  
 22 But the only contact I had with JRCC was when  
 23 they called me that night and said that they  
 24 would have an aircraft in for 6:30 the next

## Page 155

1 morning.  
 2 MS. BEDFORD:  
 3 Q. Can you just look at -- can we call up Exhibit  
 4 173, please? Just page 1. Have you seen this  
 5 before at all?  
 6 MR. GOOBIE:  
 7 A. No, it's the first time seeing it.  
 8 MS. BEDFORD:  
 9 Q. Okay. This is just a document that was provided  
 10 by CAF with respect to this particular search.  
 11 MR. GOOBIE:  
 12 A. Okay.  
 13 MS. BEDFORD:  
 14 Q. And if you look down? Can you see it very well  
 15 there?  
 16 MR. GOOBIE:  
 17 A. I can see it.  
 18 MS. BEDFORD:  
 19 Q. Okay, sorry. And this is essentially just the  
 20 direction that would have gone to the flight crew  
 21 with respect to starting the search.  
 22 MR. GOOBIE:  
 23 A. Starting, okay.  
 24

## Page 156

1 MS. BEDFORD:  
 2 Q. And so it has the information about it being a  
 3 missing person. And you are listed as the  
 4 on-scene commander; is that correct?  
 5 MR. GOOBIE:  
 6 A. That's correct, yeah. That's my phone numbers at  
 7 the time.  
 8 MS. BEDFORD:  
 9 Q. Right. And this would have been -- it says the  
 10 time is 5:40. Now, I should be clear. I've  
 11 consulted with my client from CAF and Lieutenant  
 12 Colonel Marshall says that this is 5:40 Zulu  
 13 time, which would be approximately 3:10  
 14 Newfoundland time in the morning?  
 15 MR. GOOBIE:  
 16 A. Yeah.  
 17 MS. BEDFORD:  
 18 Q. Does that --  
 19 MR. GOOBIE:  
 20 A. I think the timeline that I had... Just going  
 21 down through. I had 3:00 was word from JRCC that  
 22 the Cormorant helicopter would be joining the  
 23 search around 6:30 p.m. -- or 6:30 a.m.?  
 24

## Page 157

1 MS. BEDFORD:  
 2 Q. Okay. And so at that time it also lists on this  
 3 document that the medical information says  
 4 diabetic?  
 5 MR. GOOBIE:  
 6 A. Yes, I see it there now. Yeah.  
 7 MS. BEDFORD:  
 8 Q. So would you have been the person who relayed  
 9 that information to the Canadian Armed Forces?  
 10 MR. GOOBIE:  
 11 A. No. Like I say, I had no direct contact with  
 12 them until they called and said so. At that  
 13 time, I would say that would have come from the  
 14 Missing Persons file that was created back at the  
 15 RCMP detachment. But because of the  
 16 communications to the site, we didn't get that  
 17 until Corporal Paul came up the next morning with  
 18 it.  
 19 MS. BEDFORD:  
 20 Q. So the morning of the 28th?  
 21 MR. GOOBIE:  
 22 A. Sunday morning was the 28th, yes.  
 23 MS. BEDFORD:  
 24 Q. Okay.

## Page 158

1 MR. GOOBIE:  
 2 A. So that's when we would have seen the Missing  
 3 Person file. That's usually passed to us in a  
 4 paper copy.  
 5 MS. BEDFORD:  
 6 Q. Okay. So on the morning of the 28th, you knew at  
 7 that time that Mr. Sweetapple was a diabetic?  
 8 MR. GOOBIE:  
 9 A. Diabetic, correct.  
 10 MS. BEDFORD:  
 11 Q. Okay. Thank you. So when the search was called  
 12 off for those three days, essentially, you said  
 13 that the RCMP were the ones that directed you  
 14 that the search was being discontinued at that  
 15 time; is that correct?  
 16 MR. GOOBIE:  
 17 A. That's correct, yes.  
 18 MS. BEDFORD:  
 19 Q. When that happens, when a search is being called  
 20 off, do you have any input into whether that's  
 21 being done or not? Do you have a say in whether  
 22 it's called off or whether it continues?  
 23 MR. GOOBIE:  
 24 A. Not a say. We can record what we seen. We can

## Page 159

1 pass our opinions. But regards of say if it's  
 2 continued or shut down, no.  
 3 MS. BEDFORD:  
 4 Q. Okay. So ultimately, the decision is made by the  
 5 RCMP. Is that what you're saying?  
 6 MR. GOOBIE:  
 7 A. Correct, yes.  
 8 MS. BEDFORD:  
 9 Q. Okay. And do they consult with you prior to  
 10 that?  
 11 MR. GOOBIE:  
 12 A. They will consult with us as to get our  
 13 information of what we found or whatever. That  
 14 was all passed to the members that was there.  
 15 And but the initial, I guess, call of whether it  
 16 stays going or shuts down, that's told to us of  
 17 what we do.  
 18 MS. BEDFORD:  
 19 Q. Okay. Do you recall Corporal Brown being  
 20 involved? The dog man?  
 21 MR. GOOBIE:  
 22 A. Corporal Brown, yes.  
 23 MS. BEDFORD:  
 24 Q. Okay. Can I have you bring up Exhibit 174,

## Page 160

1 please? Sorry, I'm just looking for the right  
 2 page number. It would be the notes from Corporal  
 3 Brown that are in the OneNote. No, I want the  
 4 whole thing. Yeah.  
 5  
 6 Here it is there. They start at the very bottom  
 7 of page 5, and then they -- but that's just his  
 8 name, and then the bulk of the information starts  
 9 on page 6. Yes, thank you.  
 10  
 11 If you, sorry, scroll down to page 7, and toward  
 12 the bottom of page 7, the last three paragraphs.  
 13 The dog man, Corporal Brown, took a significant  
 14 amount of notes. And by a miracle they were  
 15 actually retrieved.  
 16  
 17 So I do have information from the dog man, and  
 18 I'm going to just read you the last two  
 19 paragraphs of what he said. "SAR returned to the  
 20 Command Post area at approximately 1500 hours."  
 21  
 22 Sorry, this would be on the date that the search  
 23 was discontinued. "They advised me and Corporal  
 24 Paul that their search had been negative. The

## Page 161

1 team leader advised, after consultation with his  
2 team members, that there was nothing else that  
3 could be searched at this time. He being an  
4 experienced SAR member advised that the area had  
5 been searched and researched several times, and  
6 not one clue of the missing male's location was  
7 found. We were all in agreement that nothing  
8 more could be done search-wise. We all agreed  
9 that usually some evidence is located, but  
10 nothing had turned up."

11  
12 Do you recall those types of discussions  
13 occurring amongst the group?

14 MR. GOOBIE:

15 A. We had discussions. Like I say, normally we find  
16 footprints. Could be a piece of clothing or  
17 anything in the area. But from all the air  
18 search, the ground search --

19 UNIDENTIFIED MALE SPEAKER:

20 Turn on your microphone.

21 MR. GOOBIE:

22 A. Like I say, that day, based on all the knowledge  
23 that was brought back to us, usually we find,  
24 like, a footprint or clothing or some article or

## Page 162

1 something to us to state that there was someone  
2 in the area.

3  
4 All the air support that was done, everything  
5 turned up negative. And from the timelines that  
6 we are dealing with, we are still into negative  
7 results from everything that we had done.

8 MS. BEDFORD:

9 Q. Okay. And I'm going to read the last paragraph  
10 or that second to last paragraph that he wrote  
11 because I think it has certainly some nice  
12 comments of your SAR group.

13  
14 "I have worked searches in BC, Alberta, Nova  
15 Scotia and NL (Newfoundland). Since becoming a  
16 PSD handler in 1994, I have been involved in  
17 numerous missing person searches. And like SAR,  
18 usually there is some evidence to assist search  
19 teams in locating a missing person. However,  
20 this case revealed nothing for search teams to  
21 use to pinpoint possible whereabouts of missing  
22 male. I found the SAR members to be very  
23 dedicated. They knew the area very well and did  
24 not leave one stone unturned. The search was

## Page 163

1 suspended for the time being."

2  
3 So I just wanted you to know that he had  
4 certainly some positive comments about your team  
5 and how thorough their search was during that  
6 period of time.

7 MR. GOOBIE:

8 A. Certainly appreciate it.

9 MS. BEDFORD:

10 Q. One more question. Oh two, sorry. You said  
11 there was a debrief or a meeting with you at your  
12 members at the RCMP detachment on August 1st?

13 MR. GOOBIE:

14 A. That's correct, yeah.

15 MS. BEDFORD:

16 Q. And when that meeting was held, you found out or  
17 it came to your knowledge that perhaps  
18 Mr. Sweetapple had been missing for a  
19 significantly longer period of time than what you  
20 initially thought?

21 MR. GOOBIE:

22 A. That's my recollection that, yeah, it was the  
23 timing that we found out that, hey, we were  
24 behind 24 hours on initial search.

## Page 164

1 MS. BEDFORD:

2 Q. Who gave you that information? How did you find  
3 that out?

4 MR. GOOBIE:

5 A. I don't know if it's as we were discussing the  
6 timelines of everything that it came to light  
7 that he went missing on a Friday instead of the  
8 Saturday. But it seemed like it was, if memory  
9 serves me right, at that time we could be into a  
10 bigger search area than we initially thought  
11 about.

12 MS. BEDFORD:

13 Q. Do you know whether the RCMP was aware that he  
14 had been missing for longer than they initially  
15 thought until that meeting?

16 MR. GOOBIE:

17 A. I'm not sure. Like I say, it was just through  
18 our assumption of the way that, I guess, either I  
19 interpreted or was told it. But that was my  
20 first recollection that the timelines was  
21 changing.

22 MS. BEDFORD:

23 Q. Okay. And during that meeting do you recall any  
24 discussion about the generator at the cabin?

## Page 165

1 MR. GOOBIE:  
 2 A. No, I don't remember anything on a generator.  
 3 MS. BEDFORD:  
 4 Q. Okay.  
 5 MR. GOOBIE:  
 6 A. I don't know if -- Jody was there, okay.  
 7 MS. BEDFORD:  
 8 Q. Those are all my questions. Thank you very much.  
 9 MR. GOOBIE:  
 10 A. Thank you.  
 11 MR. BUDDEN:  
 12 Two follow-up points. I've neglected to give  
 13 Mr. Blackmore the chance to speak. But just  
 14 before I do, perhaps, Ms. Bedford, you could  
 15 explain to us a little bit about the records  
 16 available. They're a little thinner than we've  
 17 seen in the other three searches we'll be looking  
 18 at. And perhaps you can explain a little bit  
 19 about why that is so.  
 20 MS. BEDFORD:  
 21  
 22 Yes, I was actually intending to do that when my  
 23 team was so that they could explain a little bit  
 24 more. But I can give a brief summary.

## Page 166

1 MR. BUDDEN:  
 2 Okay. Sure.  
 3 MS. BEDFORD:  
 4 Essentially, given the age of this file and the  
 5 circumstances, the file was purged. So the only  
 6 information that the RCMP has with respect to  
 7 this search are just a few notes that people that  
 8 they kept personally.  
 9  
 10 Anything in the actual official file had been  
 11 purged pursuant to government policy.  
 12 MR. BUDDEN:  
 13 And that purge, I understand, took place in  
 14 something like 2015, long before this inquiry was  
 15 called or the records were requested.  
 16 MS. BEDFORD:  
 17 Yes, that's correct.  
 18 MR. BUDDEN:  
 19 Q. Thank you. And Mr. Blackmore, I was going to  
 20 give the opportunity to you, if you wish to, to  
 21 comment briefly on the search or anything else.  
 22 I understand that I believe you were in touch  
 23 with the search team throughout the course of the  
 24 search. And then I have a follow-up question

## Page 167

1 for -- well, maybe I'll do the Mr. Goobie  
 2 question first.  
 3  
 4 Mr. Goobie, would the Exploits team have  
 5 continued with the search past those first two  
 6 days if a request had been made of you to do  
 7 that?  
 8 MR. GOOBIE:  
 9 A. Yes. Like I say, if the request came in,  
 10 definitely we would have put members on the  
 11 ground. Myself and our team and Red Indian team,  
 12 certainly we would. Numbers, I can't tell you  
 13 what we would have had, but definitely would have  
 14 had a search team on the ground.  
 15 MR. BUDDEN:  
 16 Q. Mr. Chippett, for the Red Indian team, could you  
 17 answer the question?  
 18 MR. CHIPPETT:  
 19 A. Yeah. Our team would have been there in whatever  
 20 numbers as possible. Whenever requested by the  
 21 RCMP, we do our best whenever we can with  
 22 whatever numbers and whatever we can do to help.  
 23 MR. BUDDEN:  
 24 Q. And we understand fatigue. Obviously, people can

## Page 168

1 only work these kind of hours and these kind of  
 2 conditions for so long a day. But were there  
 3 other resources available? In such  
 4 circumstances, did you feel and do you feel they  
 5 could call on neighbouring teams to say, look,  
 6 we're two or three days into this, we're beat  
 7 out, can you help us?  
 8 MR. GOOBIE:  
 9 A. Certainly with the vast number of volunteer  
 10 members that we have across the province, we rely  
 11 on each other and there's plenty of neighbouring  
 12 teams that if the need arises we do not hesitate.  
 13  
 14 Our team personally have had teams in here,  
 15 again, from Red Indian Lake team. Had teams in  
 16 from Deer Lake. And we had Harry's team from  
 17 St. John's with us on particular searches.  
 18  
 19 So geography don't change with us. We can get  
 20 the resources if needed.  
 21 MR. BUDDEN:  
 22 Q. Yes. So just to tie all that together. The  
 23 Exploits presence and the Red Indian presence may  
 24 have decreased because of fatigue, but the NLSARA

## Page 169

1 volunteer presence would have continued. Is that  
 2 what you are saying?  
 3 MR. GOOBIE:  
 4 A. That is correct.  
 5 MR. BUDDEN:  
 6 Q. Okay. Well, that might be a good point to turn  
 7 it over to Mr. Blackmore to see if he has  
 8 anything to add to what we've heard. And then  
 9 we'll see if anybody else has any follow-up  
 10 questions. And then we'll move on to other  
 11 topics.  
 12 MR. BLACKMORE:  
 13 Harry Blackmore. I have nothing to say overall.  
 14 The search was done the way we always start. We  
 15 get our information from the police to whatever  
 16 they have. They give it to us. We start.  
 17  
 18 As Roger as said, we thought at that search that  
 19 they had a two-hour head start. So, yes, we  
 20 would start doing the hasty searches right away  
 21 and continued on and look for air support and  
 22 everything else.  
 23  
 24 And as the search continues, when you find

## Page 170

1 nothing whatsoever, it is everybody's feeling  
 2 that the person we're looking for has gone down.  
 3 And they most likely can't sing out to you or  
 4 anything else. So that's the reason you start  
 5 these grid searches.  
 6  
 7 When you're done to grid searches you're looking  
 8 for evidence to help find the person. You're  
 9 also hoping that you come across the person.  
 10  
 11 Depending on Mr. Sweetapple's conditions, and  
 12 that would even play a factor into what Roger and  
 13 them decided when they're in the grid searches.  
 14 And like he said, they did find out about there  
 15 being a diabetic and everything else after. That  
 16 all plays into it. But it's a systematic search  
 17 pattern that we do in calling in the teams.  
 18  
 19 I had spoke with Roger two or three times at that  
 20 search. I spoke to Sergeant Keith Frampton also.  
 21 And we all think that the man had to go down due  
 22 to his condition, and, therefore, you're looking  
 23 for a person that's down and can't move. So that  
 24 changes the scope of everything when you're doing

## Page 171

1 that.  
 2  
 3 As you said, the boys came back the fifth day.  
 4 They put a -- or the seventh day. They put boats  
 5 in the pond and everything else. You're looking  
 6 for everything. You're drawing at straws then.  
 7 So as more information comes in from the police,  
 8 they can keep continuing their investigation.  
 9  
 10 As that continues, if they deem it necessary,  
 11 we'll bring in five, six teams. It doesn't  
 12 matter. We've had teams -- those searches with  
 13 five full teams for three or four days because of  
 14 resources and depending on what you're looking  
 15 for. But what Roger and them did with their team  
 16 was nothing but miraculous, along with the Red  
 17 Indian Lake team. They drew on their members.  
 18  
 19 Then it starts to become a search that you end up  
 20 bringing in aircraft again, as they did on the  
 21 last day, to start widening. Take this square  
 22 that we're talking about, bring it out and make  
 23 it wider and hopefully look for somebody. And  
 24 luckily enough they did spot Mr. Sweetapple's

## Page 172

1 orange hood. But it's all done systematically.  
 2  
 3 And once the information is given to us by the  
 4 police, it's all joint command. Everybody here  
 5 is talking about incident commanders, search  
 6 managers. They're closer than husband and wife  
 7 when they're in that Command Post. Everything is  
 8 done together.  
 9  
 10 And, yes, the police have the ultimate say on  
 11 starting a search and shutting down a search,  
 12 that's who we follow, but it's usually always  
 13 done in conjunction with everybody. Because you  
 14 can't find nothing, you're saying where could he  
 15 have gone? How far do we have to go now to try  
 16 to find this? And then you have to sit back and  
 17 regroup, replan, and figure out what you can do  
 18 to a search.  
 19  
 20 All the teams are trained identical to the best  
 21 of our ability, and they all follow the same  
 22 standards. So exactly what Kirby has done from  
 23 Red Indian Lake, what Roger has done, they done  
 24 it together. They knew exactly what they were

## Page 173

1 going to do between them. And it comes down to  
 2 then as hit and miss, if you can find the man or  
 3 not. Because once a person is down, it changes  
 4 the whole dynamics of what you're looking for.  
 5 We're not looking for a person out in the middle  
 6 of woods waving his cap to a plane or something.  
 7 So, therefore, once that's done, then it starts  
 8 to replan it. And then, the only way you're  
 9 going to find that gentleman most likely is  
 10 either with aircraft or if you start doing grid  
 11 searches.

12  
 13 And to do a grid search, say five kilometres by  
 14 five kilometres, we'd want 20 teams for about a  
 15 month. If you really want to go over it and find  
 16 out exactly what's what.

17  
 18 So I can see where there was some hesitation in  
 19 continuing. It was great that they started back  
 20 up. Through investigation, I guess, by the  
 21 police they came up with something, and that's  
 22 the way it went.

23  
 24 But overall, this search went, as we've seen from

## Page 174

1 across the province already, exactly the same way  
 2 that every search starts and pretty well ends.

3  
 4 It just systematically training and everything  
 5 goes with it, in conjunction with the police.  
 6 But everybody is together in that Command Post to  
 7 make the decisions and come up the evidence that  
 8 you find. But when you find nothing whatsoever,  
 9 it is almost impossible.

10  
 11 Great Mr. Sweetapple survived. Thank God. But  
 12 he is one in 1,000 to be that far down and they  
 13 actually found. Because if he had to be inside  
 14 the heavy woods, they probably never would have  
 15 found him. But we're lucky in this case that the  
 16 guys in the helicopter spotted him. And I don't  
 17 know for Mr. Sweetapple, but I say with him  
 18 throwing his hood over his head was the number  
 19 one thing that let everybody find him. Because  
 20 it gave us something that they pinpointed that  
 21 wasn't normal to the ground. Because when we're  
 22 looking for evidence, we're looking for anything  
 23 that's not natural to the forest floor. And I  
 24 mean everything.

## Page 175

1 We found everything. From cigarette butts to  
 2 needles to anything you can think of we found  
 3 over the years. And that's the way that search  
 4 is done. And that's when they were doing their  
 5 grid search, they were looking for something then  
 6 that might have put them in the direction that he  
 7 went. And then you change your tactics again.

8 MR. BUDDEN:

9 Q. And I'll ask you the same question just for  
 10 completeness. If the team had known it was a  
 11 27-hour head start rather than, say, a two- or  
 12 three-hour head start, would the search tactics,  
 13 right from the get-go have been different? The  
 14 search strategizing been different?

15 MR. BLACKMORE:

16 A. I don't think the tactics would have changed.  
 17 The area might have been expanded, but the  
 18 tactics would be the same, because you still have  
 19 to start from the last known position, which is  
 20 the truck, regardless. And once the area is  
 21 done, but the tactics themselves go the same way.  
 22 It just expands, expands, expands.

23 MR. BUDDEN:

24 Okay. Thank you. Mr. Commissioner, I had no

## Page 176

1 further evidence to call with respect to this  
 2 particular search from these particular  
 3 witnesses. And I plan to move on to other areas.  
 4 I don't know if you wish to do that right now?

5 COMMISSIONER IGLOLIORTE:

6 Q. Thank you very much. Just a couple of questions,  
 7 let's try Mr. Goobie. So in more detail, what  
 8 does your Command Post look like? It's not a  
 9 yellow bus anymore with an antenna on the back?  
 10 How much did that cost and how long have you had  
 11 it?

12 MR. GOOBIE:

13 A. Certainly, the look of our new Command Post is  
 14 nothing like a yellow school bus. Back, I guess  
 15 about four and half, five years ago, the useful  
 16 life of our school bus, which was retired when we  
 17 got it, we had it for approximately ten years.  
 18 So you can imagine the condition it was in by the  
 19 time we were ready to get rid of it.

20  
 21 So among our team members we decided that, hey,  
 22 we needs to be proactive and get a replacement  
 23 for our Command Post. So we developed a  
 24 committee among our volunteer members and we

Page 177

1 started in with a plan of what we like to  
 2 envision to see as a Command Post and to try to  
 3 start the fundraising efforts.  
 4  
 5 And as you can imagine, buying a new command  
 6 unit, buying a new car, you knows the costs  
 7 that's associated with it. So when you're buying  
 8 a truck with a box on it and fully equipped with  
 9 all types of facilities inside of it, the price  
 10 tag is enormous.  
 11  
 12 So the initial price that came in for our Command  
 13 Centre was \$350,000. Well, at that point, was  
 14 wow. This is a five-year, ten-year project down  
 15 the road trying to raise that kind of money.  
 16  
 17 So the team that we had there on our committee,  
 18 these guys, let me tell you, went at this face  
 19 first in thinking outside the box. How can we  
 20 raise money? To try to raise \$350,000 by doing  
 21 car washes or doing moose burger sales, not going  
 22 to happen.  
 23  
 24 So the guys developed some plans. Talked to some

Page 178

1 people. We ended up signing up on a plan --  
 2 MR. SNOW:  
 3 A. Cameron Snow, Exploits Search and Rescue.  
 4 Basically, there's a foundation in Canada that  
 5 will (inaudible) a subscription and they will  
 6 give you the critical information for what places  
 7 across the nation give money in large sums to  
 8 what type of groups. So children's group,  
 9 recreation, search and rescue. And we availed of  
 10 that service. I think we paid \$500 to start.  
 11 MR. GOOBIE:  
 12 A. Thank you, Cameron. So we went off on that  
 13 route. We approached the businesses around the  
 14 community here, which were phenomenal coming on  
 15 board with us. We had some of the local banks  
 16 support us in some of the efforts that we had.  
 17 Test drive events for new vehicles and stuff like  
 18 this that created us money, but it wasn't big  
 19 money. And we had a thermometer made up that we  
 20 used to bring around with us. And here was this  
 21 thermometer and here's your \$350,000 goal at the  
 22 top and you had just a little bit of red in the  
 23 bottom of it.  
 24

Page 179

1 So first when we went out everyone would look at,  
 2 oh, those guys is crazy thinking they're going to  
 3 raise that kind of money around here. But as we  
 4 started to develop and that little bit of red got  
 5 a little bit more and a little bit more, but when  
 6 this foundation that we were into, when we got a  
 7 couple -- I know I was down in Bonavista at the  
 8 time on vacation and I got a phone call from  
 9 Cameron and said we just got \$75,000 donated to  
 10 us. And wow.  
 11  
 12 So when we do our next fundraising efforts,  
 13 here's the bottom part of our thermometer is  
 14 full. So that started to get the ball rolling.  
 15  
 16 Then the boys started off some consultations with  
 17 the local Lion's Club in Bishops Falls. And  
 18 those guys seen firsthand what we had done in the  
 19 past with searches, how we helped out people in  
 20 the past, and they were gung-ho to come onboard  
 21 with us. So there is a Lion's Club foundation  
 22 worldwide.  
 23  
 24 So they put in a proposal in conjunction with

Page 180

1 their committee members and wrote a proposal and  
 2 sent it off to Lion's International. And the  
 3 process went on for five or six months. And  
 4 anyway, we got word back that we were in the  
 5 running. We missed the first lot of money that  
 6 was give out, but it was another couple of months  
 7 there was going to be another lot of money give  
 8 out.  
 9  
 10 And anyway, when the next round of money that  
 11 they were planning to giving out, the highest  
 12 that you can reach from the Lion's Foundation is  
 13 \$100,000. And that \$100,000 is U.S. And we were  
 14 fortunate enough to be given that grant of  
 15 \$100,000 U.S. So here it is, thermometer is  
 16 going up again. And that just went on and on and  
 17 on from the foundation. Original foundations.  
 18  
 19 We started getting some that we still don't know.  
 20 It was one church group in Toronto that we don't  
 21 know any affiliation, but they sent us \$5,000.  
 22 So by this time we were very close to our  
 23 \$350,000 goal. The truck was six or eight months  
 24 out to get built, so we says, boys, we got this

## Page 181

1 far, we're going to get there. And we placed our  
2 order for our Command Post.  
3  
4 And so by the time the Command Post got there and  
5 we did a little bit more digging into exactly  
6 what we needed and what would benefit us, the  
7 final product flowed in here shortly after New  
8 Year's, and had a \$400,000 price tag.  
9  
10 When she rolled in, she was bought and paid for  
11 with zero amount of government money that was put  
12 into it. So this was all corporate donations,  
13 fundraising by our members. And we now have a  
14 \$400,000 state-of-the-art Command Centre located  
15 in Central Newfoundland.  
16 COMMISSIONER IGLOLIORTE:  
17 Q. Thank you very much. Following this search and  
18 realizing how it all fell through -- not fell  
19 through, but how it all developed, did you have a  
20 session with your group or with the RCMP and say,  
21 boys, what's the lessons learned? Or do you look  
22 at it that way when you have a search over?  
23 MR. GOOBIE:  
24 A. With every search that we're involved with, we

## Page 182

1 always have a debriefing session, whether it be a  
2 formal debriefing session, like we are here set  
3 up in our meeting room at our building, or  
4 whether it be sat on the back of the tailgate or  
5 at the Command Post when we're finished. But my  
6 point of view, and always been my model, when we  
7 finish a search, let's not always pat ourselves  
8 on the back and say, boy, we did this good, we  
9 did this good, and we did that good.  
10  
11 I say to my members, what did we do good, what we  
12 did bad, or what could we do different. And we  
13 go around the room and we talk about what we did.  
14 And the end of the day when we're finished there,  
15 we talk about what we do. And we use the lessons  
16 from one search, whether it be good or bad, and  
17 we would employ those into the next scenario out.  
18  
19 And we're always referring to when we get out on  
20 a search, you always hear someone bring up  
21 "remember when." And I guess experience is good.  
22 You can look at all the textbooks and everything  
23 that you like. It's certainly a benefit to you,  
24 but the experience and the knowledge that one

## Page 183

1 gains over the years certainly plays a big factor  
2 in the dedication and the outcomes of what we get  
3 in the searches in this province.  
4 COMMISSIONER IGLOLIORTE:  
5 Q. So Mr. Blackmore is going to give the inquiry an  
6 overall view of how much time each of the 25  
7 groups for search and rescue across the province  
8 spend.  
9  
10 But just from your perspective, talking about  
11 your team, just give us an idea of how much  
12 effort goes into volunteering to searches? The  
13 whole gamut of activities you do?  
14 MR. GOOBIE:  
15 A. Over the past year and a half, just speaking on  
16 behalf of Exploits team, we had put in 16,050 man  
17 hours or person hours over the last year and a  
18 half.  
19  
20 Now, that includes searches, our training,  
21 fundraising. Every effort. Cleaning equipment.  
22 You know, we're over there two and three, four  
23 times a month. Just our regular routine of  
24 making sure the generators are starting. Make

## Page 184

1 sure that the lights are all charged. Radios are  
2 charged.  
3  
4 So this is just ongoing committees that we have  
5 set up in our building that someone might be  
6 looking after radios, someone might be looking  
7 after generators, but it's continuous.  
8  
9 Every day there is someone in our building doing  
10 tasks of making sure equipment is ready, because  
11 we don't know when the phone call is coming. It  
12 could be five minutes from now. It could be five  
13 days from now.  
14  
15 We don't want to get the calls, but we do get the  
16 calls. Right. And when the calls come in, we  
17 want to be ready.  
18 COMMISSIONER IGLOLIORTE:  
19 Q. What kind of community recognition or personal  
20 recognition for each of you do you get? What  
21 kind of feeling do you have about what you do  
22 over and above your own sense that you're doing  
23 something good?  
24

## Page 185

1 How do people in your community or in the  
 2 province generally react to your work?  
 3 MR. GOOBIE:  
 4 A. Overall, I can't say enough for the community and  
 5 the citizens in our search areas. The problem  
 6 that search teams got, the locations that our  
 7 searches is usually located, is usually not in  
 8 the middle of an urban centre.  
 9  
 10 It's not like a fire department, if it's a fire  
 11 in the middle of a town. The red flashing lights  
 12 is there. Everybody is passing by. Everybody  
 13 sees what you're doing.  
 14  
 15 The problem with search and rescue teams within  
 16 the province, and I guess everywhere, is most  
 17 times we're not located in these areas. We could  
 18 be 20, 50, 100 kilometres up in the woods. The  
 19 only one who sees us is the moose and the bears  
 20 and that stuff that's around us. But the general  
 21 public don't see what we do. And sometimes we're  
 22 guilty, I guess, of not letting the public know  
 23 what we do. But a few years ago, which one of  
 24 the good things, I guess, with social media is to

## Page 186

1 put the little blurbs out there of the search  
 2 team was out last night. Had a missing person.  
 3 Good outcome. We're all back home safe. But the  
 4 next day when you walks down the street, you'd be  
 5 surprised. It's not that you wants to hear the  
 6 thank you's, and that's not what we do it for,  
 7 but when you walk down the street and someone  
 8 comes along and says "great job, guys," what else  
 9 do you need for the efforts that you put in.  
 10  
 11 It is just self-gratification that you know you  
 12 served a purpose out there, and you're bringing  
 13 back to the people that is in need at the time.  
 14 COMMISSIONER IGLOLIORTE:  
 15 Q. So from one to the other search and rescue  
 16 groups, there's always somebody who's a techie.  
 17 Who's going to teach you about the radios or  
 18 understands that kind of stuff. Who on your team  
 19 does that?  
 20 MR. GOOBIE:  
 21 A. We have several, I guess, different types of  
 22 techies. We got radio techies. We got computer  
 23 techies. That usually we got a couple of key  
 24 individuals. Keith Lindell is usually our radio

## Page 187

1 techie. We got Trevor Miller and Tyson Baldwin  
 2 that is our computer techies. And these guys are  
 3 your go-to. That you get out there and, yeah,  
 4 most of us can operate a computer, but when we  
 5 get in the middle of a search and we gets a black  
 6 screen come up, everyone else is "Where's Keith?"  
 7 or "Where's Tyson?" to get us out of this bind.  
 8  
 9 And you got to realize, we got 50 people on our  
 10 team. And the vast knowledge and the different  
 11 walks of life everyone comes from, everyone  
 12 serves a major purpose in making it a team and  
 13 making everything flow smoothly.  
 14  
 15 We got mechanics and we got paramedics and we got  
 16 computer techs, and on and on and on, just to  
 17 name a few. And everybody brings something to  
 18 the table that's very important. And even  
 19 age-wise, we got a vast array of ages from early  
 20 20s up into the 70s. But every one of these  
 21 people play a key role in our operations and  
 22 serve a valuable asset to the team.  
 23 COMMISSIONER IGLOLIORTE:  
 24 Q. Anybody else?

## Page 188

1 MR. CHIPPETT:  
 2 A. We go from one side of the spectrum to the other.  
 3 Roger has a list of guys waiting to get on. We  
 4 have a little team. We have 24 members. We have  
 5 a good team. When guys, people are working,  
 6 people have family commitments, we don't have a  
 7 400,000 Command Centre. We got a 24-foot  
 8 enclosed trailer that the association bought us.  
 9 We got a truck that we bought from the  
 10 association, but we got a good core member of  
 11 teams.  
 12  
 13 So regardless of the size of the teams, if you  
 14 got a good core of members that's dedicated  
 15 volunteers, that every time the phone goes off,  
 16 two o'clock in the morning, 12 o'clock, it don't  
 17 make no difference. Guys jump up, you leave the  
 18 dinner tables and they just go.  
 19  
 20 If it's something we can't handle, we call Roger.  
 21 Roger is right aboard. We got mechanics and  
 22 paramedics. And we get into the techie stuff, we  
 23 have trouble, we calls Trevor. Trevor says what  
 24 can we do?

## Page 189

1 So when you gets into both spectrums of all this  
2 volunteer stuff, no one is at this for a pat on  
3 the back.  
4  
5 A few years ago we rescued a snowmobiler. If we  
6 didn't go get him, he would have froze to death.  
7 He would have froze to death where he was to.  
8 The boys were up with us. A month or so later we  
9 gets a phone call come up to the restaurant.  
10 Five or six members. He bought us lunch. He was  
11 thankful for us that dedicated our time and our  
12 hours to say, boys, let's go over and do a bit of  
13 gear in the shop and let's look at this stuff.  
14  
15 So regardless of how big the teams are and how  
16 small the teams are, if you got a good core of  
17 good volunteers that's dedicated to this  
18 organization -- and where I'm from, I'm assistant  
19 coordinator. I'm assistant fire chief. Half the  
20 fire department is search and rescue. So when it  
21 goes off regardless, they're there.  
22  
23 So that's what all this stuff is about. It's a  
24 group of core guys that's dedicated to help

## Page 190

1 people. That's all we want to do is just help  
2 people in whatever we can do.  
3 THE CLERK:  
4 All rise. We'll adjourn for lunch and be back at  
5 2:00.  
6  
7 **(Recess)**  
8  
9 THE CLERK:  
10 All rise. This Commission of Inquiry is now in  
11 session. Please be seated.  
12 MR. BUDDEN:  
13 Yes, Mr. Commissioner, I'm going to pick up sort  
14 of where you left off with asking the team  
15 members of both teams some questions about their  
16 fundraising and other activities such as we've  
17 discussed with other teams. And so I'll start  
18 with --  
19 COMMISSIONER IGLOLIORTE:  
20 (Inaudible).  
21 MR. BUDDEN:  
22 Yeah. I was about to say, I'll start with that.  
23 Mr. Goobie and his team have been kind of enough  
24 to bring some of their equipment around,

## Page 191

1 particularly the Command Centre which he's  
2 explained was raised largely from the resources  
3 of the local community and with the help of  
4 various groups, such as the International Lion's.  
5  
6 And there's another piece of equipment that  
7 they've brought here that he will explain about  
8 how they came to have that.  
9  
10 So the invitation is to everybody here at the  
11 conclusion of today's session. The equipment is  
12 at the far end of the parking lot. It's pretty  
13 hard to miss, so I don't think I need to say more  
14 than that. And afterwards, everybody should go  
15 out.  
16  
17 I've had the benefit of looking at the stuff.  
18 It's pretty impressive. And I would expect most  
19 people here would want to also see it.  
20  
21 So anything to add to that, Mr. Goobie?  
22 MR. GOOBIE:  
23 A. No. Like I say, certainly open up the invitation  
24 to anyone that wants to look and certainly ask

## Page 192

1 questions. It's there to look at and see what we  
2 got.  
3 MR. BUDDEN:  
4 Q. Thank you. And we've heard from both you and  
5 from Mr. Chippett about the relative equipment  
6 that each of you with your size of community and  
7 size of teams has.  
8  
9 When we met the other day, you told me a bit of a  
10 story of how you came to have the second piece of  
11 equipment out there today. I'll call it the  
12 pickup, because it's a pickup base.  
13  
14 Can you tell us a little bit more about that?  
15 What it is and how you came to have it?  
16 MR. GOOBIE:  
17 A. So approximately about five years ago we had a  
18 missing person in the Charles Brook area here in  
19 Central. A gentleman went to go fishing and  
20 didn't return home. We conducted a search. It  
21 was towards the, I guess, bit of spring of the  
22 year. It wasn't much snow cover, but there was  
23 ice in places.  
24

## Page 193

1 We searched for the first day with negative  
2 results. On the second day, we had air support  
3 and I myself went up in the helicopter. We  
4 searched quite an intensive area on the land, and  
5 didn't come up with any sign whatsoever that he  
6 was riding on a quad. No sign of the quad. No  
7 tracks. Nothing.

8  
9 As we were flying, we came upon sort of a salt  
10 water inlet is what it was. And the inlet is  
11 used for mussel farming. And when we got up in  
12 the end of the inlet, there was sort of like an  
13 abnormality with the ice in the area, that it  
14 didn't look like the rest of the ice.

15  
16 So I asked the helicopter pilot if he could  
17 circle back around again. He circled around it.  
18 Then I asked him to turn around again and I  
19 videotaped it as we were flying over it. So then  
20 I asked him again how close down to the ice  
21 surface he could put me so I could get a real  
22 close view.

23  
24 When I got down close to the ice surface I could

## Page 194

1 see particles of ice that were sort of put out  
2 from this trench that seemed to be there, and it  
3 looked like it was broken and refroze again.

4  
5 So we had a contractor come in and plow the road  
6 down so we could get to the area. We brought in  
7 our hovercraft and moved our search operations  
8 down to the area. And then we spent another day  
9 breaking up ice with our hovercraft and trying to  
10 locate the gentleman.

11  
12 On the end of that third day, we did recover the  
13 person's quad frozen just underneath the surface  
14 of the ice. And the next day, in turn, located  
15 and recovered the body to bring closure to the  
16 family.

17  
18 So the search was done and over with. So I guess  
19 it was roughly about a year later after our  
20 Command Post was done and unveiled. And anyway,  
21 this lady came forward to one of our team members  
22 and said you helped out our family. I'd like to  
23 do something for you guys.

24

## Page 195

1 So always when the family wants to give back to  
2 our team, we try to earmark it for a piece of  
3 equipment. So she put off a fundraiser in Norris  
4 Arm South and raised close to \$20,000 for us. So  
5 we were just baffled, coming from a small  
6 community and calls you up and says we made  
7 \$20,000 last night in a fundraiser in memory of  
8 my husband. We were floored.

9  
10 So we had talked. Our pickup, an ex-Hydro  
11 vehicle that we had there, we had talked about  
12 replacing it. But again, the dollars wasn't  
13 there for us to be able to do it. So when she  
14 came to us and said I got \$20,000 to go towards  
15 it, well, we said we got no other choice but to  
16 hit the streets again and try to come up with the  
17 rest of the money.

18  
19 So we met with the local dealership here and made  
20 some pretty good deals with them for a new  
21 pickup. And the result of it is what you see out  
22 in the parking lot.

23  
24 And certainly, we unveiled it basically to the

## Page 196

1 community at the Christmas parade. And we didn't  
2 tell anyone we were coming. We just showed up  
3 with the pickup. And wasn't too many dry eyes in  
4 the crowds of people nor among ourselves. It was  
5 touching and certainly is a testament and memory  
6 to her husband, and we certainly appreciate what  
7 she done for us.

8 MR. BUDDEN:

9 Q. That's how you guys came to have that sort of  
10 sharp-looking pickup Command Centre out there.  
11 That segues, I guess, into the other thing or the  
12 next thing I was going to talk about.

13  
14 When we met the other day, a fair bit of  
15 frustration, I guess, was expressed to me. Or  
16 maybe that's not quite the word. But the subject  
17 of fundraising came up and the obligations, I  
18 guess, that imposes.

19  
20 Could you speak to that perhaps, Mr. Goobie. And  
21 then, Mr. Chippett, if you have anything to add  
22 for Red Indian Lake?

23 MR. GOOBIE:

24 A. Yeah. With our volunteer teams in Newfoundland

**Page 197**

1 and Labrador, it costs a lot of money to keep our  
2 teams operational. I'll just go over some  
3 examples of types of costs that we incur, whether  
4 it be through the association or through the  
5 teams themselves.

6  
7 Things are not cheap in the rescue world. When  
8 you're trying to fundraise and buy things, it  
9 becomes pretty taxing on the teams.

10  
11 Just touching a few key points with regards to  
12 training. When we go out on an actual search,  
13 the teams are reimbursed for their costs of the  
14 meals and their fuel and rental of some of our  
15 equipment. That's covered off under the  
16 provincial plan for the RCMP for reimbursement  
17 for us for expenses.

18  
19 When we get into training, like all the costs  
20 when we go out and do a training session, which  
21 we need to do because we want to stay sharp on  
22 our game plans. So, for instance, our FRC which  
23 is a Fast Rigid Craft, which is a rigid hull  
24 inflatable boat. It got two 75 horsepower motors

**Page 198**

1 on it. So when we go out training in that, it  
2 takes 12 gallons per hour of fuel to run it.

3  
4 So do the math on the price of fuel right now,  
5 and you don't want to be out too many hours  
6 running it when you're into a fair number of  
7 dollars to a team.

8  
9 First Aid training, which we need to have, our  
10 team and had Barry go. We paid for Barry to go  
11 do his training in St. John Ambulance, just to  
12 try to save some dollars. So Barry is able to  
13 teach our team First Aid, but every three years  
14 that we have to be retrained in First Aid, so it  
15 comes at an expense.

16  
17 When we go out for training, all of our fuels,  
18 whether we use quads or we use our pickups or  
19 whatever to get to the site to where we're doing  
20 our training, the team has to reimburse our  
21 membership. And for our meals and whatever we're  
22 doing on the training, all comes out of our own  
23 pocket.

24

**Page 199**

1 Our personal equipment that each member has  
2 itself, their boots, their oilskins, their GPS,  
3 their kit bag, you name it, that's in their pack,  
4 these team members that you see here today pay  
5 for all of that out of their own pocket.

6  
7 The team doesn't have the money to be able to do  
8 that, so everybody that joins a team are gracious  
9 enough that they fund all this stuff themselves.  
10 And let me tell you, if you're out in the woods,  
11 you want good equipment and good equipment comes  
12 at a price tag. My rain gear itself is 2,000  
13 bucks. So stuff gets pretty expensive.

14  
15 Now, average that, our team is 2- to 3,000 hours  
16 per year, just in training. So it gets fairly  
17 expensive.

18  
19 And that's just, like I say, on our building --  
20 we have a building here. So our heat and light,  
21 our cell phone, our security system, all gets  
22 paid by us to fundraise.

23  
24 So whatever way we can get out to the community,

**Page 200**

1 whether it's out picking up garbage along the  
2 Trans Canada, doing a moose burger sale, doing  
3 parking for a group or any way that we can find  
4 to raise money, you'll see us around town trying  
5 to make ends meet by fundraising.

6  
7 So the commitment of our membership to be able to  
8 get out and do that is taxing on them. Just  
9 putting the search part to one side. The  
10 training, the fundraising. And you seen what  
11 type of hours is being put into it. Personally,  
12 I'm anywhere from 800 to 1,000 hours per year  
13 volunteering.

14  
15 So it's taxing on the home life. We all got to  
16 have a life besides search and rescue, but our  
17 spouses are very supportive of us. I get a call  
18 and I'm gone through the door. She knows sooner  
19 or later I'll contact her and let her know where  
20 I am. I won't tell her when I'll be back because  
21 most times I don't know. But they realize what  
22 we're committed to and don't question when we go  
23 through the door. And they're there to support  
24 us when we come home.

## Page 201

1 MR. BUDDEN:

2 **Q.** I'm going to ask a couple of more questions of  
3 you. Then I'm going to turn and go to you,  
4 Mr. Chippett, for some comment from a Red Indian  
5 Lake perspective.

6  
7 But what I'm hearing from you, you have, I guess,  
8 capital expenses. Like actually buying things.  
9 And you have operational expenses. Like the cost  
10 of your training. The cost of maintaining your  
11 satellite equipment. The cost of fuel. All that  
12 kind of stuff. So you've got really two  
13 categories of expenses, I guess, like many  
14 organizations do.

15  
16 And that comment you made about something along  
17 the highways, what was that? Picking up?

18 MR. GOOBIE:

19 **A.** Every year the Town of Grand Falls-Windsor does a  
20 cleanup here around town. So they pay volunteer  
21 groups to go and clean up the town. So each year  
22 in front of the highway right here, that's our  
23 area because it's probably the most dangerous  
24 area of anywhere in the town.

## Page 202

1 So we start at the Scott Avenue overpass and we  
2 clean up so far as the Kelly Ford overpass, which  
3 gives you about five kilometres.

4  
5 Every year we usually pick up anywhere from 180  
6 to 250 bags of garbage off of this stretch of  
7 highway.

8 MR. BUDDEN:

9 **Q.** And that's a fair -- that would take a few hours,  
10 I would assume?

11 MR. GOOBIE:

12 **A.** It takes a lot of hours and lot of person hours  
13 and commitment to go out and do that, after  
14 getting off work five o'clock in the evening and  
15 six o'clock we're at the building with garbage  
16 bags in hands and work till dark and clean up the  
17 highway here through the town.

18 MR. BUDDEN:

19 **Q.** So it's possible you could work all day, get off  
20 at 5:00 or 6:00, work until dark or later picking  
21 up garbage, and then get home and five minutes  
22 later you get a call and you're out at one of  
23 these 16-hour-day searches?  
24

## Page 203

1 MR. GOOBIE:

2 **A.** Correct.

3 MR. BUDDEN:

4 **Q.** Okay. And when you put all that together, I  
5 guess, the fundraising, is that something, I  
6 guess -- and I realize that you've expressed on  
7 many occasions, both privately to me the other  
8 day and again here today, your gratitude to the  
9 town and to the people of this area for  
10 supporting your work so generously.

11  
12 How do you feel, having said all that, having  
13 acknowledged all that? Does the fundraising sort  
14 of ever get to you?

15 MR. GOOBIE:

16 **A.** Oh, no doubt. You give up your weekends to do a  
17 fundraiser for whatever. A moose burger sale, or  
18 a car wash or whatever. But the end of the day  
19 as you look out in the parking and look in our  
20 building, the equipment, we see the rewards of  
21 our efforts that's put into the fundraising.

22  
23 But you got 50 people on our team, but it becomes  
24 taxing. Nobody wants to going door to door or

## Page 204

1 bugging your friends every month, well, I got a  
2 ticket for sale and I got this.

3  
4 We do a calendar draw. Our calendar each year in  
5 our town we've been doing for the past, I guess,  
6 ten years or more. And we got sponsorship from  
7 different businesses in town. That's one of our  
8 major fundraisers. So we give them out then.  
9 The calendars we give them out at the Christmas  
10 parade to the public.

11  
12 So little things like that, but over and over  
13 that you're fundraising just to keep your head  
14 above water and to keep trying to improve on your  
15 equipment and your expertise is taxing on the  
16 members.

17 MR. BUDDEN:

18 **Q.** I can only imagine. And the numbers, if I heard  
19 them correctly, 16,000 hours over the last year  
20 and a half, divided among 50 members. So you're  
21 talking, by my math, that's about a little over  
22 300 hours per member over a year and a half. So  
23 you're talking an average of 200 hours a year per  
24 member?

## Page 205

1 MR. GOOBIE:  
 2 A. Correct, yes.  
 3 MR. BUDDEN:  
 4 Q. Thank you. Does that square with your  
 5 understanding, Harry? Mr. Blackmore?  
 6 MR. BLACKMORE:  
 7 A. Correct.  
 8 MR. BUDDEN:  
 9 Q. Thank you. Mr. Chippett, we've heard about the  
 10 Exploits, their circumstances and situation. I'm  
 11 interested in hearing -- as you said, you're from  
 12 a much smaller area and it logically follows a  
 13 smaller team.  
 14  
 15 Can you tell me a little bit about these topics  
 16 from your perspective? Fundraising, the hours  
 17 that have been committed and so on? The kind of  
 18 things that Mr. Goobie has talked about over the  
 19 last few minutes?  
 20 MR. CHIPPETT:  
 21 A. Well, our team is based out of Buchans, Buchans  
 22 Junction, and Millertown. So you're looking at a  
 23 population of about 1,000 people. Most of them  
 24 or half are seniors. So 24 members on a team,

## Page 206

1 luckily the Town of Buchans is very supportive.  
 2  
 3 The building we're in, they gave it to us. It  
 4 was an old Light and Power building. They gave  
 5 it to us. Here it's yours. We pay no taxes on  
 6 it. We pay a light bill on it. You can't heat  
 7 the whole building. We got a room we heat with  
 8 our gear in it.  
 9  
 10 When you're competing against fire departments,  
 11 schools, churches for the same dollar in the same  
 12 community, it's a challenge. You sell moose  
 13 burgers, you're doing poker runs, to pay the  
 14 light bill. We are.  
 15  
 16 We got a truck that we got from the association.  
 17 I mean, the association is really good to our  
 18 teams. But we still have to maintain the gear.  
 19 We got an Argo we got from Hydro. We got a  
 20 trailer we got from Hydro. But lucky for us, we  
 21 have two mechanics on our team. And anything  
 22 that's complicated we'll bring to Roger.  
 23  
 24 But I mean, it's a real challenge when you got to

## Page 207

1 sell, and you got to say, oh, we can't do it this  
 2 week because the dart league got a ticket sale.  
 3 So it's at a point now people will say, no, we  
 4 can't do a moose burger sale. We got to ask the  
 5 boys if they got one first.  
 6  
 7 Like you get two or three big ticket items of  
 8 poker run, the moose burger sale, no, that's  
 9 ours. Now, we can't do something every week once  
 10 a month, because then you're cutting across  
 11 everybody else. The local fire department or the  
 12 churches is always doing stuff. So you got to  
 13 try to get in as much as you can and two or three  
 14 fundraisers.  
 15  
 16 Like I said, we sells moose burgers to pay light  
 17 bills. As for the radio system, we got a  
 18 beautiful radio system. We can't have all the  
 19 fancy bells and whistles that costs us every  
 20 month. We just can't afford it. Right. Like I  
 21 said, our pickup is insured by the town, which is  
 22 grateful.  
 23  
 24 So I mean, it's a big challenge for little teams.

## Page 208

1 We try to do as much training as we possibly can  
 2 inhouse. The boys comes up. We go down whenever  
 3 we can.  
 4  
 5 We got guys working. So it's a very big  
 6 challenge to keep volunteers dedicated to  
 7 organizations like the search and rescue. We do  
 8 it and we do it very well for our capability of  
 9 the access to the resources that we have.  
 10  
 11 So it is challenging. It's a real big challenge.  
 12 I mean, is someone home this way. When you get a  
 13 phone call, hold on now. This one's working.  
 14 That one's working. You're counting on your hand  
 15 of who is around. That's what you do every time,  
 16 because you know...  
 17  
 18 You got a boat. A few years ago one team  
 19 upgraded a boat, so all that stuff gets passed  
 20 down. We got Roger's other boat. Beautiful  
 21 boat. So you take it out for a ride, you hits a  
 22 set of blades, it's \$300. That's a lot of money  
 23 for a team that don't have a lot of money.  
 24

## Page 209

1 So it's a challenge. It really is. We do it and  
 2 we do it the best we can, and we're holding our  
 3 own. But everyday you're looking for something  
 4 else and it's all volunteer hours. Like you  
 5 said, it's a challenge, I tell you.  
 6 MR. BUDDEN:  
 7 Q. Do you have any sense of the annual volunteer  
 8 hours that your team puts in?  
 9 MR. CHIPPETT:  
 10 A. I don't have access to it right now, but we don't  
 11 have the amount of hours that Roger's team or the  
 12 bigger teams have.  
 13  
 14 And as for the tax write-off, little things, we  
 15 don't accumulate enough hours in a year to get  
 16 any benefit to that. Right.  
 17 MR. BUDDEN:  
 18 Q. Well, you're still -- obviously, on this search  
 19 for a small team, you guys had a big footprint?  
 20 MR. CHIPPETT:  
 21 A. Yes, we did. Yeah.  
 22 MR. BUDDEN:  
 23 Q. Okay.  
 24

## Page 210

1 MR. CHIPPETT:  
 2 A. Yeah. We had a big footprint. And we'll always  
 3 have a footprint. Anything that's in our area or  
 4 Roger's, we'll always have a footprint of some  
 5 size. Regardless of how big it is, nobody knows,  
 6 but we'll always have a footprint. That's  
 7 guaranteed.  
 8 MR. BUDDEN:  
 9 Q. Thank you. There's a number of other men here.  
 10 Team members here. Does anybody else want to  
 11 talk about this particular issue? I guess,  
 12 fundraising, financing? We'll move on to other  
 13 topics, but this particular issue, anybody else  
 14 want to talk about it? Yes, I see, David, isn't  
 15 it?  
 16 MR. MORROW:  
 17 A. Yeah, Dave Morrow. I just want to comment on  
 18 what Jeremy said. It's very telling that he  
 19 describes it as holding our own. It's sad when  
 20 we have to hold our own to get by. Right. We're  
 21 just holding our own. And that's a good  
 22 description of what it is for most of the teams.  
 23 Because you got maybe seven, eight fairly large  
 24 teams like our team. But the rest of the teams

## Page 211

1 that are all small like Red Indian Lake and they  
 2 shouldn't have to hold their own. They should be  
 3 able to show up with the gear they need to  
 4 support the people that they are there to help  
 5 out.  
 6  
 7 Fire departments are managing. I know here in  
 8 Grand Falls-Windsor we've got quite a large fire  
 9 department. But towns are out and they're  
 10 raising the funding and the government gives them  
 11 money for new fire trucks. It depends on how  
 12 much money is available and who your MHA is and  
 13 stuff.  
 14  
 15 And other agencies are funded. Policing  
 16 agencies, paramedics. First responders are  
 17 mostly funded. We're probably the only first  
 18 responder group that has to go and fundraise so  
 19 we can hold our own, right.  
 20 MR. BUDDEN:  
 21 Q. Thank you. Does anybody else wish to speak to  
 22 that?  
 23 WINSTON CLARKE:  
 24 A. Yes. Even though we sacrifice our hours and time

## Page 212

1 to do all these fundraising efforts, at the end  
 2 of the day when we can look across and see  
 3 Mr. Sweetapple, it's worth it.  
 4 MR. BUDDEN:  
 5 Q. And nobody doubts that for a minute. I must say,  
 6 I don't think anybody here would question that.  
 7 In terms of recruitment, none of you appear to  
 8 have been just new to the team in the last year  
 9 or two.  
 10  
 11 How are you doing on the recruitment front? I  
 12 guess both teams? Do you want to go first,  
 13 Jeremy?  
 14 MR. CHIPPETT:  
 15 A. Yes, sure. For us, we get some of the younger  
 16 guys now. We've picked up four or five members  
 17 in the last few months that's 18, 19, 20 years  
 18 old. That's just got out of high school and with  
 19 lots of energy and lots of go.  
 20  
 21 Don't have the knowledge and experience of some  
 22 the guys that's on our team. So then we have  
 23 some other guys that's been around for 30 years,  
 24 ah, I think I'm going to give it up. No, you're

## Page 213

1 not. No, you're not giving it up. I can't go.  
 2 You haven't got to go in the woods anymore, you  
 3 can sit aboard the truck and tell the younger  
 4 guys what to do. You have to try to maintain  
 5 everybody.  
 6  
 7 We don't have a list of fellers jumping to get  
 8 on. So you got to try to keep the members you  
 9 have as happy as you can and try to say no, no,  
 10 you're not giving it up. You can sit there and  
 11 get an easier job and let the younger guys do the  
 12 harder stuff.  
 13  
 14 I mean, when you only got a population of 1,000  
 15 and three parts is 60 or 70 years old, you really  
 16 got to... It's one of those things, you keep the  
 17 members you got.  
 18 MR. BUDDEN:  
 19 Q. Understood. Are all your members men or do you  
 20 have any female members?  
 21 MR. CHIPPETT:  
 22 A. No, we have four female members right now.  
 23 MR. BUDDEN:  
 24 Q. Okay. Out of? What's the total team size now?

## Page 214

1 MR. CHIPPETT:  
 2 A. Twenty-four.  
 3 MR. BUDDEN:  
 4 Q. Okay. Are they relatively recent additions or  
 5 have they been there for awhile?  
 6 MR. CHIPPETT:  
 7 A. No, some of them, they've been there awhile.  
 8 There's some in there 15, 20 years. And some in  
 9 there five or six years.  
 10 MR. BUDDEN:  
 11 Q. Okay.  
 12 MR. CHIPPETT:  
 13 A. Yeah. No, it's good.  
 14 MR. BUDDEN:  
 15 Q. Thank you. And, Mr. Goobie, have you anything to  
 16 say about recruitment?  
 17 MR. GOOBIE:  
 18 A. I'm going to let Cameron, our membership  
 19 committee chair, speak to that one.  
 20 MR. SNOW:  
 21 A. Hi, Cameron Snow, Exploits Search and Rescue.  
 22 We're lucky in that we do have a larger  
 23 population to draw from in our membership drive,  
 24 shall we say.

## Page 215

1  
 2 Last year during the pandemic, we paused all that  
 3 and put it on hold. And this year when we  
 4 advertised through our Facebook, it was our  
 5 primary way of doing it.  
 6  
 7 We did have around 16 applications come in. And  
 8 internally we said we can probably fill around  
 9 ten spots.  
 10  
 11 The average age of our applicants were 32 years  
 12 old this year. And I've been watching the  
 13 inquiry and paying attention to it the last week.  
 14 And most of the people sitting around the table  
 15 are well above that age, I would imagine, in  
 16 terms of search managers. So it was a pleasant  
 17 surprise to see a lot of younger guys come into  
 18 the team interested.  
 19  
 20 So for us on, our team, we take a four-step  
 21 approach basically. We have new applicants log  
 22 into the SARVAC website and complete a two-hour  
 23 webinar.  
 24

## Page 216

1 Once that's complete, we do outdoor exercise for  
 2 basically a full day or half a day, where we get  
 3 a chance to look at people and see are they  
 4 capable of moving around in the woods. Are they  
 5 team players? Can they communicate effectively?  
 6  
 7 The third portion would be an interview and  
 8 information session to say a large portion of our  
 9 work is not necessarily missing berry pickers.  
 10 It is fundraising. It's a commitment. So just  
 11 don't think you show up with your backpack and  
 12 you go every day. It is picking up garbage on  
 13 the highway.  
 14  
 15 I think we looked at our search data over the  
 16 last couple of weeks, and close to 35 percent of  
 17 our searches have been directly related to mental  
 18 health calls. So that has been definitely a  
 19 shift. In 1985, it was a moose hunter, a berry  
 20 picker. Whereas now, the mental health piece is  
 21 much more significant.  
 22  
 23 And finally, we will put our members on a  
 24 six-month probation period. And within that

## Page 217

1 period, of course, we can meet with the  
2 membership committee and address any concerns.  
3  
4 Also, of course, there is training. So October  
5 the 1st to the 3rd, coming up here in town, which  
6 is as Friday, a Saturday, a Sunday, all of our  
7 new people that we've accepted, which we have ten  
8 this year, will do basically a two-and-a-half-day  
9 training session which will give them the basic  
10 fundamentals to join the team and head out into  
11 the woods.

12  
13 And as an additional part of that, anybody who is  
14 new that we take this year, we'll be pairing them  
15 with a mentor. So someone who is brand new  
16 showing up to the team, doesn't know where to  
17 start, right away they'll have someone to (a)  
18 communicate with on the way to a search, because  
19 lots of times there's questions to as where we  
20 are. But once they're there, in the interest of  
21 their own safety and in the interest of being  
22 most effective with the people that we have, they  
23 will go to their mentor, obviously, and say sort  
24 of like where do we start here today.

## Page 218

1 MR. BUDDEN:  
2 Q. And you have 50 members of your team? Did I hear  
3 that earlier today?  
4 MR. SNOW:  
5 A. Yes. So prior to the drive, we were around 38 or  
6 40. So now with 10 new intake, we'll be at 50  
7 strong here.  
8 MR. BUDDEN:  
9 Q. Okay. And are any of your team members at the  
10 moment female or are they all men?  
11 MR. SNOW:  
12 Q. Currently, we don't have any female members. We  
13 have had female members in the past and have  
14 moved away. Job relocation, etcetera.  
15 MR. BUDDEN:  
16 Q. Okay. So obviously, you would be welcomed.  
17 Female members would be welcomed. Just at the  
18 moment there are none?  
19 MR. SNOW:  
20 A. Exactly. Of course.  
21 MR. BUDDEN:  
22 Q. Okay.  
23 WILLIAMS, Q.C.  
24 Q. Geoff, if I could before we leave. Mr. Snow,

## Page 219

1 could you just elaborate, because it's of  
2 interest and we've been looking at this  
3 throughout the inquiry. In terms of the mental  
4 health calls that you reference, I'd be  
5 interested in hearing from the nature of the  
6 calls, obviously, without specifics of  
7 identification, but, as well, the resources that  
8 you have or you think you may need in terms of  
9 support for mental health calls?

10 MR. SNOW:

11 A. Sure, okay. Generally, I guess Roger would get a  
12 call from the RCMP saying that the individual has  
13 gone missing and there is a concern for their  
14 wellbeing. When we looked at our calls since  
15 2017 to now, over 30, close to 35 percent have  
16 been directly related to that.

17  
18 Unfortunately, in that time we have come across a  
19 fair number of times people who have  
20 unfortunately died by suicide. And, of course,  
21 that then directly involves members of our team  
22 who are up close and personal with that scene,  
23 and the baggage that comes with that mentally.

24

## Page 220

1 Part of our process here in our own team would be  
2 a critical debriefing to follow. So once we come  
3 back, we would meet in our building and discuss  
4 basically sort of how you felt about that. But  
5 the reality of it is, is that's not enough. And  
6 when you're exposed to trauma like that  
7 sometimes, and a lot of people in this room, I'm  
8 sure, can attest to that, that it takes time to  
9 digest and that first night, that second night  
10 and well beyond where you really get time to  
11 think about it.

12  
13 We try to say to these bunch of burly fellows we  
14 have in our room that you can talk about it. You  
15 know what I mean? If you have an issue, you come  
16 and see me and we'll follow up. But as we all  
17 know, that's not necessarily the case either.  
18 And people tend to keep things inside. You may  
19 be more inclined to tell your deepest darkest  
20 secret to a stranger versus the guy who you see  
21 every day.

22  
23 Recently, in our own, like through this  
24 conversation, and we knew we were coming here, we

## Page 221

1 did speak to our own membership about some of  
2 these issues, and we did have a member who  
3 really, really had a hard time. And it was year  
4 before he went for help, really. And there's no  
5 need of that in terms of reaching out and having  
6 accessibility to service.

7 WILLIAMS, Q.C.:

8 Q. Did he have that? Do you feel you have  
9 accessibility?

10 MR. SNOW:

11 A. I think that if I took it upon myself to go to  
12 our coordinator Roger and say, Roger, I'm really  
13 having a hard time with this, then he would then  
14 say, okay, you seek counselling and the  
15 association would pay for it if you didn't have  
16 that insurance or whatever yourself.

17  
18 A lot of our guys are independent contractors.  
19 They're rough and tumble, and they have a real  
20 trouble with that. And plus, you're exposing  
21 your vulnerability in the truest sense of the  
22 word. You're coming to a coordinator or to the  
23 head of the team and saying I'm really struggling  
24 with this. So I think people are inclined to

## Page 222

1 keep it in.

2  
3 And to put it in perspective, and we sort of  
4 chuckled about this the other evening, the member  
5 that we had who had a really hard time, he was  
6 afraid of the dark. Okay. He was afraid to  
7 drive in his vehicle by himself. And he said,  
8 Cameron, I'll put it to you this way, on a  
9 Saturday night I had the option to stay home and  
10 watch a hockey game or go with my wife to my  
11 mother-in-law's and play Rummoli. And that's  
12 where I went. I was afraid to stay by myself.

13  
14 So really when you think about that in the big  
15 picture we shouldn't be in that situation. And  
16 we talked about solutions, obviously, once we  
17 knew we were coming here. And I said to him,  
18 like, what would you have liked to see? And I  
19 think when we talked about it ourselves, he said,  
20 like, Cameron, if you came to me and said here is  
21 a contact number -- and we know there are options  
22 available, Doorways, the Mental Health Crisis  
23 line. But if I had come to him and said this is  
24 search and rescue dedicated counsellors that we

## Page 223

1 have here in the province. It's an anonymous  
2 phone call. With COVID we've eliminated  
3 geography. You don't need to go to St. John's  
4 for an appointment. You can videoconference or  
5 whatever. And said this is a number for you to  
6 call, he said I think I would have reached out a  
7 lot earlier. I think I would have been able to  
8 pick up that number. Those counsellors could  
9 direct bill the association or whoever is  
10 responsible, I guess, and that would have sort  
11 of, I think, paved the way for him to get help.

12 WILLIAMS, Q.C.:

13 Q. Okay. Thank you.

14 MR. BUDDEN:

15 Q. Both Harry and Dave -- do you want Dave to go  
16 first, Harry? Okay. Maybe let Dave go first and  
17 then Harry wants to speak.

18 MR. MORROW:

19 A. I just want to continue on what Cameron was  
20 saying on training and stuff like that. One of  
21 the things that we have done as a team is we have  
22 decided to do a lot of training around this. So  
23 we have brought people in from the Alzheimer's  
24 Association. We've brought in drug and alcohol

## Page 224

1 counsellors from Central Health. Other mental  
2 health organizations and things like that. And  
3 they have come in and done presentations.

4  
5 We've all done training on how to use Naloxone,  
6 on how to deal with people with dementia, and  
7 these sorts of things. And this is an ongoing  
8 training that when I started in the team, back in  
9 1982, I would never have thought I would have to  
10 do. But it's something that we're being forced  
11 into doing for ourselves, because our members are  
12 being more and more exposed to that all the time.

13  
14 The one thing I would like to see is Mental  
15 Health First Aid training for all the members.  
16 But the last time I went and looked for it, it  
17 was expensive and we couldn't afford it, to be  
18 perfectly honest.

19  
20 There are agencies out there who do teach that  
21 and whatever else like that, but we would have to  
22 go find funding and all that kind of stuff. And  
23 when I was looking for it, probably four or five  
24 years ago, maybe six years ago, we just couldn't

## Page 225

1 afford it at the time because the cost was way  
 2 more than what we could afford and we had to pay  
 3 for first aid. So I mean, you know.  
 4 MR. BUDDEN:  
 5 Q. Thank you. Just before I get to Harry, just that  
 6 last comment. You're talking about not the  
 7 mental health of your own membership, but  
 8 training to deal with the mental health of those  
 9 you are searching for? The mental health  
 10 challenges of the people you may be searching  
 11 for?  
 12 MR. MORROW:  
 13 A. Yeah. The mental health of our own members from  
 14 a trainer's perspective is not my focus.  
 15 MR. BUDDEN:  
 16 Q. Understood.  
 17 MR. MORROW:  
 18 A. Yeah. I need to be able to train our members or  
 19 get training for our members so that they can  
 20 deal with these situations when they come upon  
 21 them. Because we have on numerous occasions run  
 22 into people who are fragile. And you have to be  
 23 very, very careful how you talk to them because  
 24 you don't want to push them over the edge. You

## Page 226

1 want them to survive. You want them to prosper.  
 2  
 3 You don't want to have to come back, as we have  
 4 in some occasions, come back a short time later  
 5 and have to remove him, remove the body. And  
 6 we've had to do that too. And it's not something  
 7 that you want to have to do, but it's something  
 8 that we're having to do much more frequently than  
 9 we used to.  
 10 MR. BUDDEN:  
 11 Q. Mr. Blackmore?  
 12 MR. BLACKMORE:  
 13 A. Yeah. Mental health issues with us now are a big  
 14 thing. Roger said 35 percent of their calls. I  
 15 say my team is 65 percent. If I had a dollar for  
 16 every time I went out through the door looking  
 17 for someone suicidal, I wouldn't have to do no  
 18 more fundraising, we're that busy with it.  
 19  
 20 But one big thing that I have to complain about,  
 21 and we've been fighting this ever since. We  
 22 fought with Department of Justice. We finally  
 23 got some (inaudible) in the EAP, which is next to  
 24 impossible. But anyway. And we do go through

## Page 227

1 it.  
 2  
 3 We do have help from the RNC. They bring in  
 4 counsellors for us, but one strike with the RCMP  
 5 is in national policy. They only take care of  
 6 their own people and not the search and rescue  
 7 people that are working for them.  
 8  
 9 We've fought this tooth and nail over the years,  
 10 and I'm still arguing with Danny, and he agrees  
 11 with me, but it's their national policy. They  
 12 don't take care of us. They just take care of  
 13 their selves. And I think that's one major  
 14 thing.  
 15  
 16 We're out doing the work for them. We're the  
 17 best avenue they got for what they got to do, and  
 18 if we come back with a problem they won't even  
 19 take care of us. So there's something wrong with  
 20 that issue. And that's not from just -- I'm not  
 21 saying Newfoundland B Division. That's a  
 22 national policy which is garbage for our own  
 23 people.  
 24

## Page 228

1 We have to keep a certain amount of money in our  
 2 own little budget that we get, just in case we  
 3 have to pay for our own people to go see a  
 4 psychiatrist. And that's not right.  
 5 MR. BUDDEN:  
 6 Q. As you know, next week we will be looking at a  
 7 search that might raise some of these issues. So  
 8 well, certainly, that's not the last we'll hear  
 9 on this particular topic. Far from it.  
 10  
 11 Those really were all the questions I had. What  
 12 I'd like to do is just remind members that this  
 13 is a public inquiry into the state of search and  
 14 rescue, looking for recommendations to go  
 15 forward.  
 16  
 17 Commissioner Igloliorte has heard a lot from you  
 18 folks today.  
 19  
 20 Before I turn it over to my colleagues to  
 21 question you and to the Commissioner to question  
 22 you, is there any sort of final comment that any  
 23 of you wish to say about that, about the state of  
 24 search and rescue and about possible

Page 229

1 recommendations going forward that's sort of  
 2 something that really hasn't been covered that  
 3 you want to speak to?  
 4  
 5 I'll give everybody a chance to answer. So just  
 6 speak up as you wish. Mr. Clarke, I believe you  
 7 were going to say something? I see you had your  
 8 mask down. Okay.  
 9 MR. GOOBIE:  
 10 A. Roger Goobie. I'll just speak to one more issue  
 11 that is not a problem at the present moment, but  
 12 in the past I guess it's posed a big problem to  
 13 our team.  
 14  
 15 What has happened in the past, we get called out  
 16 on a search by the RCMP and we are told how many  
 17 members they wanted to attend. And I'll just  
 18 speak to a couple of incidents. That we got into  
 19 trouble of trying to do what we were tasked to do  
 20 with a limited number of people.  
 21  
 22 I'll speak to one ice recovery search that we had  
 23 in the Badger Lake area. And this went on for a  
 24 couple of days trying to recover the lady. And

Page 230

1 when we got there towards the third day or so, I  
 2 was told that you need to bring a half a dozen  
 3 members tomorrow to the search.  
 4  
 5 Anyway, my comment back was you can tell me how  
 6 many sandwiches you are going to pay for, but  
 7 please don't tell me how many members, volunteers  
 8 that are willing to go to the site that I can  
 9 bring.  
 10  
 11 And I'll speak to another instance that we were  
 12 called for a body recovery for a gentleman that  
 13 had passed away into a small camp that he had  
 14 built.  
 15  
 16 We were requested four or five members to go  
 17 there. We were told initially, the initial  
 18 report was four- or five-minute walk off the  
 19 highway. When we got there at 10:30 that night  
 20 and started to go in to find the gentleman, it  
 21 ended up to being close to four- or  
 22 five-kilometre walk to get into him.  
 23  
 24 It was not a trail. It was just, I would call, a

Page 231

1 goat path going in through the woods. It was in  
 2 and out between trees, up over rocks, and  
 3 everything else. So we left the road that night  
 4 with, I think, four or five members that night.  
 5 At 10:30 at the night. And we got back to the  
 6 highway with the body the next morning at 5 a.m.  
 7  
 8 Let me tell you, I probably wasn't the most  
 9 popular search manager that night for getting the  
 10 gentleman. And I'll give credit. We had two  
 11 RCMP members that was with us that night and we  
 12 had two paramedics with us as well. And  
 13 everybody took turns of getting that gentleman  
 14 back out. But everybody's arms was quite a few  
 15 inches longer the next morning.  
 16  
 17 So we could go into a lot of unknowns. And I met  
 18 with the staff sergeant at the detachment after  
 19 that, and we come to agreement that when the  
 20 initial call comes in, I do a full call-out to  
 21 our membership now.  
 22  
 23 We got people that is training all the time.  
 24 They're willing and able to go, and they're

Page 232

1 trained to go. And when you starts picking and  
 2 choosing members, you rub some people the wrong  
 3 way.  
 4  
 5 The next time you really needs everybody, they're  
 6 going to say, well, you didn't need me the last  
 7 time, so maybe I got other more important things  
 8 to do this time. So we don't want people being  
 9 left out and under-utilized.  
 10  
 11 So the agreement we came to at the local  
 12 detachment here, has been working really good, is  
 13 that we make a full call-out. And after a couple  
 14 of hours on site, if we sees that we don't need  
 15 everyone, we ask the question to the membership,  
 16 do you want to go back to work or do you have  
 17 more pressing things to do with your family. And  
 18 we scale down from there, if necessary.  
 19  
 20 So I just wanted to bring that forward. That it  
 21 should not be by dictating to the membership when  
 22 it's only most times a few sandwiches and gas  
 23 involved. Not big expenses. But the value that  
 24 then -- the unknowns that we most times face when

## Page 233

1 we're out there, that we certainly, for a safety  
 2 perspective, that most times we need people on  
 3 the ground, too, to help out.  
 4 MR. BUDDEN:  
 5 Q. Thank you. Are there any other members who wish  
 6 to speak now from the Exploits or Red Indian Lake  
 7 SAR communities?  
 8  
 9 Well, now one thing I overlooked, I'll just go  
 10 back to Dave about. Your training. You're the  
 11 training officer within the Exploits team?  
 12 MR. MORROW:  
 13 A. Was for many years.  
 14 MR. BUDDEN:  
 15 Q. Okay.  
 16 MR. MORROW:  
 17 A. Now I'm just a member of the training committee.  
 18 MR. BUDDEN:  
 19 Q. Okay. You might be able to --  
 20 MR. MORROW:  
 21 A. I tried to resign for five years and Roger  
 22 wouldn't let me. So I finally managed to get off  
 23 of that job, yes.  
 24

## Page 234

1 MR. BUDDEN:  
 2 Q. But you're barely off, so you can speak to some  
 3 of the training stuff?  
 4 MR. MORROW:  
 5 A. Yes. Did you have any specific questions or did  
 6 you just want me to do a quick overview?  
 7 MR. BUDDEN:  
 8 Q. Well, both actually. Maybe give a quick  
 9 overview. But I'll tell you a couple of things  
 10 in advance I'm going to be asking you. One is,  
 11 do you train with other teams? The others, do  
 12 you train with any of the dispatching agencies,  
 13 particularly the RCMP? So take it away.  
 14 MR. MORROW:  
 15 A. Training has changed since 1982 when I first  
 16 started. When I first started, the only training  
 17 we got was the little bit of training we got from  
 18 the couple of RCMP officers who started the team.  
 19  
 20 When the association started, they got a grant.  
 21 They created a standardized training program for  
 22 all the teams in the province, which was  
 23 incredibly valuable because most of the teams in  
 24 the province up to that point were basically

## Page 235

1 cobbling together whatever stuff they could. And  
 2 there was no consistency whatever, especially if  
 3 we were called in to assist someone else.  
 4  
 5 Once this new training standard for the province  
 6 came in, it made it much easier for us to work  
 7 with other teams, because now we were all working  
 8 to the same training standard. We all did grid  
 9 searches the same way. Our radio procedures were  
 10 all the same. We are all trained to the same  
 11 standard in map and compass, and GPS and land  
 12 navigation, and that kind of thing.  
 13  
 14 We were all trained to the same level in  
 15 understanding the psychology of missing persons  
 16 or what the procedures were through a search and  
 17 what search techniques you could use and how to  
 18 use those search techniques. And those are  
 19 things that we still train to now.  
 20  
 21 several years ago I was fortunate enough to go to  
 22 Toronto for all of the trainers. Trainers from  
 23 all over the country. I think Robert was  
 24 probably there as well. Met in Toronto to

## Page 236

1 discuss the new program that was introduced  
 2 nationwide.  
 3  
 4 So now all of the search and rescue teams in the  
 5 country are now training to a national standard.  
 6 I do have a problem, because I don't have any of  
 7 the instructional aids that I really need to  
 8 implement that whole program. So I'm kind of in  
 9 a situation where I'm using all the instructional  
 10 aids I used for the old Searcher 1, Searcher 2  
 11 program, while I'm trying to teach the new  
 12 Searcher program that is nationalized, and trying  
 13 to pair the two together. But I'm still working  
 14 on that.  
 15  
 16 But we train extensively. All of the teams in  
 17 the province are trained to the same standard.  
 18 So when we go and work with Deer Lake team or Red  
 19 Indian Lake team or the Glovertown team, or if  
 20 for some reason we end up out on the east coast  
 21 helping with a really big search or something  
 22 like that, we are all trained to that same  
 23 standard. So we can mesh fairly well together  
 24 without too much difficulty. And it's been like

## Page 237

1 that since the association has been in the first  
2 program.  
3  
4 As to working with other agencies, generally we  
5 don't train with them, with their dispatchers or  
6 train with them to work together. We work with  
7 the RCMP primarily because we're the Department  
8 of Justice, Justice agency. We know how they  
9 work. We're just used to working with them. So  
10 we know what their procedures are. We know  
11 what's expected of us, and we know what to expect  
12 from them generally.

13  
14 One of the things our team has done over the last  
15 few years, particularly as we get changeover a  
16 fair bit sometimes in our liaisons with the local  
17 detachment, we offer our training to RCMP  
18 officers. And I think I've personally trained  
19 maybe 12, 15 RCMP officers in the last 10, 12  
20 years who came in and availed of our training.

21  
22 And you can correct me if I'm wrong, but it  
23 doesn't seem to be that new officers coming out  
24 of Regina are actually trained in search and

## Page 238

1 rescue, because we get a lot of young fellows and  
2 young women who aren't actually aware of what we  
3 do or whatever. And there seems to be -- the  
4 communication seems to be lacking more at the  
5 detachment level. Because particularly with the  
6 outlying detachments that we have to work with,  
7 they don't seem to know that we're here or how to  
8 use us. How to utilize us.

9  
10 And we deal with Bay D'Espoir, Harbour Breton,  
11 Lewisporte, Twillingate. Is Fogo in our area or  
12 are they in Glovertown's? Fogo is in our area as  
13 well. And Springdale detachment. Baie Verte  
14 detachment.

15  
16 These are all outlying detachments that we would  
17 get called in to work for if they knew. A lot of  
18 these guys in these outlying detachments are not  
19 familiar with us.

20  
21 They're not familiar with our procedures. And  
22 that makes it difficult when we show up on the  
23 scene to initially start to get the ball rolling  
24 and get the search started, because in some cases

## Page 239

1 we've got to educate them on how the process  
2 works and whatever.

3  
4 But like I said, that's something we're working  
5 on, too. But it's something that needs to be  
6 thought about, particularly at the detachment  
7 level and particularly with senior officers in  
8 the detachment areas when they're communicating  
9 with their outlying detachments.

10  
11 But other than that, the training that we do is  
12 now standardized and it's ongoing. And we do a  
13 lot of training. A lot more, actually, than we  
14 did several years ago.

15  
16 We've got a new training committee in our team  
17 that's very active and very interested in  
18 planning, training activities. We plan our  
19 training activities now months in advance. We've  
20 got a schedule in place for what's going to  
21 happen this month. And we've standardized  
22 training. Plus, we've got other training that we  
23 want to do as well. If we bring in someone  
24 outside, particularly for mental health training,

## Page 240

1 we'll do that outside our regular training.

2  
3 So on some months we're training a night every  
4 three or four weeks -- every week for three or  
5 four weeks we're doing training.

6 MR. BUDDEN:

7 Q. Thank you very much. I have no further  
8 questions. The other lawyers may have questions  
9 for you now, as may the Commissioner. Mr. Ralph?

10 RALPH, Q.C.:

11 Q. That was a very comprehensive presentation.  
12 Thanks again for all of that. And so many of the  
13 questions I had have been answered.

14  
15 I'm just curious, and maybe I can ask Richard  
16 Smith and maybe Louise Bradley about... Other  
17 jurisdictions, whether it's in this country or  
18 around the world that you might know of that have  
19 sort of programs, good programs to deal with, it  
20 will help issues for first responders like ground  
21 search and rescue, Louise? I know it's putting  
22 you on the spot there but...

23 MS. BRADLEY:

24 A. Actually, thank you for that question. It turns

## Page 241

1 out that Canada, strangely enough, is actually a  
 2 leader in this area, and there are programs  
 3 available.  
 4  
 5 You've mentioned one of them, which is Mental  
 6 Health First Aid, which is the same as general  
 7 First Aid in that it doesn't teach you to be a  
 8 psychologist. It actually teaches you how to  
 9 identify problems in somebody else and what to do  
 10 in order to -- long enough to get them somewhere  
 11 to get help.  
 12  
 13 So if somebody cuts themselves, you stop the  
 14 bleeding. You don't suture it, in other words.  
 15 And that is available and it's a Train the  
 16 Trainer program. So if funds can be found to  
 17 train one person, they, in turn, can train  
 18 others, which is ideal because to have somebody  
 19 who is a search and rescuer being able to train  
 20 others, they understand the issues far better.  
 21  
 22 There's also another program called The Working  
 23 Mind. And there is one that has been adapted for  
 24 first responders, specifically for them. And

## Page 242

1 unlike Mental Health First Aid, it is a  
 2 self-assessment tool. And it allows you to  
 3 colour code it, and allows you to see which  
 4 colour you're in and what to do when you are  
 5 experiencing some of those symptoms.  
 6  
 7 So there actually are programs in Canada that are  
 8 being adapted in other countries, and they are  
 9 available. And so I think and hope it's  
 10 something that we will see in the final report,  
 11 because they have been very successful in similar  
 12 groups throughout the country.  
 13  
 14 And also to your point about being able to access  
 15 mental health services anonymously. E-Mental  
 16 Health is another program that can be made  
 17 available.  
 18  
 19 So there are a number of things. Of course, they  
 20 come with a cost. And that is some of the issue.  
 21 And they take time. And like general First Aid,  
 22 you take it once and it has to be updated every  
 23 so often.  
 24

## Page 243

1 So there are programs available and hopefully  
 2 that can be included as a part of the report. Is  
 3 that answering your question?  
 4 RALPH, Q.C.:  
 5 Q. Yes. Thank you very much.  
 6 MS. BRADLEY:  
 7 A. Thank you.  
 8 RALPH, Q.C.:  
 9 Q. Richard? Mr. Smith, are you aware of any other  
 10 jurisdictions that would be dealing with these  
 11 issues particularly well, especially, I guess,  
 12 the trauma and first responders? And I guess are  
 13 you aware of any sort of preventive courses and  
 14 also sort of courses for addressing, or treatment  
 15 for addressing, programs for addressing the  
 16 impact of trauma?  
 17 MR. SMITH:  
 18 A. Richard Smith, Commissioner. Counsel, yes. And  
 19 I certainly agree and concur with what Louise had  
 20 to say. That was excellent.  
 21  
 22 There are a number of search and rescue training  
 23 manuals out there now, both from Search and  
 24 Rescue Basic SAR Skills, Search and Rescue

## Page 244

1 Leadership and Management that cover CISM,  
 2 critical distress management for stress injury.  
 3 And they go over exactly what Louise had  
 4 mentioned here, so that there's a general  
 5 knowledge and education.  
 6  
 7 But it does take the province and provincial  
 8 input to take that program forward on behalf of  
 9 the ground search and rescue personnel.  
 10  
 11 So British Columbia and Alberta, I'll speak to  
 12 them. And the RCMP also have a stress injury or  
 13 stress management program where each of the RCMP  
 14 members get a little tiny stress management  
 15 booklet.  
 16  
 17 So in Alberta, as an example, through Alberta  
 18 Emergency Management Agency, they issue a stress  
 19 management booklet, some are the RCMP's, to all  
 20 the GSAR personnel. So they understand to back  
 21 up their basic training or SAR management  
 22 training, here is what you need to look at for  
 23 the signs and symptoms working with your teams  
 24 and personnels. Here are the list of the peer

## Page 245

1 groups and also the teams that are available for  
2 you to contact.  
3  
4 And that's provided through Occupational Health  
5 and Safety and/or through emergency management  
6 agencies where they get their tasking members  
7 from to provide the GSAR delivery in the field on  
8 behalf of the police.  
9  
10 And British Columbia is the exact same way. And  
11 it's probably due to the number of incidents that  
12 have been undertaken over the last 45 years, and  
13 also the number of disasters that ground search  
14 and rescue has been involved in and responding to  
15 in the west.  
16  
17 Everything from earthquakes, to tornados, to  
18 floods, to wild and urban fire interface. So  
19 GSAR has played a significant role in those, that  
20 disaster. It's kind of been the impetus to get  
21 that up and running.  
22  
23 So little booklets, training, and then the  
24 Province standing behind it and covering the

## Page 246

1 ground search and rescue personnel in those  
2 areas.  
3  
4 It is behind in some other provinces. And again,  
5 that's just based on maybe a lack of emergency  
6 management programming development. In that  
7 particular case, a lack of sometimes coordination  
8 when it comes to health services for emergency  
9 service providers.  
10  
11 And we've seen that in the past where it's taken  
12 a long time for firefighters to get the cancer  
13 recognition from on-duty related injuries and  
14 cancer treatments. So now we're playing catchup.  
15 And certainly, police have seen that as well as  
16 Sergeant Williams will attest to. That's why  
17 they have their little booklets that are out  
18 there.  
19  
20 I have one of the booklets here in my backpack  
21 here, but I could show you. But they certainly  
22 are out there and they're great programs. They  
23 just need to be funded.  
24

## Page 247

1 RALPH, Q.C.:  
2 Thank you very much. I have no further  
3 questions. Thank you.  
4 MR. BUDDEN:  
5 Ms. Bedford, have you any questions?  
6 MS. BEDFORD:  
7 No, I don't. Thank you.  
8 MR. BUDDEN:  
9 Mr. Williams, have you any questions?  
10 WILLIAMS, Q.C.:  
11 I have nothing further. I think I've had  
12 everything I wanted to ask. Thank you.  
13 MR. BUDDEN:  
14 I believe Mr. Williams's client may have had a  
15 comment he wanted to make?  
16 MR. SWEETAPPLE:  
17 Well, anyway, on behalf of myself and my wife,  
18 I'd like to thank all you guys for what you've  
19 done for me.  
20  
21 I'm familiar with most of the Buchans Junction  
22 and the Millertown people, but I want to thank  
23 you again from the bottom of my heart. Thank you  
24 very much. You done a great job.

## Page 248

1 COMMISSIONER IGLOLIORTE:  
2 I want to thank you for showing me the good bake  
3 apple places. I'm going to go there looking next  
4 time myself.  
5 WILLIAMS, Q.C.:  
6 Don't go by yourself.  
7 MR. SWEETAPPLE:  
8 That's the problem. Nobody knew about Weasel  
9 Pond. Now everybody knows it.  
10 MR. BUDDEN:  
11 Take an (inaudible) with you, Commissioner,  
12 please. Commissioner, that is all the evidence  
13 we have for today. In the morning we will start  
14 with the evidence of Ms. Bedford's client. I do  
15 anticipate that we will conclude tomorrow. I  
16 think that's likely, given how we've moved  
17 through today quite smoothly.  
18  
19 Do you anticipate your clients will wish to give  
20 evidence at the end, Mr. Williams?  
21 WILLIAMS, Q.C.:  
22 Not certain. We're just going to let it flow.  
23 If they do, it will be a very short period of  
24 time, if they want to have anything. But they'd

1 like to hear everything first and then assess  
 2 that.  
 3 MR. BUDDEN:  
 4 Okay.  
 5 COMMISSIONER IGLOLIORTE:  
 6 Yeah. Well, the only issue I have is making sure  
 7 that we don't keep volunteers longer than we have  
 8 to. We're all paid handsomely for what we do.  
 9 At least I am. I don't know about you fellows.  
 10  
 11 So I want to make sure that volunteers who take  
 12 time off of work, we respect their time schedule.  
 13 And so if you could just take a minute to check  
 14 that out, make sure that if they want to be here  
 15 they can be here. But if they got to be away, we  
 16 don't call them back at a later time.  
 17  
 18 So five minutes and then we'll see where we're  
 19 going.  
 20 MR. BUDDEN:  
 21 That sounds good.  
 22  
 23 **(Inquiry is adjourned)**
